- Appendix C: Property Code Classifications

I. Introduction

The City of Ocala implemented a fire assessment program in early 2021, which was further refined in late 2021 to incorporate additional residential and non-residential land use categories. The study was updated in 2022. To reflect the most recent budget, incident data, and property unit data, the City retained Benesch in association with Susan Schoettle-Gumm, PLLC to prepare a fire assessment update study. A fire assessment is an annual charge applied to each property in the City that typically is collected through the property owners' tax bill under Florida's Uniform Assessment Collection Act. This document provides an explanation of the methodology used to calculate the fire assessment rates and the findings of the fire assessment study.

Fire Departments' primary function/goal is to respond to fire and medical incidents within a critical time frame to save lives and structures. Availability of this service on a 24-hour basis for seven (7) days a week along with the appropriate use of these resources is critical for the entire community during incidents by saving lives and protecting property, and through reductions in insurance premiums and increased property values.

Fire rescue services in Ocala are provided by the City of Ocala Fire Rescue Department. This study includes the Fire Department's budget associated with providing fire rescue and medical service with the exception of advanced life support (ALS) services. As discussed further in the Legal Requirements section of this report, fire assessments may not include costs related to non-traditional fire department services such as ALS. The portion of the Fire Rescue Department's budget associated with ALS services is excluded from the calculation of the Fire Assessment rates developed in this report.

Consistent with the current adopted methodology, this study uses a methodology that combines benefits received from the availability of the Fire Department with use of its resources, including equipment and personnel, for non-ALS incidents to determine the relative special benefit received by and allocate costs to each assessable property.

II. Service Delivery, Methodology and Legal Requirements

The City of Ocala Fire Rescue Department (OFR) provides fire rescue services throughout the city from seven fire stations, including:

- Fire Station No. 1 – 505 NW MLK Jr. Avenue;
- Fire Station No. 2 – 2701 SE 36th Avenue;
- Fire Station No. 3 – 320 NE 8th Avenue;
- Fire Station No. 4 – 3300 SW 20th Street;
- Fire Station No. 5 – 2340 NE 25th Avenue;
- Fire Station No. 6 – 5220 SW 50th Court; and
- Fire Station No. 7 – 885 SE 31st Street.

As mentioned previously, the study methodology has two components:

- Benefit received from the availability of the Fire Department on a 24-hour, 7 days a week basis, and
- Benefit received from the actual response to events.

Benefit from the Availability of the Fire Department

The availability of the Fire Department’s services benefits properties in terms of insurance premium reductions as well as an increase in property values even if services of the Fire Department are never directly utilized by an individual property.

Measurement of a community’s fire protection services is provided through the Insurance Services Office (ISO), which collects information on municipal fire protection efforts throughout the United States. Ratings by the ISO are accepted by the insurance industry and by fire departments nationwide as the industry standard for measuring a fire department’s capacity and ability to suppress fire incidents. For each community, ISO analyzes relevant data using its Fire Suppression Rating Schedule (FSRS). The three primary areas of data analyzed include 1) fire department fire alarm and communications system, 2) fire department staff and equipment, and 3) water supply system available to the fire department. In turn, the FSRS is used to assign a Public Protection Classification (PPC) from 1 to 10 (commonly referred to as a fire department’s “ISO Rating”). An ISO Rating of Class 1 represents excellent public protection, while an ISO Rating of Class 10 indicates that the community's fire-suppression program does not meet ISO's minimum criteria. Participation in the ISO program aims primarily to provide a community with

an objective and standard rating system used nationwide that assists fire departments in planning and budgeting for facilities, equipment, and training. In addition, ISO ratings are used by many insurance companies to establish appropriate fire insurance premiums for residential and commercial properties within that community, thus providing a financial incentive for communities that choose to improve their fire protection services. This reduction in insurance premiums for structures and property is a special benefit to property supporting the fire assessments presented in this study.

Studies conducted on the impact of ISO ratings on insurance premiums documented that an improvement from Class 10 to Class 7 reduced insurance premiums 30 percent to 40 percent for residential properties. An improvement from Class 10 to Class 6 or better resulted in insurance premium reductions of 15 percent to 20 percent for office buildings.

The current ISO rating in Ocala is Class 2/2X. Class 1 and 2 ratings are achieved by approximately 35 percent of the communities in Florida. **Figure 1** presents the distribution of ISO Ratings for Florida communities.

Figure 1
Distribution of ISO Ratings for Florida Communities

Benefit from the Active Use of The Fire Department's Services

Approximately 76 percent of the incidents responded by OFR are medical in nature and 24 percent are fire related. As mentioned previously, this study examines the use of total available resources in responding to these incidents to allocate a portion of the costs to assessed properties. The Department has the capabilities to respond to fire incidents at any of the buildings in the city regardless of size.

Legal Requirements

There is a substantial body of case law in Florida upholding the authority of local governments to impose special assessments for fire rescue services. See, for example, Fire Dist. No. 1 of Polk County v. Jenkins, 221 So.2d 740 (Fla. 1969); Lake County v. Water Oak Management Corp., 695 So. 2d 667 (Fla. 1997), City of North Lauderdale v. SMM Properties, Inc., 825 So.2d 343 (Fla. 2002), Desiderio Corp. v. City of Boynton Beach, 39 So.3d 487 (4th DCA 2010). The authority of local governments to adopt and impose special assessments for fire rescue services and to develop fair and reasonable assessment apportionment methodologies was recently reaffirmed and unanimously upheld by the Florida Supreme Court in Morris vs. City of Cape Coral, 163 So.3d 1174 (Fla. 2015). This case upheld the City of Cape Coral's fire assessment program that recognized insurance savings, reduction in financial liability, and enhanced property values were among the special benefits to property received from the Fire Department's services. This case also approved the availability-based benefit approach that is being incorporated into this study.

Under Florida case law, the services or improvements funded by the assessment must have a logical relationship with and provide "special benefit" to property, and the assessment methodology must apportion the costs in a fair and reasonable manner. A local government's legislative determination of special benefit and fair apportionment should be upheld by a court unless the determination is arbitrary and not supported by competent, substantial evidence. Sarasota County v. Sarasota Church of Christ, Inc., 667 So.2d 180, 183 (Fla. 1995) (citing City of Boca Raton v. State, 595 So.2d 25, 30 (Fla. 1992)). In City of North Lauderdale v. SMM Properties, Inc., 825 So.2d 343 (Fla. 2002), the Florida Supreme Court reaffirmed that traditional fire protection services such as fire suppression, fire prevention, fire/building inspections and first response medical services (BLS) provide special benefit to property but held that advance life support (ALS) and medical transport do not have a logical relationship to property. The City of North Lauderdale decision limits a fire assessment to that portion of the fire department budget that relates to traditional fire services, including first responder services. The use of historical demand for fire protection services, by reviewing calls for service, was upheld as a reasonable

and fair basis for apportioning fire protection costs to assessed properties in the City of North Lauderdale case. In Desiderio Corporation, et al. v City of Boynton Beach, et al., 39 So.3d 487 (Fla. 4th DCA 2010), a method of allocating budget costs between fire rescue costs and ALS costs was approved as a fair and reasonable way to identify and remove ALS costs from the calculation of a fire rescue assessment.

The fire assessment methodology contained in this report is consistent with Florida case law and uses a combination of availability-based and resource utilization-based approaches. The calculations exclude the portion of OFR's fire budget and incidents associated with non-traditional emergency medical services, such as ALS, through a budget analysis, and allocates costs to assessed properties based on historical calls for service to quantify relative demand for and benefit from fire services by different land uses and properties.

Special Benefit and Fair Allocation Analysis

Fire services, facilities and programs provided by the City provide special benefit to assessed properties and have a logical relationship to the use, value, and enjoyment of such improved property. There are availability, or standing watch, benefits that come from the 24-hour, 7 days a week availability of fire service and first responder services as well as the more direct benefits from the responses to incidents by the Fire Department. Benefits include protecting the value and integrity of improvements and structures, protecting the life and safety of intended occupants in the use and enjoyment of property, lowering the cost of fire insurance by the presence of professional and comprehensive fire services within the city, and containing fire incidents with the potential to spread and endanger other property.

As detailed later in this report, the Fire Rescue Department budget has been analyzed by cost categories to exclude costs related to providing ALS and to include in the assessable costs only costs reasonably related to the provision of traditional fire services, including for example, fire suppression, fire prevention, fire/building inspections and first response medical services (BLS). The assessable costs were then allocated to land uses based on a combination of availability of the service and historical usage of fire services by the land use types. The analysis includes multi-year records of calls for service and the total department resources used in responding to the incidents to obtain a larger sample size and more stable resource distribution.

The costs allocated to the Residential Land Use, which includes single family, multi-family, and mobile home categories, are distributed on a per dwelling unit basis for several square footage tiers for development in the city. The number and size of dwelling units on an assessed property

is obtained from the property database maintained by the Property Appraiser in the normal course of performing his or her constitutional responsibilities. The fire assessment for any residential parcel is determined by the number of dwelling units multiplied by the applicable residential dwelling unit rate for each residential category as determined based on the type of residential development and the size of the dwelling unit(s).

The costs allocated to the Non-Residential Land Uses are distributed based on square footage tiers for four different categories (commercial, industrial, institutional and government). Square footage data for non-residential structures on assessed property is obtained primarily from the property database maintained by the Property Appraiser in the normal course of performing his or her constitutional responsibilities with some additional data provided by the City from on-site inspections of structures. The use of square footage tiers for Non-Residential property is fair and reasonable because the demand for fire services is not precisely determined by the actual square footage of a structure and the application of square footage tiers to Non-Residential structures is a fair and reasonable method to apportion costs among benefitted buildings that create similar demand for fire services.

Finally, a separate rate is calculated for vacant developable property based on resource utilization, adjusted to reflect lesser benefit received by vacant properties compared to the property with structures and people. The resulting share of the budget is divided by the number of vacant parcels to calculate the assessment rate.

III. Calculation of Fire Assessment Rates

There are several components in determining the fire assessment rate schedule:

- Assessment factor
- Fire assessment funding requirement
- Incident data distribution by land use
- Fire assessment cost allocation
- Land use data
- Calculated assessment schedule

These components are discussed in further detail below, resulting in the calculated fire assessment rate schedule for the City of Ocala.

Assessment Factor

The first component in calculating the City's fire assessment rates is to determine the assessment factor, which includes analysis of total department resources used in responding to incidents as well as the number of incidents. This assessment factor is used to identify assessable costs in the Fire Department budget by excluding costs related to ALS when a cost category represents a mix of assessable and non-assessable costs. The distribution of incidents was analyzed in terms of advanced life support (ALS) versus fire and basic life support (BLS). This analysis includes incident data from March 2016 through December 2022, for a total of almost seven years of incident data. **Table 1** provides a summary of the seven-year average that incorporates the recent incident activity. Throughout this study, a seven-year average is used to minimize temporary fluctuations in any individual year. The portion of non-ALS incidents, measured through the allocation of total resources to these incidents, is approximately 81 percent and is used as part of the budget allocation process.

≈81% of the Fire Department's resources are used for non-ALS incidents.

Table 1
Distribution of Incidents

Year	Frequency ⁽¹⁾		Staff Time ⁽²⁾		Vehicle Time ⁽³⁾		Total Resources ⁽⁴⁾	
	ALS	Non-ALS	ALS	Non-ALS	ALS	Non-ALS	ALS	Non-ALS
2016	10.3%	89.7%	10.7%	89.3%	10.2%	89.8%	10.5%	89.5%
2017	12.3%	87.7%	13.2%	86.8%	12.6%	87.4%	13.0%	87.0%
2018	11.6%	88.4%	15.6%	84.4%	15.3%	84.7%	15.5%	84.5%
2019	17.4%	82.6%	21.2%	78.8%	20.6%	79.4%	21.0%	79.0%
2020	22.1%	77.9%	27.8%	72.2%	28.5%	71.5%	28.0%	72.0%
2021	21.2%	78.8%	24.2%	75.8%	25.3%	74.7%	24.5%	75.5%
2022	14.7%	85.3%	19.9%	80.1%	20.2%	79.8%	20.0%	80.0%
2016-22	15.6%	84.4%	19.2%	80.8%	19.2%	80.8%	19.2%	80.8%

Fire Assessment Funding Requirement

Table 2 provides a detailed breakdown of the FY 2023 assessable budget for the City of Ocala Fire Department. If a given expenditure is associated with non-ALS services, the entire amount is included in the assessable budget. When an expenditure is determined to be related to both ALS and non-ALS services, 81 percent of the amount is included in the assessable budget. All ALS-only expenditures are excluded. In addition, all dedicated revenues are subtracted in a similar manner. Finally, miscellaneous expenditures related to the assessment program are added to determine the full assessable fire budget.

Table 2
Ocala Fire Rescue Maximum Assessable Budget (FY 2023)

Description	FY 2023 Fire Budget		
	Total Budget	Adjustment Factor	Fire Assessment Budget
Expenditures ⁽¹⁾			
Personnel:			
- ALS and Non-ALS	\$18,282,799	80.8%	\$14,772,502
Operating:			
- Non-ALS	\$288,140	100.0%	\$288,140
- ALS and Non-ALS	\$3,316,248	80.8%	\$2,679,528
Capital Outlay:			
- ALS and Non-ALS	\$260,167	80.8%	\$210,215
Subtotal - Expenditures	\$22,147,354	-	\$17,950,385
Less: Revenues ⁽¹⁾			
Fire False Alarm Fees	\$14,000	100.0%	\$14,000
Fire Plan Review	\$175,000	100.0%	\$175,000
State Shared Revenue-Firefighter Suppression Comps	\$30,000	100.0%	\$30,000
Marion County Automatic Aid Reimbursement	\$252,700	80.8%	\$204,182
Fire Pension Reimbursement	\$14,364	80.8%	\$11,606
Subtotal - Revenues	\$486,064	-	\$434,788
Total Net Expenditures ⁽²⁾	\$21,661,290	-	\$17,515,597
Miscellaneous Assessment Expenditures			
Statutory Discount ⁽³⁾			\$437,890
Total Fire Assessment Funding Requirement			\$437,890
Total Assessable Budget ⁽⁴⁾			\$17,953,487
Total Assessable Budget (FY 2022)			\$16,486,107
Total Funding Requirement_Addendum (FY 2022 Adopted) ⁽⁵⁾			\$9,765,000

1) Source: City of Ocala. Detailed expenditure data is provided in Appendix B, Table B-1

2) Total expenditures less total revenue

3) Statutory discount can reflect up to 5% reimbursement, which includes 4% to offset statutory discounts received for early payment pursuant to the Uniform Assessment Collection Act and 1% reserve for delinquencies and under-collection. Used a 2.5% reimbursement of the total net expenditures based on the City's historical average property tax revenue loss due to early payment discounts over the last three years.

4) Sum of net expenditures (Item 2) and total miscellaneous assessment expenditures

5) Reduced FY 2022 budget figure that is the basis for the current adopted fire assessment rates

Incident Data Distribution by Land Use

The third component in calculating the fire assessment rates is the demand for fire rescue services by land use, which will be used for the “resource-based” benefit component. The approach used in this report is a widely used and accepted method of identifying the historical relative benefit from and demand for fire services by various land uses. This benefit allocation is used to fairly and reasonably distribute the fire rescue assessed costs to land uses.

To determine the historical demand for fire rescue services by each type of land use, a review was completed to quantify the number of incidents and resources related to each incident by land use. As discussed previously, this approach provides an understanding of the utilization of fire rescue services by each land use. To complete this analysis, based on available data, incidents for the past seven years (2016 through 2022) were obtained from the OFR and analyzed. OFR also identified incidents that had an ALS component. These ALS incidents, as well as others that cannot be attached to a land use (such as traffic accidents or other outside incidents), were excluded from the analysis.

Distributing the cost based solely on the number of incidents does not reflect the full level of resources used by each land use. Therefore, the total resources were reviewed, which take into consideration incident duration, number of vehicles and staff used in addition to the frequency. As shown in **Table 3**, residential incidents account for most of the fire rescue resources in the City of Ocala, with the commercial land use also accounting for a large portion of resources.

Table 3
Distribution of Total Resources by Land Use

Land Use	Resource Distribution 2016-2021	Resource Distribution 2016-2022	% Change
Single Family/Mobile Home/Duplex	37.3%	36.7%	-1.6%
Multi-Family	13.5%	13.6%	0.7%
Commercial	38.1%	38.5%	1.0%
Industrial/Warehouse	3.4%	3.5%	2.9%
Institutional	3.1%	3.0%	-3.2%
Government	2.0%	2.0%	0.0%
Vacant	2.4%	2.6%	8.3%
Agricultural	0.2%	0.1%	-50.0%
Total	100.0%	100.0%	-

Source: Appendix A, Table A-8

Although approximately 2.6 percent of the resources are used by vacant properties, because vacant properties do not have buildings and people present, the benefit received by these properties is more limited compared to improved properties. The suppression of fire on vacant property benefits vacant property, but also benefits the adjacent improved properties and their occupants by the containment of the spread of fire. Therefore, it is reasonable to allocate half of the vacant land resource utilization to vacant land in the assessment calculations. The rest of the resource utilization is redistributed among other land uses, as shown in **Table 4**.

Table 4
Distribution of Total Resources
by Land Use with Vacant Land Adjustment

Land Use	Resource Distribution 2016-2021	Resource Distribution 2016-2022	% Change
Single Family/Mobile Home/Duplex	37.80%	37.19%	-1.6%
Multi-Family	13.70%	13.78%	0.6%
Commercial	38.60%	39.01%	1.1%
Industrial/Warehouse	3.40%	3.55%	4.4%
Institutional	3.10%	3.04%	-1.9%
Government	2.00%	2.03%	1.5%
Vacant	1.20%	1.30%	8.3%
Agricultural	0.20%	0.10%	-50.0%
Total	100.0%	100.0%	-

Source: Table 3, vacant land use is reduced by 50%, which is distributed among other land uses

Fire Assessment Cost Allocation

The fourth component in determining the City’s fire assessment rates is the allocation of the assessed costs to land use categories, based on the total fire assessment funding requirement and distribution of total resources. **Table 5** presents the fire assessed cost allocation by land use/rate category. As shown, single family and commercial land uses account for approximately 76 percent of the budget.

Per State legislation, agricultural land uses are exempt from fire rescue assessments. Florida Statutes Section 170.01 (4) provides that, with limited exceptions, a City may not levy a special assessment for fire protection services on lands classified as agricultural lands under Florida Statutes Section 193.461 unless those lands contain a qualified building. Therefore, the portion of the budget associated with agricultural fire rescue incidents cannot be recovered through the City’s fire rescue assessment and will be excluded in the remainder of this report. Similarly, the

City does not assess government properties and will need to supplement the revenue loss through the General Fund.

**Table 6
Fire Protection Cost Allocation**

Land Use	FY 2023 Portion of Total Resources ⁽¹⁾	Share of FY 2023 Maximum Assessable Budget ⁽²⁾
Funding Requirement	-	\$17,953,487
Single Family/Mobile Home/Duplex	37.19%	\$6,676,902
Multi-Family	13.78%	\$2,473,991
Commercial	39.01%	\$7,003,655
Industrial/Warehouse	3.55%	\$637,349
Institutional	3.04%	\$545,786
Government	2.03%	\$364,456
Vacant	1.30%	\$233,395
Agricultural	0.10%	\$17,953
Total	100.0%	\$17,953,487

1) Source: Table 5; total resource distribution from 2016 to 2022
 2) Reduced assessment funding requirement from Table 2 multiplied by portion of the resources (Item 1)

Property Units

The fifth component in determining the fire assessment rates to allocate the assessed costs to property units (e.g., dwelling units or square footage on parcels) within each land use. This was accomplished by developing an assessment roll database utilizing the most recent data from the Marion County Property Appraiser. The database includes both properties that are tax exempt (i.e., governmental uses) and non-tax exempt, and all units were used in the assessment calculations.

For residential land uses, the total number of dwelling units within the city was determined. In addition, the square footage of each unit was also noted. In the case of apartments, because the square footage of individual units in an apartment building was not available in the Property Appraiser database, an average unit size was calculated based on total square footage and total number of units. For the non-residential (i.e., commercial, industrial/warehouse, and institutional structures) land uses, the total living floor square footage was distributed into square footage tiers.

Table 6 presents a summary of the total property units calculated for each land use category.

Table 6
Property Units in the City of Ocala

Property Rate Category	Unit	Total Number of Units
<i>Residential</i>		
Single Family/Mobile Home/Duplex	dwelling unit	18,274
Multi-Family	dwelling unit	<u>11,245</u>
Residential	dwelling unit	29,519
<i>Non-Residential</i>		
Commercial	square footage	18,955,466
Industrial/Warehouse	square footage	21,850,514
Institutional	square footage	4,934,866
Government	square footage	<u>6,155,759</u>
Non-Residential	square footage	51,896,605
<i>Vacant Land</i>		
Vacant	parcel	4,191

Calculated Fire Assessment Rate Schedule

Residential and Non-Residential Land Uses

As discussed previously, this study uses a methodology that combines benefit to the property from the availability of the Fire Department as well as that received from active use of its resources. More specifically, the following steps are completed in the calculation of assessment levels:

- Seventy percent of the budget allocated to residential land uses is distributed among all dwelling units equally. Similarly, 70 percent of the non-residential budget is distributed equally among the total non-residential square footage. This distribution accounts for the benefit received by each property from the availability of the Fire Department’s services.
- The remaining 30 percent is distributed to each land use based on use of resources.

The use of 30 percent for resource allocation and 70 percent for availability is due to the industry standards¹ that indicate that a station that is active more than 30 percent of the time tends to experience inefficiencies in terms of addressing concurrent incidents, personnel fatigue, lack of training, among other issues.

¹ Center for Public Safety Excellence and Commission on Fire Accreditation International, *CFAI Standards of Cover, 5th Edition*

Tables 7 and 8 provide these calculations for residential land use categories. As presented in **Table 7**, the portion of the budget allocated to residential land use categories is \$9.2 million. Seventy percent of this budget is allocated among all dwelling units in the city (29,519) equally, resulting in the availability portion of the assessment rate (\$217 per home).

The remaining 30 percent of the budget is distributed between the two residential categories based on their use of resources. Single family/mobile home/duplex units utilize approximately 73 percent of the residential resources while multi-family homes (apartments and condos) use the remaining 27 percent. Distribution of resource-based budget portion in this manner results in a resource-utilization rate of \$110 per dwelling unit for single family residential land use and \$66 per dwelling unit for multi-family residential land use.

Sum of these two components result in an overall non-tiered base assessment rate of approximately \$327 per dwelling unit for single family/mobile home/duplex residential land use and approximately \$283 per dwelling unit for multi-family residential land use.

Table 7
Calculated Base Residential Fire Assessment Rates

Property Rate Category	Budget Allocation ⁽¹⁾	Distribution of Residential Budget ⁽²⁾	Total Number of Units ⁽³⁾	Fire Assessment Base Rate per Unit ⁽⁴⁾
Single Family/Mobile Home/Duplex	\$6,676,902	73.0%		
Multi-Family	\$2,473,991	27.0%		
Total	\$9,150,893	100.0%		
Availability Portion				
70% of Total Budget ⁽⁵⁾	\$6,405,625	-	29,519	\$217.00
Resources Portion				
30% of Total Budget ⁽⁶⁾	\$2,745,268	-	29,519	\$93.00
Single Family/Mobile Home/Duplex ⁽⁷⁾	\$2,004,046	73.0%	18,274	\$109.67
Multi-Family ⁽⁸⁾	\$741,222	27.0%	11,245	\$65.92
Total	\$2,745,268	100.0%	29,519	-
Calculated Rate per Unit				
Single Family/Mobile Home/Duplex ⁽⁹⁾				\$326.67
Multi-Family ⁽¹⁰⁾				\$282.92

2) Budget portion of each residential category

3) Source: Table 6

4) Budget allocation divided by dwelling units

5) Total residential budget of \$9.2 million multiplied by 70% to calculate availability portion

6) Total residential budget of \$9.2 million multiplied by 30% to calculate resource utilization portion

7) Resource utilization portion of the budget (30%) allocated to single family/mobile home/duplex

8) Resource utilization portion of the budget (30%) allocated to multi-family (apartments and condos).

9) Sum of availability-based rate of \$217 and resource-utilization based rate of \$110

10) Sum of availability-based rate of \$217 per unit and resource-utilization based rate of \$66

Once the base fee for each residential category is calculated, a tiered schedule is provided in **Table 8**. The resource-based portion varies by size of home given that larger homes tend to be more valuable. A review of average home values by size of home in Ocala obtained from Marion County Property Appraiser database supported this relation.

This tiered approach is supported by the fact that a large portion of the benefit to the property is derived from the availability of the Fire Department in the form of reduced insurance premiums and increased property values, which in turn suggests lower savings from insurance premiums and lower property values for smaller homes. As mentioned previously, the review of the data from the Property Appraiser database suggested that smaller houses have a lower value compared to larger homes.

The tiered rates are calculated by developing an Equivalent Residential Unit (ERU) factor for each tier based on the ratio of the average size of each tier to the average size of the entire residential category. These ERU factors are then used to distribute resource-based portion of the fee in a tiered-manner as opposed to using the group average shown in Table 8. The resulting rate is added to the availability-based portion of the rate to determine the final tiered rate for each residential category.

Table 8
Calculated Tiered Residential Assessment Rates

- 3) Resource utilization-based portion from Table 7 multiplied by ERU (Item 2)
- 4) Source: Table 7
- 5) Sum of resource-based portion (Item 3) and availability-based portion (Item 4)
- 6) Fire assessment rate (Item 5) adjusted down slightly to neutralize revenue generation

Table 9 provides similar calculations for non-residential land uses and calculates assessment rates on a per square foot basis. Consistent with the methodology described previously, 70 percent of the non-residential budget is allocated among all non-residential square footage equally and 30 percent of the non-residential budget is allocated based on resource utilization of each non-residential land use.

Resulting rates are then applied to the mid-point of square footage tiers to develop the tiered non-residential rate schedule on a per parcel basis. These calculations are shown in **Table 10**.

Table 9
Calculated Base Non-Residential Fire Assessment Rates

Property Rate Category	Budget Allocation ⁽¹⁾	Distribution of Non-Residential Budget ⁽²⁾	Total Square Footage ⁽³⁾	Fire Assessment Rate per Sq Ft ⁽⁴⁾
Commercial	\$7,003,655	81.8%

- 2) Source: Table 9
- 3) Mid-point (Item 1) multiplied by the total parcels (Item 2) for each tier

Vacant Land

As discussed previously, 50 percent of the resources allocated to vacant land is used in the assessment calculation for the vacant parcel assessment rate. This adjustment was made to recognize the fact that vacant property derives less benefit from the Fire Department’s availability and services compared to developed properties with buildings and more people. As shown in **Table 11**, this adjusted budget was divided by the number of parcels to determine the assessment rate of \$55.69 per parcel.

Table 11
Calculated Vacant Parcel Assessment Rate

Property Rate Category	Budget Allocation ⁽¹⁾	Total Number of Parcels ⁽²⁾	Budget per Parcel ⁽³⁾
Vacant Land	\$233,395	4,191	\$55.69

Appendix A
Ocala Fire Rescue Incident Data

Appendix A

This appendix documents the incident data analysis conducted as part of the technical study. Incidents over the past seven years were analyzed to estimate demand from each land use for fire rescue services. **Tables A-1 through A-8** present this analysis.

Table A-1
OFR Distribution of Incidents by Type of Service

Appendix C
Property Code Classifications

Appendix C

This appendix documents land use classifications used for incidents and for residential units and non-residential square footage.

Table C-1 details the property code classifications from the National Fire Incidents Reporting System. These codes are applied to each fire rescue incident report. The “fire assessment incident category” illustrates how these codes were categorized for the land use categories used in the fire assessment update.

Table C-2 details the property class code classifications from the Marion County Property Appraiser’s Office. Property class codes used by the Marion County Property Appraiser correspond to the Department of Revenue (DOR) codes. These codes are applied to each parcel in the City of Ocala. The “fire assessment land use category” illustrates how these codes were categorized for the land use categories used in the fire assessment update. Additional building detail was reviewed, including the improvement type and interior finish type; however, based on information provided by the Fire Department on the classification of incidents, the property class code was used for the fire assessment update.

**Table C-1
Property Code Classifications – Fire Rescue Incidents**

NFIRS Code	Main Category	NFIRS Description	Fire Assessment Land Use Category
0	Other	Other	n/a
00	Other	Other	n/a
000	Other	Property Use, Other	n/a
100	Assembly	Assembly, other	Commercial
110	Assembly	Fixed use recreation places, other	Commercial
111	Assembly	Bowling alley	Commercial
112	Assembly	Billiard center, pool hall	Commercial
113	Assembly	Variable use amusement, recreation places	Commercial
114	Assembly	Ice rink: indoor, outdoor	Commercial
115	Assembly	Roller rink: indoor or outdoor	Commercial
116	Assembly	Swimming facility: indoor or outdoor	Commercial
120	Assembly	Amusement center: indoor/outdoor	Commercial
121	Assembly	Ballroom, gymnasium	Commercial
122	Assembly	Convention center, exhibition hall	Commercial
123	Assembly	Stadium, arena	Commercial
124	Assembly	Playground	Government
129	Assembly	Amusement center, indoor/outdoor	Commercial
130	Assembly	Places of worship, funeral parlors	Institutional
131	Assembly	Church, mosque, synagogue, temple, chapel	Institutional
134	Assembly	Funeral parlor	Commercial
140	Assembly	Clubs, other	Commercial
141	Assembly	Athletic/health club	Commercial
142	Assembly	Clubhouse	Commercial
143	Assembly	Yacht club	Commercial
144	Assembly	Casino, gambling clubs	Commercial
150	Assembly	Public or government, other	Government
151	Assembly	Library	Government
152	Assembly	Museum	Commercial
154	Assembly	Memorial structure, including monuments & statues	Vacant
155	Assembly	Courthouse	Government
160	Assembly	Eating, drinking places	Commercial
161	Assembly	Restaurant or cafeteria	Commercial
162	Assembly	Bar or nightclub	Commercial
170	Assembly	Passenger terminal, other	Commercial
171	Assembly	Airport passenger terminal	Commercial
173	Assembly	Bus station	Commercial
174	Assembly	Rapid transit station	Commercial
180	Assembly	Studio/theater, other	Commercial
181	Assembly	Live performance theater	Commercial
182	Assembly	Auditorium or concert hall	Commercial
183	Assembly	Movie theater	Commercial
185	Assembly	Radio TV Studio	Commercial
186	Assembly	Film/movie production studio	Commercial
