ENVIRONMENTAL PROFESSIONAL STATEMENT

This Phase I Environmental Site Assessment (ESA) was performed by a qualified scientist(s) and/or engineer(s) employed by Greenman-Pedersen Inc. (GPI). The individuals responsible for the preparation of this report are identified below, and resumes for these Environmental Professionals are on file at GPI, and are available upon request.

We declare that, to the best of our professional knowledge and belief, we meet the definition of *Environmental professional* as defined in §312.10 of 40CFR Part 312. We have the specific qualifications based on education, training, and experience to assess a *property* of the nature, history, and setting of the subject *property.* We have developed and performed the all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

ESA Performed By:

_____

James C. Manzella, CHMM
Senior Environmental Scientist

1.0 INTRODUCTION

Greenman-Pedersen Inc. (GPI) was retained by the City of Ocala, to perform a Phase I Environmental Site Assessment (ESA) for the former Fire Station No. 1 site (comprised of seven individual tax parcels) located east of NE Watula Avenue and west of NE Tuscawilla Avenue and immediately north and south of NE 2nd Street and NE 3rd Street respectively, in the City of Ocala, Florida (henceforth referred to as the "subject property"). The location of the subject property is depicted on Figure 1 and further described in Section 3.0 below. The purpose of this ESA is to identify recognized environmental conditions, as defined by *American Society for Testing and Materials* (ASTM) Practice E 1527-13, in order to locate and further define the areas of environmental concern that may be subject to future site investigation activities.

The term "recognized environmental conditions" is defined by ASTM as the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: (1) due to any release to the environment; (2) under conditions indicative of a release to the environment; or (3) under conditions that pose a material threat of a future release to the environment. The term is not intended to include de minimis conditions that generally do not present a material risk of harm to public health or the environment, and that generally would not be the subject of an enforcement action if brought to the attention of the appropriate regulatory agencies.

This Phase I ESA Report has been prepared to:

- Provide a general description of the subject property, and vicinity;
- Discuss the current and historical usage of the property and surrounding area;
- Identify the presence or absence of recognized environmental conditions in connection with the subject property based upon the results of a historical and regulatory records review, interviews, and a site reconnaissance; and
- Define areas of potential environmental concern warranting further investigation.

2.0 SCOPE OF WORK

The Phase I Environmental Site Assessment Report relates the findings with respect to:

- Records Review
- Site Reconnaissance
- Interviews

Limitations and exceptions associated with the performance of this Phase I Environmental Site Assessment are presented at the end of this report.

2.1 Records Review

A review of historical and regulatory records from Local, State, and Federal sources was completed as part of this Phase I ESA. The review of historical sources was completed to develop a history of the previous uses or occupancies of the subject property and surrounding area in order to identify uses or occupants that may have led to recognized environmental conditions in connection with the subject property. Standard historical sources were consulted to identify uses of the subject property from 1940 to the present, when reasonably ascertainable. At a minimum, at least one historical source was consulted to investigate past uses of the property until the time at which the property was undeveloped. The historical use of adjoining properties was also researched as part of this review. Section 4.0 details the results of the historical records review.

A review was performed of Local, State, and Federal record sources relating to the presence or occurrence of facilities or spills involving solid or hazardous waste and petroleum products within the subject property and/or properties occurring within the approximate minimum search distances established in ASTM Practice E-1527-13. The results of the regulatory records review are included as Section 5.0.

2.2 Site Reconnaissance

A site visit of the subject property was conducted to identify visible environmental concerns including, but not limited to:

- Current and past use of the property and adjoining parcels
- The physical setting of the property including a general description of structures and improvements on the site
- Storm water discharges
- On-site sewer systems
- Evidence of hazardous waste or petroleum product generation, storage, treatment, or disposal
- Strong or noxious odors
- Pools of liquids
- Groundwater seeps
- Stained soils and surfaces
- Stressed vegetation
- Improper disposal of solid waste

2.3 Interviews

Reasonable attempts were made to conduct interviews with former employees, neighboring property owners, and local government officials for the purpose of obtaining

information indicating recognized environmental conditions in connection with the subject property. A summary of the interviews is included in Section 6.2.

2.4 Report

This report includes the necessary documentation to support the findings and conclusions listed in Section 8.0. It summarizes the records and historical use review, the site reconnaissance, and the results of interviews. The report also documents each source used, even if the source revealed no findings, to facilitate reconstruction of the research at a later date, if necessary. Additionally, this report describes any missing information that was not readily obtainable and discusses the implications of these data gaps.

2.5 Additional Services

The scope of this Phase I ESA, as outlined in the preceding subsections, was developed in accordance with ASTM Practice E 1527-13. No additional services beyond that specified in ASTM Practice E 1527-13 were provided. More specifically, this ESA did not include sampling or analysis of potential lead-based paint or asbestos-containing materials, or the collection and analysis of environmental samples, for the purpose of characterizing physical or chemical conditions on or within the subsurface of the subject property. An environmental lien search was not included in the scope of services.

3.0 SITE DESCRIPTION

This section briefly describes the subject property, as well as the general location and description of the property. The subject property is then defined through the use of common physical setting sources and a description of neighboring properties.

3.1 Location and Description

The subject property is located east of NE Watula Avenue and west of NE Tuscawilla Avenue and immediately north and south of NE 2nd Street and NE 3rd Street respectively, within the northeastern portion of downtown Ocala. The subject property is zoned as Government Use for the two northern most parcels and Multi-Family Residential for the remainder of the parcels. The property contains a 11,903 ft^2 concrete block building utilized as the main fire station building on the northwestern most parcel and a 1,620 ft^2 concrete block building utilized as a City Parks and Recreation administration building on the northeastern most parcel. There are also several smaller (< 300 ft^2) storage sheds, a basketball court and paved parking areas in the northern portion of the property. The remainder of the property (i.e. southern portion) is comprised manicured lawn with mature trees. The subject property is comprised of seven individual tax parcels. Collectively the parcels comprising the subject property include approximately 3 acres of

land. Figures 1 and 2 provide the location and approximate boundaries of the parcels comprising the subject property.

The parcels have parcel identification numbers assigned to them by Marion County. The table below identifies the parcel addresses, the parcel ID numbers, approximate acreage and current development status each parcel comprising the subject property.

Street Address	Parcel ID No.	Approximate Acreage	Current Use
235 NE Watula Avenue	2820-050-001	1.08	One-story fire station building
403 NE 2nd Street	2820-050-002	0.99	Undeveloped and used as staging site for construction equipment and materials for nearby municipal construction projects
410 NE 3rd Street	2820-050-004	0.19	One-story Parks and Recreation administration building
236 NE Tuscawilla Avenue	2820-050-005	0.23	Undeveloped except for wooden storage shed and portion of a basketball court
-	2820-050-006	0.13	Wooden storage shed concrete basketball court
224 NE Tuscawilla Avenue	2820-050-007	0.19	Vacant and undeveloped
220 NE Tuscawilla Avenue	2820-050-008	0.19	Vacant and undeveloped

3.2 Physical Setting Sources

3.2.1 Topography

The topography of the subject property is generally flat with an approximate elevation of 71-feet above mean sea level (AMSL) based upon USGS topographic mapping of the area.

3.2.2 Site Geology and Hydrology

The *U.S. Department of Agriculture's Soil Conservation Service* indicates that the uppermost overburden layer underlying the majority (i.e. all but the southeastern portion) of the subject property is comprised of Urban land, which is defined a land that is overlain by at least 80% roads and buildings. Soils underlying the southeast portion are from the Hague-Urban land complex, which is comprised of sand, sandy clay loam and loamy sand. The *Geologic Map of the State Florida* indicates uppermost geologic formation beneath the subject property is the Coosawhatchie Formation within the Hawthorn Group which consists of variably clayey and phosphate containing sand which occasionally contain a dolomitic component.

A Flood Insurance Rate Map of the area indicates that the subject property is not within the boundaries of the 100- or 500-year floodplains.

The direction of groundwater flow is not well defined, but fundamental hydrogeologic principles suggest that groundwater flow is likely to be north / northwest adhering to the surface topography of the area. However, localized variations in groundwater flow direction may occur in the vicinity of utility lines or other subsurface features.

The U.S. Department of Interior Fish and Wildlife Service National Wetlands Inventory Mapper was reviewed for the subject property. Tuscawilla Lake to the north is listed as a freshwater pond. No federal wetlands are mapped for the subject property. Additionally, no indications of wetlands were observed on the property during the site reconnaissance.

3.3 Neighboring Properties

Land use in the vicinity of the subject property consists of a mixture of governmental, commercial, professional and medical office, and residential uses. The subject property is bound to the north by NE 3rd Street beyond which is Tuscawilla Park; to the east by NE Tuscawilla Avenue beyond which are residential homes; to the south by NE 2nd Street beyond which is a residential property and a vacant lot; and to the west by NE Watula Avenue beyond which is the UniFirst, a uniform rental and industrial laundry company.

4.0 HISTORICAL RECORDS REVIEW

This section of the report details historical information from typical sources, as well as sources that may be unique to the subject property.

4.1 Fire Insurance Maps

Fire insurance maps typically were produced for commercial, industrial, and residential properties that would have been underwritten by insurance companies. Fire insurance maps were ordered from Environmental Risk Information Services (ERIS) and reviewed for the years 1891, 1895, 1901, 1906, 1912, 1924, 1930, 1948 and 1970. A copy of ERIS's fire insurance map search report is included in Appendix A.

The subject property was not depicted on the 1891 map. Adjoining properties depicted were limited to those to the southwest which were developed with residential homes.

The 1895 and 1901 maps depicted the southern portion of the subject property which encompassed the parcels immediately adjacent to NE 2nd Street as developed with three residential homes. Adjoining the property to the south, southeast and southwest were residential homes. The depiction of the adjoining properties to the east and west were limited to those adjoining the southern portion of the property and consisted of residential homes. Adjoining properties to the north were not depicted.

The 1906 and 1912 maps depicted only minor changes to the subject property and adjoining properties. The changes to the subject property included a greenhouse on the southeastern portion of the property on the 1906 map. Development including sheds and garages was depicted in central portion of the property on the 1912 map. Development on the adjoining properties was similar to earlier maps; however, additional development further north on the adjoining properties to the east and west was depicted mainly as residential with greenhouses depicted on the adjoining property to the southeast.

The 1924 map depicted a few notable changes to the subject property aside from an additional residential home in the southeast portion of the property. Aside from the park depicted to the north of the subject property and a Woman's Club building to the south, there were no notable changes to the adjoining properties.

The 1930 map depicted four residential buildings on the southern portion of the subject property, one residential building centrally located along the eastern boundary and one residential building in the northeast corner of the property. Development on adjoining properties was similar to earlier maps; however, additional residential development was depicted on the properties to the east, also a lake was depicted within Tuscawilla Park to the north.

The 1948 map depicted a few notable changes to the subject property aside from an additional residential home in the northeast portion of the property. The majority of the residential homes (all but two) on the adjoining properties to the west were no longer depicted and instead a steam laundry facility was shown. An auto body shop was depicted on the adjoining property to the northwest. Conditions on the remaining adjoining properties were similar to the previous maps.

The 1970 Sanborn Map depicted three residential buildings and a commercial building along NE 2nd Street and three residential buildings along NE Tuscawilla Avenue. A fire department building (noted as being built in the late 1960s) was depicted in the northwest corner of the subject property. The auto body shop to the northwest was no longer depicted and the steam laundry facility building had expanded in size. Also, the alignment for NE 3rd Street had shifted to the south northwest of the property. Conditions on the remaining adjoining properties were similar to the previous maps.

4.2 Aerial Photographs

Aerial photographs of the subject property and surrounding properties were ordered from ERIS. Aerial photographs covering the subject property were identified and reviewed for the years 1940, 1949, 1957, 1964, 1973, 1984, 1988, 1995, 1999, 2005, 2007, 2010, 2013, 2015 and 2017. Aerial photographs often provide information concerning the history of development of a property and surrounding area. Copies of the aerial photographs are provided in Appendix B.

The 1940 aerial photograph depicted smaller buildings within the southern and eastern portions of the subject property. Adjoining properties to the east, west and south were also developed with buildings in this photograph. The adjoining properties to the north appeared to be a park.

The 1949 and 1957 aerial photographs did not depict any notable changes to the subject property other than an area of disturbance in the northwestern portion of the site on the 1949 photograph. Development on adjoining properties was similar to the previous photograph.

The 1964 aerial photograph did not depict any notable changes to the subject property other than an area of disturbance occupied by a number of parked cars in the northwestern portion of the site. Development on adjoining properties was similar to the previous photographs. The alignment for NE 3rd Street shifted to the south, northwest of the subject property.

In addition to the buildings depicted on earlier photographs within the southern and eastern portions of the subject property, the 1973 aerial photograph depicted a building and parking lot in the northwest portion of the property. While the building was depicted in the same location as the current fire station building the configuration was slightly different. Development on adjoining properties to the north and east were similar to earlier photographs. Larger commercial and/or industrial buildings were noted on the adjoining properties to the west and northwest. A reduction in the number of buildings was noted for the adjoining properties to the south.

The 1984 aerial photograph was of poor resolution; however, it appeared that conditions on the subject property and adjoining properties were similar to the previous photograph.

The 1988 aerial photograph clearly depicted the existing fire station building within the northwestern portion of the site. Buildings were also noted in the northeastern, east central and southwestern portions of the property. Development on adjoining properties to the north, south and east were similar to earlier photographs. The larger commercial and/or industrial buildings on the adjoining properties to the west/northwest had expanded in size.

The 1995 though 2017 aerial photographs depicted similar development conditions to the current development of the subject property and adjoining properties; although a notable increase in the density of the tree canopy was observable on the subject property between 1995 and 2015. Also, a clearing of trees and a disturbed area were observable on the east central portion of the property on the 2013 photograph.

5.0 RECORDS REVIEW

The records review section presents information collected from local agencies and sources, followed by information from state and federal sources.

The following local public offices and sources were visited or contacted:

- The City of Ocala Growth Management Department
- The City of Ocala Licenses, Inspections and Code Enforcement Web Site
- The Marion County Property Appraiser

5.1 Local Records

5.1.1 City of Ocala Growth Management Department

The City Ocala Growth Management Department provided an Appraisal Report prepared in July 2015 by Rhodes & Rickolt Professional Association for the subject property. The appraisal included a valuation of the fire station building, a valuation of the entire property as vacant land and a summary of general conditions on the subject property and adjoining properties at the time of inspection. It also identified the property has been under the same ownership (i.e. City of Ocala) for the past five years. According to this report the fire station building was constructed in 1975 and the admiration building was constructed in 1984. Environmental analysis was not conducted as part of the appraisal work and the report did not identify any environmental concerns. Copies of the appraisal report provided by the City are included in Appendix C.

5.1.2 City of Ocala Licenses, Inspections and Code Enforcement Website

The City of Ocala Licenses, Inspections and Code Enforcement Website was visited to obtain copies of building permit records for the subject property. The pertinent permit records were reviewed on the City website. The subject property had a total of 57 permits listed including 23 building permits; 13 electrical permits; 10 HVAC permits; 6 right-of-way permits; 2 gas line permits; 2 tree removal permit and 1 sign permit. The building permits consisted primarily of renovation/repair work as well as several building additions. The building permits also included the demolition of three residential buildings and a commercial building in 2012. Environmental concerns were not identified in connection with any of these permits. A table summarizing the permits for the subject property is included in Appendix D.

5.1.3 Marion County Property Appraiser

The Marion County Property Appraiser website was visited to review ownership, assessment, sales and building information for the subject property. The subject property is

comprised of seven individual tax parcels consisting of 3 acres and is currently owned by the City of Ocala. Environmental concerns were not identified on these property cards. Copies of the 2018 Property Record Cards are included in Appendix E.

5.2 State and Federal Records

An environmental database service company, Environmental Risk Information Services (ERIS), was contracted to provide a site-specific environmental database search report for the subject property and vicinity. The ERIS Report is included as Appendix F and is summarized in the following subsections.

5.2.1 Inactive, Uncontrolled or Abandoned Hazardous Waste Sites

No National Priority List (NPL) Sites or delisted NPL sites were identified on or within a one-mile radius of the subject property.

No Florida Department of Environmental Protection (FDEP) State Hazardous Waste Sites (SHWSs) or tribal HWSs were identified on or within a one-mile radius of the subject property.

The USEPA Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS) database was reviewed, and did not indicate the presence of any CERCLIS sites located on the subject property. However, one CERCLIS site was identified within one-half mile radius of the subject property. The West Florida Natural Gas Company located behind 206 NE 9th Street approximately 0.41-mile north of the subject property is a listed CERCLIS site. This site also appears on the Superfund Enterprise Management System (SEMS), which contains active sites evaluated by the Superfund program that are either proposed to be or are on the National Priorities List (NPL). This site is not on the NPL. Based on the separation distance and its downgradient hydrogeologic position relative to the subject property, this site is not expected to have environmental impacts on the subject property.

No CERCLIS archived sites or CERCLIS No Further Remedial Action Planned (NFRAP) sites were identified on the subject property or within a one-half mile radius of the subject property.

5.2.2 Federal, State and Tribal Listed Brownfield Sites

No Federal or tribal Brownfield sites were identified on the subject property. However, 28 Federal individual Brownfield sites were identified within a half-mile radius of the subject property. Additionally, three State Brownfield areas (ranging in size from 27.45 acres to 1,015 acres) were identified within a half-mile radius of the subject property.

A review of the information provided for the 28 Federal brownfield sites indicated that the majority of the environmental assessment work for these sites included Phase I ESAs with some requiring Phase II ESAs. A review of the information provided in the ERIS report indicates that none of these sites are expected to pose environmental threats to the subject property based on the absence of identified environmental concerns, their separation distance, cross/downgradient hydrogeological position relative to the subject property and/or the current remedial status of these sites.

One of the State brownfield areas, which is depicted on the ERIS Radius Maps, adjoins the subject property to the west and north. This brownfield area identified as BF429801000 – Ocala Area No. 1 encompasses approximately 262 acres within the central portion of the City. This brownfield area was established in a 1998 resolution by the City (Appendix G) under a USEPA Brownfields Pilot Project grant to conduct environmental analysis (i.e. Phase I and II ESAs) for the downtown Community Redevelopment Area. The purpose of this brownfield area was to focus grant resources for the performance of environmental site assessments. Environmental threats to the subject property are not expected from these listings.

5.2.3 Institutional/Engineering Control Sites

The subject property is not listed on the federal or FDEP registry of institutional and/or engineering control sites.

5.2.4 State and Tribal Voluntary Cleanup Sites

No Voluntary Cleanup Plan (VCP) sites were identified on or within a one-half mile radius of the subject property.

5.2.5 Active Solid Waste Sites and State Registered Recycling Facilities

No State or tribal Solid Waste Facilities/Landfill (SWF/LF) sites were identified on the subject property. However six SWF/LF sites were within one-half mile of the subject property. Four of these facilities are identified as a waste tire collection facilities. The closest is located 0.3-miles northwest of the subject property. No environmental impacts to the subject property are anticipated from these SWF/LF facilities.

5.2.6 Hazardous Waste Treatment, Storage and Disposal Facilities

Review of the RCRA Treatment, Storage, and Disposal Facilities (TSDF) Report indicated that no such facilities exist on subject property or within a one-half mile radius of the subject property.

5.2.7 Hazardous Waste Generators

The subject property is not listed on the USEPA Resource Conservation and Recovery Information System (RCRInfo) list of large or small quantity hazardous waste generators. However, UniFirst located at 317 NE 2nd Street which adjoins the subject property to the west is listed as a RCRA small quantity generator with one violation listed. This violation occurred in 1983 and achieved compliance a day after receiving the violation. No environmental impacts to the subject property are anticipated from listing.

The RCRIS Corrective Action Sites (CORRACTS) Database contains additional information on RCRA enforcement actions. The subject property was not identified the CORRACTS database. Additionally, no CORRACTS were identified within a one-mile radius of the subject property.

The Facility Index System/Facility Identification Initiative Program Summary Report (FINDS) provides both facility information and links to State and Federal Databases including: Permit Compliance System (PCS); Aerometric Information Retrieval System (AIRS); USEPA Civil Enforcement Docket (DOCKET); Criminal Docket System (C-DOCKET); Federal Underground Injection Control (FURS); Federal Facilities Information System (FFIS); State Environmental Laws and Statutes (STATE); and PCB Activity Data System (PADS). The subject property is not listed in the FINDS database.

5.2.8 Toxic Waste Generators

Facilities included in the national list of facilities that have notified the United States Environmental Protection Agency (EPA) of Polychlorinated Biphenyl (PCB) activities were reviewed. Any company or person storing, transporting or disposing of PCBs or conducting PCB research and development must notify the EPA and receive an identification number. The subject property is not identified on this PCB database.

The Toxic Release Inventory System (TRIS) contains information on facilities that manufacture, process, or import any of the listed toxic chemicals. The subject property is not is listed on the TRIS database.

The USEPA Section Seven Tracking System (SSTS) tracks the registration of pesticide-producing establishments. No SSTS facilities are located on the subject property.

The Toxic Substance Control Act (TSCA) information is no longer released to the public by the USEPA. No TSCA sites were identified on the subject property.

5.2.9 Petroleum and Chemical Storage Tanks/Facilities

The subject property, as well as several adjoining properties, appeared on the list of facilities and tanks in the Florida Department of Environmental Protection (FDEP) Bureau of Petroleum Storage Systems Storage Tank/Contaminated Facility Search (STCS). The STCS lists facilities that do not currently have active, regulated underground or aboveground storage tanks (USTs or ASTs) containing petroleum. The table below lists the facility name/address; FDEP Facility ID number, tank size, contents, and status for the USTs and AST on the subject property and adjoining properties.

Facility Name/Address	FDEP Facility ID	Tank Size (gallons)	Tank Contents	Status
Subject Property				
Lewis Myers Property; 403 NE 2nd Street	9201174	2 x USTs - Unknown Sizes	Unknown	Removed 1992
Adjoining Properties				
Seminole Stores Inc.; 335 NE Watula Ave.	8518871	1 x 4,000 UST 1 x 10,000 UST 1 x 1,000 UST	Unleaded Gas Leaded Gas Diesel	Removed 1990 Removed 1990 Close In-Place 1990
Sprint Florida; 1311 NE 3rd Ave.	8521841	3x 10,00 UST	Gasoline	Removed 1990
Unifirst Industrial Laundry; 317 NE 2nd St.	9502499	1 x AST Unknown size	Trichloroethylene	Removed 1995
Unifirst Industrial Laundry; 317 NE 2nd St.	8511158	3 x 6,000 USTs	Unleaded Gas Leaded Gas Diesel	Removed 1987

A summary of potential environmental concerns relative to the subject property from these tanks sites is presented below:

- *Subject property* - While the tanks on the subject property have been removed, there was no closure report and/or post removal sampling to document subsurface conditions at the time of closure. Based on the absence of this information there is no way to confirm or deny the presence of contaminated soil/groundwater in the subsurface. A copy of the Storage Tank Registration Form for the subject property, obtained from FDEP's OCULUS database website is included in Appendix H.

- *Seminole Stores* – This site is also listed as a Leaking Storage Tank site. Tank closure and remedial activities were conducted for the tanks at this site. The site received a No Further Action letter from the FDEP on April 30, 2014, therefore; environmental impacts to the subject property from this site are not expected.

- *Sprint Florida* – The 1990 closure report generated for the site indicated that no contamination was discovered in the subsurface surrounding the tanks, therefore; environmental impacts to the subject property from this site are not expected.

- *Unifirst Industrial AST* – No closure documentation was identified for the AST at this facility. However, given its aboveground location leaks or product releases would have been visible. Since the tank was removed from the site environmental impacts to the subject property from this AST are not expected.

- *Unifirst Industrial USTs* – The closure documentation indicated the USTs were located west of the buildings and that 227.8 tons of contaminated soil was removed along with the USTs. No post excavation sample results were provided. However given the fact the tanks were located west of the buildings coupled with the cross gradient hydorgeologic position relative to the subject property the potential for environmental impacts from this site are considered low.

No active UST and/or AST facilities were identified for the subject or adjoining properties.

The list of Tier 2 facilities in the state of Florida tracks the inventory of chemicals within a particular facility. This list is provided by the Florida Division of Emergency Management. Two Tier 2 sites were identified on the adjoining properties. The Unifirst Industrial facility located west of the property is listed as storing lead acid batteries, sodium hydroxide, sulfuric acid and alcohol ethoxylates on the property. Also the City Department of Public Works stores aluminum sulfate in the park facilities to the north. Based on the absence of reported FDEP violations or spills associated with these storage substances, environmental impacts to the subject property are not expected.

No Leaking Storage Tank (LST) sites were identified for the subject property. However, fifty-two (52) sites were identified on properties within a 0.5-mile radius of the subject property. None of these sites are expected to impact the subject property based on the separation distance, current remedial status and/or the hydrogeological position relative to the subject property.

5.2.10 Hazardous Substance and Petroleum Releases

A review of the Emergency Response Notification System (ERNS) by ERIS did not indicate any ERNS sites on the subject property.

The FDEP maintains files on petroleum, and chemical spills in Florida. No spill incidents were listed for the subject property or properties within 0.125 miles of the subject property.

6.0 SITE RECONNAISSANCE AND INTERVIEWS

This section presents general observations identified during the site reconnaissance of the subject property conducted by personnel from GPI on October 9, 2018. Additionally, specific observations

relative to the presence or absence of recognized environmental conditions and/or other areas of potential environmental concerns are provided herein. Lastly, information obtained as a result of interviews is described in this section.

6.1 Site Reconnaissance

6.1.1 Site Visit

The subject property is comprised of seven individual tax parcels. Collectively the parcels comprising the subject property include approximately 3 acres of land. The property contains a 11,903 ft^2 concrete block building utilized as the main fire station building on the northwestern most parcel and a 1,620 ft^2 concrete block building utilized as a City Parks and Recreation administration building on the northeastern most parcel. There are also several smaller (< 300 ft^2) storage sheds, a basketball court and paved parking areas in the northern portion of the property. A pad mounted diesel generator was observed south of the Parks and Recreation building. This generator is reportedly inactive. The southwest portion of the property is currently being utilized as a staging area for construction materials and equipment for a nearby municipal construction project. The materials included: fill dirt; sand; asphalt millings; HDPE, iron and concrete pipe; and fire hydrants and the equipment included: a trench box; temporary chain link fencing; silt socks; jersey barricades; and a trailer with an aboveground storage tank secured on top. The remainder of the property (i.e. southern portion) is comprised of manicured lawn with mature trees. Figures 1 and 2 provide the location and approximate boundaries of the parcels comprising the subject property.

Photographs taken during the site reconnaissance are included in Appendix I.

6.1.2 Pits, Ponds, Lagoons

No pits, ponds or lagoons were observed on the subject property during the site reconnaissance.

6.1.3 Pools of Liquid

No pools of liquid were observed during the site reconnaissance.

6.1.4 Stained Soils and Surfaces

Stained surfaces were noted on the exterior of the diesel generator location outside and south of the Parks and Recreation building. The staining was noted on the south side of the generator, concrete pad and ground surface (~ 6" x 6") adjacent to the pad.

6.1.5 Stressed Vegetation

No stressed vegetation was observed during the site reconnaissance.

6.1.6 Strong or Noxious Odors

No strong or noxious odors were detected during the site reconnaissance.

6.1.7 Drains or Sumps

Several drainage inlets for stormwater were observed in the roadway right-of-ways adjoining the property. Drains and sumps were not observed on the subject property.

6.1.8 Indications of Solid Waste Disposal

The indications of solid waste disposal observed during the site reconnaissance was limited to two solid waste dumpster units labeled as City of Ocala Public Works Solid Waste. No indications of solid waste disposal was noted on the property outside the dumpsters.

6.1.9 Unidentified Substance Containers

One empty and unlabeled 55-gallon drum with puncture damage at the base was observed in the southeast corner of the parking lot for the fire station building during the site reconnaissance. No staining or leakage was observed on or around the drum.

6.1.10 Hazardous Waste, Hazardous Substances, and Hazardous Materials

Hazardous wastes, substances, and/or materials were observed within the fire station building during the site reconnaissance. Examples of these materials included gasoline, oil, paint, a foaming fire suppressant, and cleaning products in containers of 5-gallons or less. Flammables were stored in a flammable locker. No staining or leakage was observed around these containers.

6.1.11 Storage Tanks (UST, AST)

No visible evidence of underground storage tanks was identified on the subject property during the site reconnaissance. However, a trailer mounted aboveground tank of unknown contents that is associated with a nearby municipal construction project was located in the southwestern portion of the property. No staining, leakage or evidence of damage was observed on or around this tank.

6.1.12 Indications of PCBs

Electrical transformers put into service prior to 1980 have been known to contain PCBs in the dielectric fluids. Several pole-mounted electrical transformers were noted on utility poles around the perimeter of the property. Additionally, PCBs may be contained within the florescent light ballast (FLB) capacitors and in the FLB interior potting material of older (pre-1979) florescent lighting fixtures. USEPA regulations require that all FLBs built between July 1, 1978 and July 1, 1998 that do not contain PCBs must be labeled "No PCBs." If they do not contain this label, it must be assumed that they contain PCBs and should be disposed of in accordance with applicable state and federal regulations. Fluorescent light fixtures were noted throughout the facility building interior. No staining or leakage was observed on or around the transformers or light fixtures.

6.1.13 Wastewater Disposal

Wastewater generated on-site is conveyed to the City of Ocala sanitary sewer system.

6.1.14 Lead Based Paint

Based on the age of construction of the fire station building (i.e. 1975) there is the potential that painted surfaces contain lead.

6.1.15 Asbestos Containing Building Materials

Based on the age of construction of the fire station building (i.e. 1975) there is the potential for asbestos to have been used in its construction.

6.2 Interviews

6.2.1 Property Owner/Occupant

The subject property is currently owned by the City of Ocala. Ms. Holly Lang, Fiscal Manager for the City of Ocala Growth Management Department was interviewed during the site reconnaissance. Ms. Lang indicated the property is expected to be redeveloped with a new fire station facility. Ms. Lang said that residential buildings and a small office building located on the southern portion of the property were demolished in 2012. Also, Ms. Lang noted that during the early 1900s, when Lake Tuscawilla was dredged for 5th Street, evidence of dumping (i.e. bottles) were identified. Ms. Lang did not identify any specific environmental concerns for the subject property. Ms. Lang also provided a survey of the subject property which is included in Appendix J.

6.2.2 Adjacent Property Owners/Occupants

Adjacent property owners/occupants were not available for interview during the site reconnaissance.

6.2.3 User Questionnaire

A Phase I ESA user questionnaire was completed by Ms. Holly Lang, Fiscal Manager for the City of Ocala Growth Management Department. A copy of the user questionnaire is included in Appendix K. Ms. Lang identified the City of Ocala as the property owner. Ms. Lang did not identify any environmental concerns with respect to the subject property.

7.0 PHASE I ENVIRONMENTAL SITE ASSESSMENT DATA GAPS

This section identifies the data gaps encountered during the performance of this Phase I ESA. A data gap is defined as a lack of or inability to obtain information required by ASTM E1527-13 despite good faith efforts by the environmental professional to gather such information. Data gaps may result from incompleteness of any activities required by this practice, including but not limited to site reconnaissance, interviews, records review, etc. The data gaps encountered during this Phase I ESA included the following:

- Interviews with historical property owners were not conducted. However, based upon the review of historical information and local, state and federal record sources during the performance of this ESA, sufficient information was available for identifying recognized environmental conditions and other areas of environmental concern.

- The historical use/prior development of the subject property prior to 1895 could not be confirmed. However, based upon the review of available historical information obtained during the performance of this ESA, sufficient information was available for identifying recognized environmental conditions and other areas of environmental concern.

8.0 FINDINGS AND CONCLUSIONS

A Phase I Environmental Site Assessment (ESA) was completed for the former Fire Station No. 1 site (comprised of seven individual tax parcels) located east of NE Watula Avenue and west of NE Tuscawilla Avenue and immediately north and south of NE 2nd Street and NE 3rd Street respectively, in the City of Ocala, Florida. This section provides a summary of the Phase I ESA findings and conclusions relating to recognized environmental conditions.

8.1 Summary of Findings

- The subject property is located east of NE Watula Avenue and west of NE Tuscawilla Avenue and immediately north and south of NE 2nd Street and NE 3rd Street respectively, within the northeastern portion of downtown Ocala. The subject property is comprised of seven individual tax parcels. Collectively the parcels comprising the subject property include approximately 3 acres of land. The subject property is zoned as Government Use for the two northern most parcels and Multi-Family Residential for the remainder of the parcels.

- The property contains a 11,903 ft^2 concrete block building utilized as the main fire station building on the northwestern most parcel and a 1,620 ft^2 concrete block building utilized as a City Parks and Recreation administration building on the northeastern most parcel. There are also several smaller (< 300 ft^2) storage sheds, a basketball court and paved parking areas in the northern portion of the property. The remainder of the property (i.e. southern portion) is comprised manicured lawn with mature trees.

- Land use in the vicinity of the subject property consists of a mixture of governmental, commercial, professional and medical office, and residential uses. Adjoining properties consist of an industrial scale laundry service facility, residential homes, vacant lots and a public park.

- Historical sources dating back to 1895 indicate that the subject property has been developed since at least this time. The southern portion was initially developed for residential purposes from this time until the early 2010s. Residential development appeared along the eastern boundary occurred in the early 1930s and the northwestern portion appears to have been first developed as a fire station building in the late 1960s.

- A review of standard local, state and federal record sources relating to the presence or occurrence of facilities or spill sites involving solid and/or hazardous wastes and petroleum products identified one listing for the subject property and several listings for the adjoining properties. Incidents that present potential environmental concerns for the subject property include the following:

    - *Subject property* - Two USTs of unknown size and contents were removed from the southwest portion of the subject property in 1992. While the tanks on the subject property have been removed, there was no closure report and/or sampling to document post closure subsurface conditions and based on the absence of this information there is no way to confirm or deny the presence of contaminated soil/groundwater in the subsurface. The potential to encounter petroleum contamination in this portion of the site is considered

low based on the absence of reported spills during the demolition of buildings that took place on this portion of the site in 2012.

- *Unifirst Industrial USTs, adjoins subject property to the west* – The closure documentation indicated the USTs were located west of the buildings and that 227.8 tons of contaminated soil was removed along with the USTs. No post excavation sample results were provided. However given the fact the tanks were located west of the buildings coupled with the cross gradient hydrogeological position relative to the subject property the potential for environmental impacts from this site is considered low.

- State and Federal record sources also indicated the presence of a number of off-site facilities and spill sites involving solid/hazardous wastes and petroleum products within the approximate minimum search distances established in ASTM E 1527-13. However, none of these sites is expected to pose a threat to the environmental integrity of the subject property.

- Based on the age of construction of the fire station building (i.e. 1975) there is the potential that painted surfaces contain lead and for asbestos to have been used in its construction.

- Stained surfaces were noted on the exterior of the diesel generator outside to the south of the Parks and Recreation building. The staining was noted on the south side of the generator, concrete pad and ground surface (~ 6" x 6") adjacent to the pad.

8.2 Conclusions

8.2.1 Recognized Environmental Conditions

A Phase I Environmental Site Assessment has been performed in conformance with the scope and limitations of ASTM Practice E 1527-13 for the subject property identified as the former Fire Station No. 1 site (comprised of seven individual tax parcels) located east of NE Watula Avenue and west of NE Tuscawilla Avenue and immediately north and south of NE 2nd Street and NE 3rd Street respectively, City of Ocala, Florida. This assessment has identified recognized environmental conditions (RECs) in connection with the subject property. These RECs include:

- The presence or occurrence of facilities or spill sites involving solid and/or hazardous wastes and petroleum products reported for the subject property and the adjoining property to the west may have resulted in contaminant impacts to the subject property. These sites whose potential impacts are summarized in Section 8.1 above include:

- *Subject property* - Two USTs of unknown size and contents were removed from the southwest portion of the subject property in 1992. While the tanks on the subject property have been removed, there was no closure report and/or sampling to document post closure subsurface conditions and based on the absence of this information there is no way to confirm or deny the presence of contaminated soil/groundwater in the subsurface. The potential to encounter petroleum contamination in this portion of the site is considered low based on the absence of reported spills during the demolition of buildings that took place on this portion of the site in 2012.

- *Unifirst Industrial USTs, adjoins subject property to the west* – The closure documentation indicated the USTs were located west of the buildings and that 227.8 tons of contaminated soil was removed along with the USTs. No post excavation sample results were provided. However given the fact the tanks were located west of the buildings coupled with the cross gradient hydrogeological position relative to the subject property the potential for environmental impacts from this site is considered low.

- Stained surfaces were noted on the exterior of the diesel generator outside the Parks and Recreation building to the south. The staining was noted on the south side of the generator, concrete pad and ground surface (~ 6" x 6") adjacent to the pad.

Site investigation activities would be necessary to confirm or deny contaminant impacts associated with these RECs.

8.2.2 Potential Environmental Concerns

This assessment has revealed potential environmental concerns for the subject property. This potential environmental concern does not meet the ASTM 1527-13 definition of a recognized environmental condition (see Section 1.0), but may represent a potential concern for the development and/or resale of the subject property. Based on the age of construction of the fire station building there is the potential for asbestos and lead paint to have been used in its construction.

Additionally, PCBs may be present within the florescent light ballast (FLB) capacitors and in the FLB interior potting material of older (pre-1979) florescent lighting fixtures. Fluorescent light fixtures were noted throughout the facility building interior. It is recommended that an experienced contractor perform an evaluation and if necessary, a lighting retrofit for any ballasts potentially containing PCBs within planned renovation areas. Ballasts should be disposed of in accordance with applicable State and Federal regulations.

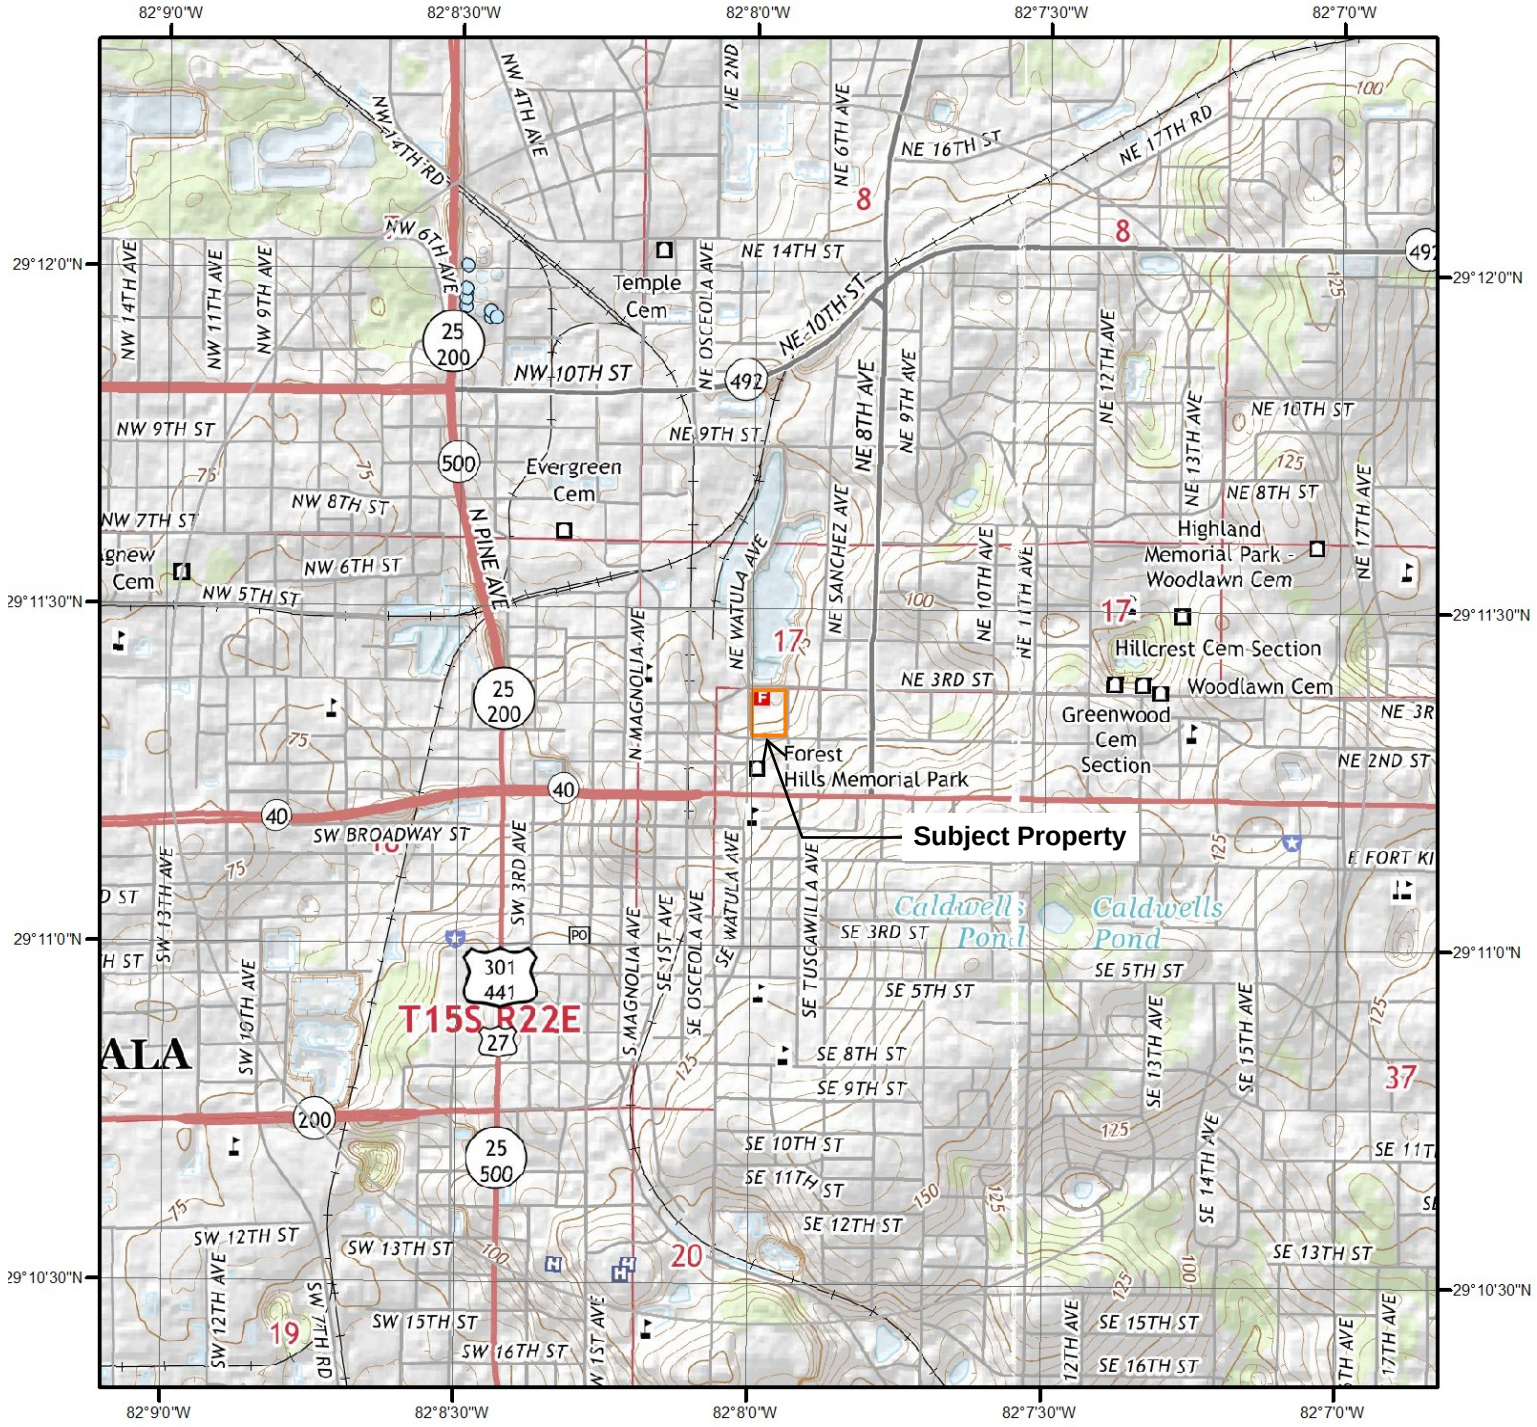

9.0 LIMITATIONS

The conclusions presented in this report are based on information gathered in accordance with the Scope of Services defined in Section 2.0 of the report using generally accepted professional consulting principles and practices. All conclusions reflect observable conditions existing at the time of the site inspection. Information provided by outside sources (individuals, agencies, laboratories, etc.), as cited herein, was used in the assessment of the site. The accuracy of the conclusions drawn from this assessment is, therefore, dependent upon the accuracy of information provided by these sources. Furthermore, GPI is not responsible for the impacts of any changes in environmental standards, practices, or regulations subsequent to the performance of services.

This report is based upon the application of scientific principles and professional judgment to certain facts with resultant subjective interpretations. Professional judgments expressed herein are based upon the facts currently available within the limits of the existing data, scope of services, budget, and schedule. To the extent that more definitive conclusions are desired by the Client than are warranted by the current available facts, it is specifically GPI's intent that the conclusions and recommendations stated herein will be intended as guidance and not necessarily a firm course of action except where explicitly stated as such. GPI makes no warranties, expressed or implied including without limitation, warranties as to merchantability or fitness of a particular purpose. Furthermore, the information provided in this report is not to be construed as legal advice.

This assessment and report have been completed and prepared on behalf of and for the exclusive use of the City of Ocala. Any reliance on this report by a third party is at such party's sole risk. Furthermore, nothing contained in this report shall be construed as a warranty or affirmation by GPI that the subject property described in this report are suitable collateral for any loan or that acquisition of such property by any lender through foreclosure proceedings or otherwise will pose no risk of potential environmental liability on the part of such lender.

Ocala, Florida 34471

Re: Ocala Rescue Fire Station #1 Property; 235 NE Watula Avenue, Ocala, Marion County, Florida

Mr. Switt:

As requested, I have prepared an appraisal presented within an Appraisal Report for the subject property identified as the Ocala Rescue Fire Station #1 property located at 235 NE Watula Avenue in Ocala, Marion, County, Florida. Specifically, the subject includes the fire station building, former administration building as well as various site improvements situated on a 3.01-acre site. At the request of the client, this appraisal includes valuation of the fire station building situated on 1.07 acres, and valuation of the entire property as vacant land.

This appraisal report includes detailed studies of relevant factual data necessary to arrive at the market value estimates of the fee simple intertest of the subject property as of the effective date of valuation. The subject was most recently inspected and photographed on July 3, 2017, the effective date of valuation.

This appraisal complies with the reporting requirements of the Uniform Standards of Professional Appraisal Practice (USPAP) of the Appraisal Standards Board of the Appraisal Foundation, FIRREA, and the Appraisal Institute. The market value estimates presented herein are subject to the Certification of Value and Statement of Assumptions and Limiting Conditions as noted on pages 5 and 6 as well as any noted below.

Extraordinary Assumptions/Hypothetical Conditions

Valuation of the subject property as vacant land employs a Hypothetical Condition that the existing improvements have been removed from the property. This hypothetical condition can impact the value conclusion.

Based upon the market analyses presented within this appraisal report as well as the investigations and studies, it is my opinion that the market values of the fee simple interest of the subject property as of July 3, 2017, were:

ESTIMATE OF MARKET VALUE **Fire Station Building, As Is**	**$480,000**
ESTIMATE OF MARKET VALUE **Total Site, As Vacant**	**$460,000**

The following report presents all the relevant factual data that resulted in the estimates of market value for the subject property.

Respectfully submitted,

Rhodes & Rickolt, P.A.

Thomas E. Rhodes, MAI, SRA, AI-GRS
State-Certified General Appraiser License No. RZ527

CERTIFICATION OF VALUE

I certify that, to the best of my knowledge and belief:

- The statements of fact contained in this report are true and correct.
- The reported analyses, opinions, and conclusions are limited only by the reported assumptions and limiting conditions and is my personal, impartial, and unbiased professional analyses, opinions, and conclusions.
- I have no present or prospective interest in the property that is the subject of this report and no personal interest with respect to the parties involved.
- I have performed no services, as an appraiser or in no other capacity, regarding the property that is the subject of this report within the three-year period immediately preceding acceptance of this assignment.
- I have no bias with respect to the property that is the subject of this report or to the parties involved with this assignment.
- My engagement in this assignment was not contingent upon developing or reporting predetermined results.
- My compensation for completing this assignment is not contingent upon the development or reporting of a predetermined value or direction in value that favors the cause of the client, the amount of the value opinion, the attainment of a stipulated result, or the occurrence of a subsequent event directly related to the intended use of this appraisal.
- My analyses, opinions, and conclusions were developed, and this report has been prepared, in conformity with the *Uniform Standards of Professional Appraisal Practice*.
- I have made a personal inspection of the property that is the subject of this report.
- No one provided significant real property appraisal assistance to the person signing this certification.
- The reported analyses, opinions, and conclusions were developed, and this report has been prepared, in conformity with the Code of Professional Ethics and Standards of Professional Appraisal Practice of the Appraisal Institute.
- The use of this report is subject to the requirements of the Appraisal Institute relating to review by its duly authorized representatives.
- As of the date of this report, I have completed the continuing education program for Designated Members of the Appraisal Institute.

DATE: July 17, 2017

PROFESSIONAL ASSOCIATION

ASSUMPTIONS & LIMITING CONDITIONS

The value estimates that result from the analyses, opinions, and conclusions of this appraisal report are subject to the following assumptions and limiting conditions:

1. The contents of this appraisal report are confidential and no one other than the client will use or rely upon this report or a copy thereof, in whole or in part, including conclusions as to the property value, the identity of the appraiser, professional designations, reference to any professional appraisal organizations, or the firm with which we are connected, for any purposes. Exceptions to this include a third party as specified in writing by the client. The expressed written consent of the appraiser must be obtained by all other parties before the representations of the appraisal report, expressed or implied, will inure to the benefit of the third party.

2. Information, opinions, and estimates provided by sources other than the undersigned that are included within this report are believed to be reliable and accurate. However, we assume no responsibility or liability for inaccurate representations made by others.

3. The content of this appraisal report is to be utilized in total with no portions or fractions thereof being used separately or taken out of context. Redistribution of this report in any other form than in total could be misleading to the reader and misrepresent the conclusions of value presented within the report. We assume no liability for such actions by others.

4. The value conclusions presented within this report are contingent upon competent management of the subject property and business. Knowledgeable management of the property is critical to the success of the operation; it is therefore assumed to be an extension of the highest and best use of the property.

5. No opinion within this report is intended to be expressed for legal matters or that which would require specialized investigation or knowledge beyond that ordinarily employed by real estate appraisers; although, such matters may be discussed within the report.

6. We have rendered no opinion of title. Data on ownership and the legal description were obtained from sources generally considered reliable. Title is assumed to be marketable and free and clear of all liens and encumbrances, easements, and restrictions except those specifically discussed within the report.

7. The value findings of this appraisal are contingent upon the conclusions of a qualified survey of the subject property in terms of size, dimensions of the land and/or improvements, and the location of those on-site improvements. Significant differences between the survey and the representations made by the client and reported herein may result in the need for reevaluation of the appraisal process as it relates to the subject. Any sketches of the subject property (land and/or improvements) presented within the report are for visualization purposes only.

8. Although the flood hazard status for the subject property has been stated within the report, it is recommended that more in-depth information be obtained prior to development upon the sites.

9. We assume no responsibility for hidden or unapparent conditions of the property, soil structure, or improvements that would impact the value of the subject. It is incumbent upon the owner of the subject to employ experts for appropriate testing (soil borings, hydrology, seismographic) if such conditions exist. No opinion is expressed as to the value of subsurface oil, gas, or mineral rights and the properties are not subject to surface entry for the exploration or removal of such materials except as it is expressly stated.

10. Unless otherwise stated in this report, the existence of hazardous substances, including without limitation asbestos, polychlorinated biphenyls, petroleum leakage, or agricultural chemicals, that may or may not be present on the property, or other environmental conditions, was not called to the attention of nor did we become aware of such during the property inspection. We have no knowledge of the existence of such materials on or in the property unless otherwise stated. We are, however, not qualified to test such substances or conditions. If the presence of such substances, such as asbestos, urea formaldehyde, foam insulation, radon gas, or other hazardous substances or environmental conditions, may affect the value of the property, the values estimated are predicated on the assumption that there is no such condition on or in the property or in such proximity thereto that it would cause a loss in value. No responsibility is assumed for any such conditions, or for any expertise or engineering knowledge required

to discover them. The client is urged to retain an expert in the field of environmental impacts upon real estate if so desired.

11. The conclusions presented within this report are warranted as accurate representations of value, subject to the Certification of Value and Statement of Assumptions and Limiting Conditions specified herein, as of the effective date of valuation. We assume no responsibility for economic or physical factors occurring at some later date that may affect the opinions of value herein stated.

12. The conclusions of value presented within the report are opinions and estimates of the appraisers. There is no guarantee, written or implied, that the subject property will sell for the precise estimates of value contained herein.

13. Forecasted projections presented within this report are utilized to assist in the valuation process and are based on current market conditions, anticipated short term supply and demand factors, and a continued stable economy. Therefore, the projections are subject to changes in future conditions that cannot be accurately predicted by the appraisers and could affect the future income or value projections.

14. If this appraisal is to be used for mortgage loan purposes, the applicable lending procedures must be consistent with acceptable lending practices as promulgated by the Office of the Comptroller of the Currency (OCC), the Federal Deposit Insurance Corporation, and the Savings Association Insurance Fund (formerly the Federal Savings and Loan Insurance Corporation). We assume no liability for a loss in value applicable to the subject, or its proposed development, that occurs as a result of lending practices that vary from generally accepted mortgage underwriting guidelines as established by institutions such as the OCC, FDIC and the SAIF, or when the loan proceeds are diverted to other parties, uses or properties.

15. Expert witness testimony or attendance in court or at any other hearing by Thomas E. Rhodes, MAI, SRA is not required by reason of rendering this appraisal unless such arrangements are made a reasonable time in advance.

16. Disclosure of the contents of the appraisal report is governed by the bylaws and regulations of the Appraisal Institute.

17. This appraisal report, including the format style, spreadsheet data and addenda, is the property of the appraisal firm of **Rhodes & Rickolt, P.A.** and no portion of the report is to be reproduced without the expressed written permission of **Rhodes & Rickolt, P.A.**

18. The value conclusions of this report are subject to these assumptions and limiting conditions as well as others stated or implied within the report.

Extraordinary Assumptions/Hypothetical Conditions

Valuation of the subject property as vacant land employs a Hypothetical Condition that the existing improvements have been removed from the property. This hypothetical condition can impact the value conclusion.

IDENTIFICATION OF SUBJECT PROPERTY

The subject property of this appraisal is identified as the Ocala Rescue Fire Station #1 property located at 235 NE Watula Avenue in Ocala, Marion, County, Florida. Specifically, the subject includes the fire station building, former administration building as well as various site improvements situated on a 3.01-acre site. At the request of the client, this appraisal includes valuation of the fire station building situated on 1.07 acres, and valuation of the entire property as vacant land.

APPRAISAL DATES

The effective dates of this appraisal are noted below.

Date of Inspection: July 3, 2017

Date of Valuation: July 3, 2017

Date of Report: July 17, 2017

OBJECTIVE AND INTENDED USE OF APPRAISAL

The objective of this appraisal is to estimate the market values of the subject property identified herein as of the effective date of the appraisal. According to the client, the intended use of the appraisal is for internal purposes.

SCOPE OF WORK

Joseph Switt, Real Estate Coordinator with the City of Ocala, the client and intended user of this appraisal, has employed **Rhodes & Rickolt, P.A.** to appraise the subject property identified herein for internal purposes.

This is an **Appraisal Report** as defined by the Uniform Standards of Professional Appraisal Practice under Standards Rule 2-2. This format provides summary descriptions of the appraisal process, subject property, market data, and valuation analyses.

The appraisal problem herein is to estimate the defined market values of the fee simple interest of the subject property as of the effective date.

All appraisals begin by identifying the appraisal problem. Data concerning the subject property is determined from various sources including, but not limited to, the property owner, various governmental agencies, surveys and building plans, and engineering studies/reports. When possible, more than one source is utilized to confirm data, and within the report the source is identified. Should plans or a building sketch be available, the measurements are confirmed for accuracy. Land size is based on surveys, public records, and/or recorded plats. Descriptions of improvements are based on visual inspection and/or plans. The age of the improvements is based on public records or discussions with knowledgeable parties.

For valuation purposes, the approaches to value include the Cost Approach, Sales Comparison Approach, and the Income Capitalization Approach. For each assignment, all approaches to value are considered. However, depending on the property being appraised not all approaches are applicable. Comparable sales and rentals are inspected by the appraiser and the sale prices are confirmed with a party to the transaction (buyer, seller, real estate Broker, or closing attorney), or through public records.

Research of comparable sales and rentals include, but are not limited to, the following data sources:

- Multiple Listing Services
- Marion County Property Appraiser
- CoStar Comps
- Newspaper articles
- Loopnet.com
- Local Brokers/Property Managers
- Appraisal peers

The scope of work applicable to this appraisal assignment includes physical inspection of the subject property and the surrounding influences of the neighborhood; determine the highest and best use of the subject, as vacant and as improved; research the market for sales and rentals of older commercial/industrial buildings as well as commercial land sales for comparison to the subject; analyze the market data as it relates to the subject making appropriate adjustments to the sale prices and rental rates, as needed; conclude the market values of the subject property as of the effective date from the range of value indicators; and finally, prepare an Appraisal Report that summarizes the analyses and conclusions of the appraiser.

The market identified for analysis purposes and conclusion of value herein includes the current and competitive open market using sales of older commercial/industrial buildings and vacant commercial land sales. Due to the highly subjective nature of cost and depreciation estimates, as well as the irrelevance of this approach in the current market, the Cost Approach is not presented herein. As well, leases of older commercial and industrial buildings considered similar to the subject were not found as most leased properties are in operational condition. As a result, the Income Capitalization Approach is not presented herein. Valuation of the subject property will include only the Sales Comparison Approach for both valuation scenarios. This approach to value is considered sufficient to develop credible assignment results in solving the appraisal problem.

The value conclusion presented herein **excludes** the value of personal property including furnishings, fixtures, and equipment (F, F & E) as well as business inventory. As well, the valuation process excludes goodwill of the business, intangible and/or business enterprise value. The conclusion of value is limited strictly to real estate; that is, land and improvements that are identified within this report.

The scope of work for this assignment has been described above and is considered acceptable for this appraisal assignment.

PROPERTY RIGHTS APPRAISED

The value conclusions presented herein acknowledge the fee simple interest of the subject property.

Fee Simple Interest

Fee simple interest is defined as absolute ownership unencumbered by any other interest or estate, subject only to the limitations imposed by the governmental powers of taxation, eminent domain, police power, and escheat.

MARKET VALUE DEFINITION

The following definition was compiled from ***The Uniform Standards of Professional Appraisal Practice, (USPAP), 2016-2017 Edition*** as promulgated by ***Title XI, of the Financial Institutions Reform, Recovery, and Enforcement Act, of 1989 (FIRREA, 12 CFR 34, subpart C-Appraisals 34.42 (g).***

Market value is defined as the most probable price which a property should bring in a competitive and open market under all conditions requisite to a fair sale, the buyer and seller each acting prudently and knowledgeably, and assuming the price is not affected by undue stimulus. Implicit in this definition is the consummation of a sale as of a specified date and passing of title from seller to buyer under conditions whereby:

- buyer and seller are typically motivated;
- both parties are well informed or well advised, and acting in what they consider their best interests;
- a reasonable time is allowed for exposure in the open market;
- payment is made in terms of cash in United States dollars or in terms of financial arrangements comparable thereto; and,
- the price represents normal consideration for the property sold unaffected by special or creative financing or sales concessions granted by anyone associated with the sale.

Market Value, Fire Station Building, As Is: Value of the fire station building and land area (Parcel # 2820-050-001) as it existed on July 3, 2017, based on the highest and best use for some form of commercial use.

Market Value, Total Site, As Vacant: Value of the entire subject parcel (3.01 acres) as a vacant site as of July 3, 2017, employing a hypothetical condition that the subject is a vacant site.

Exposure & Marketing Time

The following definitions were compiled from ***The Uniform Standards of Professional Appraisal Practice, (USPAP), 2016-2017 Edition.***

- **Exposure Time** is the estimated length of time the property interests appraised would have been offered on the market prior to the hypothetical consummation of a sale at market value upon the effective date of the appraisal.
- **Marketing Time** is the time it takes an interest in real property to sell on the market subsequent to the date of an appraisal.

Both estimates of time are theoretical in nature as *exposure time* is always presumed to precede the effective date of appraisal while *marketing time* occurs after the effective date of the appraisal.

The exposure and marketing time for the subject is considered similar as there has been no measurable or foreseeable change in market conditions that would necessitate differentiation between the two. Based on the sales presented within this report as well as acknowledging the current economy and office market in Ocala/Marion County, the projected exposure and marketing time for the subject property is estimated at **12 to 24 months**.

LEGAL DESCRIPTION

The legal description of the subject property is noted in the Addenda of this report.

PROPERTY OWNERSHIP

As of the date of the appraisal, ownership of the subject property is identified as:

City of Ocala
c/o Real Estate Division
1805 NE 30th Avenue, Bldg. 300
Ocala, Florida 92018

OWNERSHIP HISTORY

The subject had been in the same ownership for at least the past five years. It is not listed for sale, leased, or under contract for purchase.

PROPERTY ASSESSMENT

The subject property is included in the 2016 Marion County Property Assessment Roll within seven parcels as noted on the following page. Because the property is owned by a municipality, taxes are not applicable.

2017 PROPERTY ASSESSMENT INFORMATION				
Parcel ID	**Parcel No.**	**Just Value**	**Taxable Value**	**2016 Taxes**

Total:		**$892,697**	**$892,697**	**$0**

ZONING/LAND USE CLASSIFICATIONS

Per the City of Ocala Land Development Code and Comprehensive Land Use Plan, the subject property includes the following classifications:

Zoning

GU, Governmental (Northerly Portion) - The government (G-U) district is intended to apply to those areas where the uses conducted are those primarily of national, state, county or city governments. Areas classified G-U are shown on the official zoning map, but no column for G-U use restrictions is shown in division 2 of this article, since any lawful government use or related use, including commercial and industrial development at the Ocala International Airport, can be carried on in a G-U district. However, any governmental use or related use shall be compatible with surrounding uses.

R-3, Multi-Family Residential (Southern Portion) - The multi-family residential (R-3) district is intended to be a multi-family area, including higher residential densities in accordance with the comprehensive plan. This district shall allow single-family, two-family and multi-family dwellings, residence-offices and residence-galleries. Professional and business offices that are of compatible scale and intensity may be allowed as special exceptions by the board of adjustment.

Future Land Use

High Intensity/Central Core - The intent of this designation is to identify the area suitable for the most intense residential and non-residential development within the City, generally represented as “High Intensity” on the Ocala 2035 Vision. It is anticipated to provide a broad mix of residential, retail, office, governmental, cultural, and entertainment activities that allow residents to live, work, shop, and play within the same area. Specialty shops, restaurants, and residential development shall line the streets, creating a unique environment distinct from suburban retail centers. The High Intensity/Central Core is located in the central area of the City as depicted on the 2035 Future Land Use Map and includes the historic downtown square, central business

district, municipal administration buildings, North Magnolia Community Redevelopment Area, and the hospital district. This intense mix is intended to promote a compact and walkable urban form that supports multi-modal transportation, including bicycles and transit.

The High Intensity/Central Core category facilitates developments with a variety of uses. Permitted uses include residential, office, commercial, public, recreation, educational facilities and institutional. Light industrial shall only be allowable in designated locations as specified in the Land Development Code and must meet the intent of the High Intensity/Central Core category, including form and design guidelines as applicable.

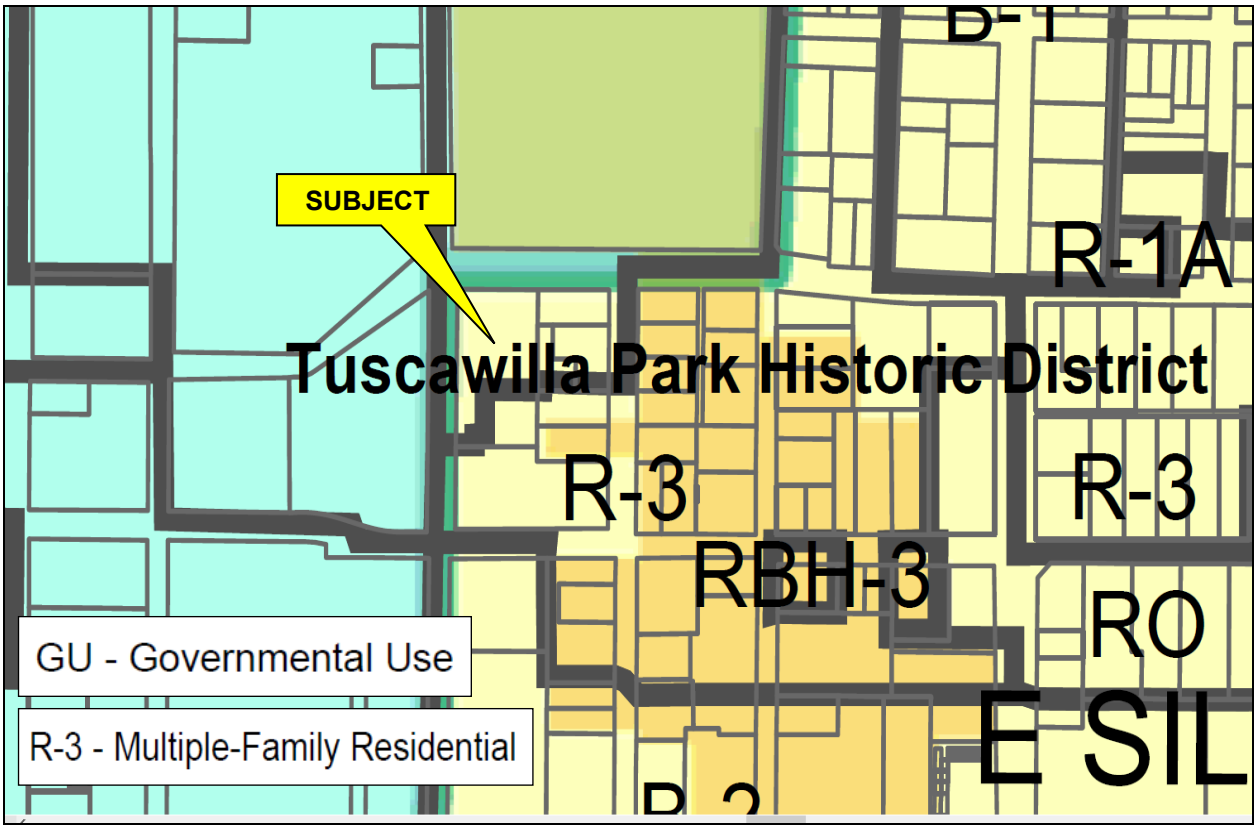

The form of buildings and development shall be regulated by a Form Based Code. Buildings shall have small setbacks from the street and may have zero setback from the public right-of-way, provided that wide pedestrian sidewalks and pathways are established between the street and buildings, as depicted in Figure A. Architectural styles that are complementary to historic buildings are encouraged. Wide sidewalks, pocket parks, plazas, and civic areas shall be provided to encourage pedestrian activity. Shade for pedestrians should be provided through landscaping or building design components, such as balconies, arcades, awnings, and canopies. Parking occurs on-street or in structured parking lots, as depicted in Figure B. Surface parking may be permitted on a case-by-case basis.

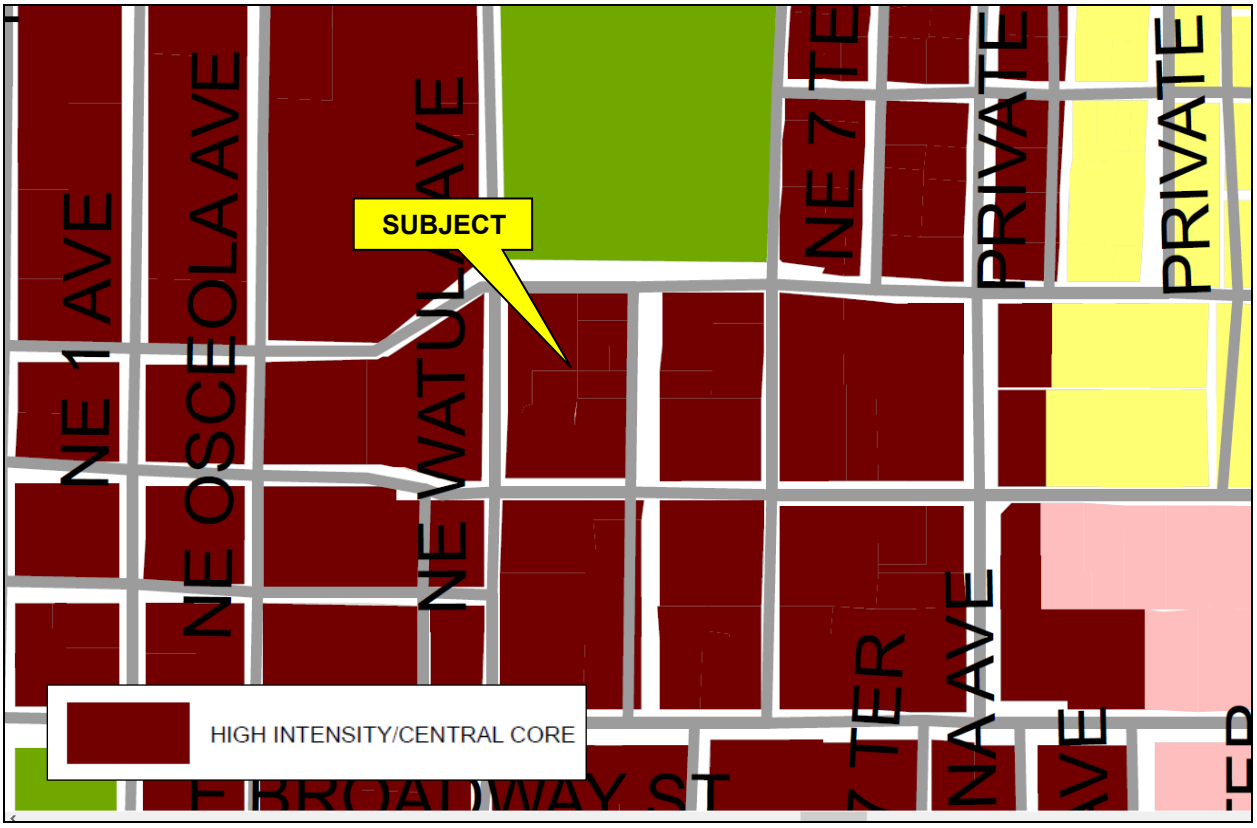

The minimum density and intensity before any incentives in this future land use category is 12 dwelling units per gross acre or 0.20 FAR. The maximum density and intensity before any incentives is 60 dwelling units per acre or 8.0 FAR. The location and application of incentives shall be set forth in the Land Development Code.

Increased density and intensity incentives may be approved for inclusion of workforce housing, green building and sustainable design standards, setting aside right-of-way for trails, employment-generating uses, exemplary urban

Some form of mixed-use development comprising commercial and residential uses is allowable within these classifications.

NEIGHBORHOOD DESCRIPTION

The neighborhood that impacts the highest and best use of the subject property is most appropriately defined as downtown Ocala. This neighborhood extends from SW 10th Street, the south boundary, to about NE 7th Place, the north boundary. The east boundary is E. 3rd Avenue and the west boundary is Pine Avenue (US Hwys 27/301/441).

Silver Springs Boulevard (SR 40) is a four-lane state highway that extends in an east/west direction through the middle of the downtown area connecting east Ocala to US Hwys 27/301/441 and I-75 to the west. Magnolia Avenue and E. 1st Avenue both provide the primary north/south access within the neighborhood. The neighborhood is also well served by a network of interior paved streets that connect to other areas of Ocala.

The subject neighborhood comprises a variety of land use including governmental, commercial, professional and medical office, and residential. The majority of improvements within the defined neighborhood consist of older buildings, many of which have undergone extensive renovations in recent years. This revitalization has increased the occupancy and rental rates of the buildings and has attracted new tenants to the downtown area. One such project is a residential condo development that was recently completed two blocks east of the square. 302 Broadway was renovated from the former Sprint Telephone building, and is a 3-story building that offers (18) loft-style condos with nine sold within the last 12 months.

The revitalization of historic downtown Ocala began in the early 1990's and has included the renovation of many downtown buildings as well as new sidewalks, park benches, light posts and fixtures, planters, trash receptacles, and landscaping. The focal point of this revitalization is the downtown square. Renovated in 1998, the square now hosts an open-air meeting area with park benches and historic gazebo, decorative lighting, and extensive landscaping. The City has played a pivotal role in the revitalization process by scheduling a variety of festivals and events for the downtown area that has resulted in increased pedestrian traffic for the business concerns located near the square. As a result, new businesses have opened including restaurants and a variety of retail shops. The recent demolition of the Chamber of Commerce building (facing the square) is part of the City's commitment for further downtown development to include retail shops, offices, and residential condo construction. A hotel is planned for that parcel.

The commercial uses of the area include both professional offices and retail properties. The retail properties provide the majority of traffic for the downtown area, and include frame and craft shops, bookstores, hair and nail salons, antique stores, restaurants, and taverns. Competing restaurants/bars within the downtown area include Sushi Bistro, Harry's Grill & Bar, Pi on Broadway, Feta, Brick City Barbeque, Mark's Prime Steakhouse, La Cuisine, Magnolia Bakery, and others. The professional offices are predominately multi-tenant properties occupied by law firms and related concerns that benefit from proximity to the Marion County Judicial Center, Courthouse, and Federal Building.

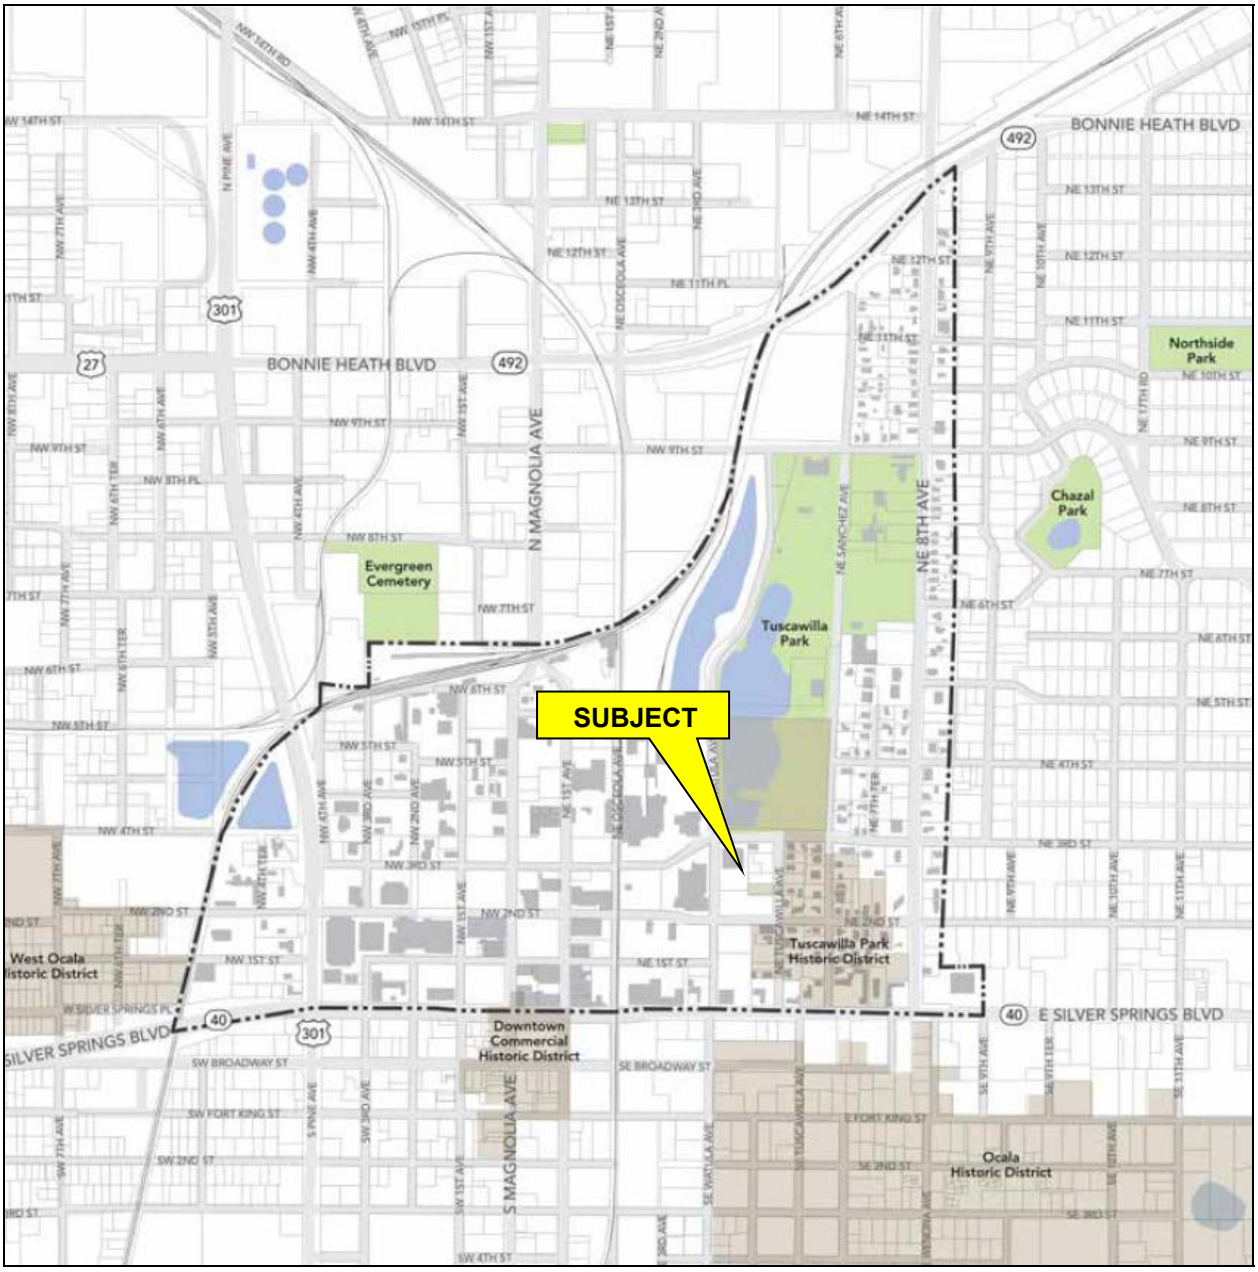

The downtown area had been a haven for banking headquarters with Bank of America, SunTrust, CenterState Bank, Wells Fargo, Compass, and Heritage Banks having their main offices on or near the square. However, Bank of America and Heritage Bank (now Renasant) have closed their offices and moved to smaller branch locations. Wells Fargo is in the process of doing the same. That leaves SunTrust, CenterState, and Compass with a downtown presence; but due to recent changes in the banking industry, those facilities are probably short-lived.

The governmental uses of the neighborhood include Ocala City Hall and various ancillary departments occupying freestanding buildings nearby. They comprise Planning & Zoning, Electric Utilities, Survey and Fleet Parking, Maintenance, Mortgage Dept., Credit Union, Chamber of Commerce, auxiliary water/sewer plant, and Engineering. Citizen's Circle is a common area in front of City Hall that has a water feature for kids and serves as a concert venue. As well, the Historic Marion Theater is located just off the square and provides first run movies in a restored art deco theater from the 1950's.

The one drawback to the downtown area has been the historical lack of parking. This has been somewhat relieved by the recent completion of a 3½-story parking garage located one block east of the square that offers 402 spaces. Even so, those properties that provide on-site parking have an advantage and are typically able to command higher sale prices and rental rates.

The revitalization of downtown Ocala has sparked greater demand for retail commercial and office use in the area. The lack of vacant land for development purposes within the downtown area has placed a premium on existing structures, and renovation of older properties will continue to lead this market sector. As a result, the building renovations have generated higher sale prices, increased occupancy, and positive rental rates in recent years. This is evidenced by current and recent renovations including the former Downtown Pawn building, the former Ayres Cluster law office, the former Melting Pot restaurant, Sushi Bistro, La Cuisine, Enve hair salon, and others. New development includes a Starbuck's retail plaza west of the square on S. Pine Avenue as well as a proposed Racetrac to be located at the intersection of W. Silver Springs Blvd. and S. Pine Avenue. Overall, the downtown area has seen increased shopping in recent years and has established itself as a competitive market for Ocala.

Neighborhood Map

SITE DESCRIPTION

General Information

The subject site comprises 3.01 acres fronting the south side of NE 3rd Street in downtown Ocala, Marion County, Florida. The following discussion highlights the factual descriptions of the subject site.

Total Size

130,900 SF; 3.01 AC; this estimate of size is based on information provided by the Marion County Property Appraiser website

Fire Station site includes 46,590 SF, or 1.07 AC

Road Frontage/Improvements

307 FF along the south side of NE 3rd Street; 428 FF along the east side of NE Watula Avenue; 307 FF along the north side of NE 2nd Street; and, 428 FF along the west side of NE Tuscawilla Avenue; all roads are two-lane city streets with curbing, gutters, and sidewalks, overhead electric service, street lights, and underground drainage

Shape/Dimensions

Rectangular; approximately 307' along the north and south boundaries, and about 428' along the east and west boundaries

Topography/Vegetation

Downtown parcel comprising an entire city block; southerly portion is improved with the fire station and former administration buildings and parking areas; sloping terrain with the highest elevations noted along the south boundary at 73' above mean sea level (MSL); lowest elevations located along the south boundary at 68' above MSL

Flood Zone

The subject site is in Zone X, an area of minimal flood hazard, outside the 100-year flood plan; Panel #12083C0509E; Flood Insurance Rate Map; dated 4/19/2017 (see FEMA Flood Map on page 32)

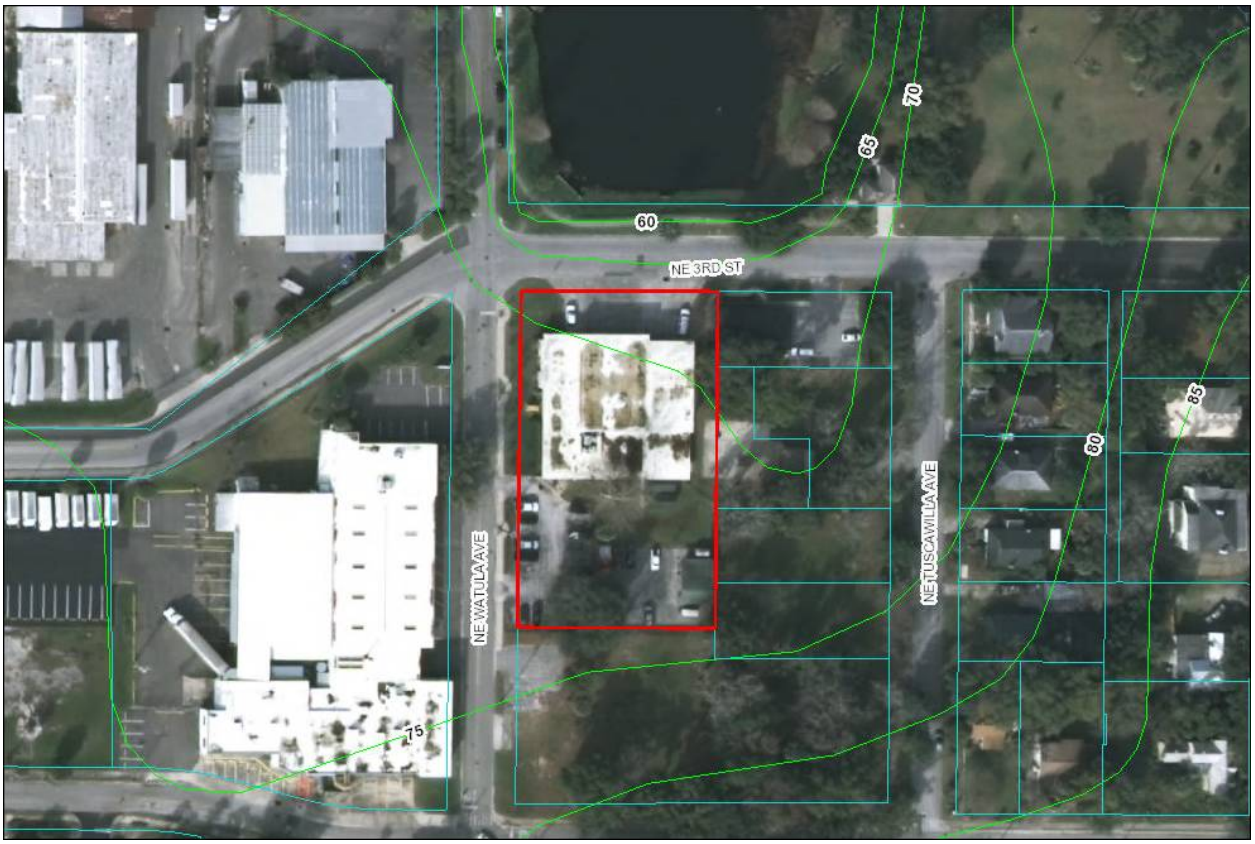

Easements and Encroachments

None noted

Adjacent Land Uses

North: Tuscawilla Park
South: Church facility
East: Residences
West: UniFirst industrial facility

Aerial/Topo Map

FEMA Flood Map

IMPROVEMENTS DESCRIPTION

The subject is improved with the Ocala Rescue Fire Station #1 located at 235 NE Watula Avenue and the former administration building located at 410 NE 3rd Street in Ocala, Florida. The buildings and adjacent parking areas are located in the northern portion of the site with the southern portion being vacant.

Fire Station Building

The station building comprises 11,903 SF divided between 5,261 SF of finished living space and administrative areas and 6,642 SF of open vehicle storage bays. The building was built in 1975, and is in fair condition.

The modern-style building includes masonry construction with CB and CBS exterior walls with brick veneer accents, flat roof with composite covering, slab floor system, aluminum awning windows, (3) overhead bay doors along the front elevation, and glass and metal secondary doors elsewhere.

The **living space** is divided into a kitchen, living room (TV room), bathroom facility with adjacent locker room, bunkroom, and full bathroom (shared with training area). Interior refinements throughout include carpet, ceramic tile, terrazzo, and vinyl tile flooring, painted drywall walls, suspended acoustic tile ceilings, and fluorescent lighting. The kitchen includes a gas stove/oven with fan hood, (3) refrigerators, and Formica base and wall cabinetry. The bathroom facility has (4) lavatories, (2) toilets, (2) shower stalls, and (2) urinals while the locker room has (30) metal lockers. The bunkroom includes (3) bunkbeds and (20) single beds. The full bathroom has a lavatory, toilet, and shower stall.

The training area is located adjacent to the living space and is divided into (2) offices, conference room, bathroom (shared with bunkroom), and bedroom. Interior refinements include carpet, ceramic tile, and vinyl tile flooring, painted drywall walls, suspended acoustic tile ceilings, and fluorescent lighting.

The **administrative area** is located in the western portion of the building and is divided into the Battalion Chief's office, bathroom, and bunk room, and Captain's office, (1) private office, conference room, storage room, and half bath. Interior refinements throughout include carpet, ceramic tile, and vinyl tile flooring, painted drywall and paneled walls, suspended acoustic tile ceilings, and fluorescent lighting. The Battalion Chief's bathroom has a lavatory, toilet, and shower stall while the half bath includes a toilet and lavatory.

The **vehicle storage bays** are located in the northern portion of the building facing NE 3rd Street. It is divided into (2) bays with the larger bay including (2) overhead doors used for fire truck and ambulance storage. The smaller bay has (1) overhead door used for the Special Ops/Rescue truck. The bays are divided by a CB wall with an opening located in the southern portion for access between the two. Interior refinements include slab flooring, painted CB walls, open ceiling, and fluorescent lighting. A laundry room and storage mezzanine is in the Special Ops bay. Equipment storage and shop rooms are located in both bays.

Mechanical items include several electric panels, central electric air-conditioning and heat pump systems vented throughout via roof-top units, electric water heater, wiring for TV's and computer networking, and data/voice/video surveillance security systems.

Marshall Valuation Service, indicates a total life expectancy of about 40 years. Acknowledging the actual age of 42 years and regular maintenance though the years, the effective age is estimated at 25 years. This results in a remaining economic life of 15 years.

Site improvements include about 6,500 SF of asphalt paving used for an entrance drive and parking area, 3,000 SF of concrete apron along the building front for emergency vehicle ingress/egress, 945 SF metal carport, (3) wood storage buildings, dumpster pad, security lighting in the parking areas, basketball/handball court, metal security fencing, and covered rear patio.

Administration Building

The administration building is planned for demolition upon redevelopment of the site. It is a one-story office building that comprises 1,620 SF, was built in 1984, and is in average condition. The office includes masonry construction with brick exterior walls, hip roof with shingle covering, slab floor system, aluminum awning windows, glass storefront doors. It is divided into a reception area, (4) offices, conference room, (2) half baths, and storage room. Mechanical items include a Carrier A/C system, Generac generator, water heater, and sufficient electrical service. Site improvements comprise 2,200 SF of asphalt paving for parking, 160 SF of concrete sidewalks, and a small shed. At the request of the client, the value of the administration building is disregarded in this appraisal.

HIGHEST AND BEST USE

The basis of an appropriate conclusion of market value is the identification of the most profitable and competitive use to which a property can be put. This is accomplished through an analysis of the property's highest and best use. The highest and best use of a property is shaped by the competitive market forces within its physical and economic neighborhood. Therefore, the study and conclusion of highest and best use is an economic analysis of market interaction which impacts the subject property. This conclusion is the foundation of the market value estimate.

The Appraisal of Real Estate, Twelfth Edition, Appraisal Institute, defines highest and best use as, "the reasonably probable and legal use of vacant land or an improved property, that is physically possible, appropriately supported, financially feasible, and that results in the highest value." Highest and best use analysis considers the subject property as though vacant and as improved. The highest and best use conclusion must meet four tests or criteria. They are:

Legally Permissible
Physically Possible
Financially Feasible
Maximally Productive

The criteria of highest and best use are considered sequentially as they build upon each other in the analysis process. Also, the use must fulfill all the tests unless there is a reasonable probability that one of the unacceptable conditions can be changed. The following discussion presents the conclusion of highest and best use for the subject property.

The subject site has a mixed zoning of GU, Governmental and R-3, Multiple-Family Residential and a High Intensity/Central Core land use classification. The GU zoning is an extension of the district that includes Tuscawilla Park to the north and the northerly portion of the site that is improved with the fire station. The R-3 zoning applies to the southerly portion of the site and reflects adjacent residential uses.

According to Tye Chighizola, Planning Director for the City of Ocala, because of the High Intensity land use, the GU zoning could be disregarded and some form of mixed-use development would be welcomed by the City. This would include both commercial and residential components that would be consistent with the neighborhood.

The subject is located within the City's Midtown Master Plan which is part of the planning vision by the City. According to the plan, "Successful development and implementation of the Midtown Master Plan will allow Ocala to further realize the vision and direction articulated in the Downtown Master Plan (2004), Ocala Vision 2035 (2010), and the Midtown Master Plan. Midtown is a complete, urban neighborhood with a full range of amenities and services that allow residents and employees to fulfill their daily needs and activities. Opportunities for employment, grocery and other shopping needs, recreation, social gathering, dining, culture and entertainment, and professional services are all located within walking or biking distance of a range of housing options. Well designed streetscapes and public spaces like the Concord Plaza are clean, safe, and attractive. Midtown is regarded, along with Downtown, as the vibrant center of the

City, attracting and welcoming visitors from Ocala and the wider region to enjoy a wide variety of cultural, entertainment, dining, and recreation options for all ages. The area is the premier location in the region for artists and performers, and offers a range of activities, galleries, performance spaces, and events spanning the spectrum of interests from fine art to street art."

"Tuscawilla Park and the Osceola Trak are the cornerstone public spaces of Midtown, beloved by residents, employees, and visitors. Midtown supports healthy, active lifestyles, offering opportunities for daily walks, time with the pups at the off-leash dog park, organized and informal sports, and connections to Marion County's regional trail system. Midtown embraces its authentic history and assets. The Sovereign Building and Seminole Feed complex are iconic sites, anchoring an array of existing buildings that add distinct character to the district and welcome a variety of uses. The area celebrates its "industrial chic" identity, creating a unique sense of place while still respecting the scale and design of surrounding neighborhoods. Creative and innovative individuals and companies are drawn to the area and its flexible open spaces, and Midtown is the epicenter of the region for makerspaces, artisan manufacturing, and locally grown and produced foods and beverages."

The subject property is identified as the #1 Catalytic Opportunity Site for the Midtown Plan. "The Fire Station site is roughly a 3-acre site that is currently occupied by Ocala Rescue Fire Station 1. However, the Fire Department is in the process of relocating their facilities to two alternative sites, leaving the current site available for redevelopment. The site is located across NE 3rd Street from the southwest corner of Tuscawilla Park. Due to the sloping grade of the site, with the highest elevation on the southern edge, potential viewshed opportunities of the park itself are ideal. Both due to the proximity to and views of the park, the site is in a prime location.

The future development of the Fire Station site can be enhanced by resembling the area's existing character. The adjacent Tuscawilla Park Historic District represents a complementary architectural style for the Fire Station development to reflect. Additionally, this site has potential to adaptively reuse the Fire Station building to serve as the site's anchor. Lastly, the northwest corner of the site, at the intersection of NE 3rd Street and NE Watula Avenue, is adjacent to the proposed Osceola Trak. This proximity to a strong pedestrian and bicycle amenity should not be overlooked in the development of this site. Based on the current status and condition of the site there are a number of opportunities and challenges associated with pursuing the potential redevelopment."

The Midtown Plan has identified three alternative uses for the subject site. "In **Alternative 1**, it is proposed that the Fire Station remains as an adaptive reuse project in the northwest portion of the site. The program includes both restaurant and retail, an outdoor patio and an amenity area for various games and activities. The southwest portion of the site includes two-story townhomes. The townhomes' western edge has tuck-under parking, a centralized courtyard amenity, and shared parking for the remaining townhome units. The central green amenity area acts as a natural buffer between programs. The eastern portion of the site is proposed to contain six three-story townhomes. These townhomes are accessed by shared drive aisles and tuckunder parking. Either a shared drive aisle, or a shared green space is located between each

band. The residences facing Tuscawilla Avenue feature an architectural edge that complements the existing homes across the street."

Alternative #1

Alternative 2 proposes that the "Fire Station remains as an adaptive reuse project. The site's southwest program contains two-story townhomes, just as Alternative 1. In this alternative; however, the eastern portion of the site reflects the housing style along NE Tuscawilla Avenue by incorporating nine single-family detached bungalows. Detached parking garages are included and accessed through a residential alley. The lot widths are approximately 48 feet to accommodate nine 30-foot units."

Alternative #2

In **Alternative 3**, "the existing Fire Station building is removed to establish a critical architectural mass. The northwest portion of the site is programed as mixed-use development with ground floor retail and two to three stories of residential above. The development's parking resides in the center of the site, allowing its perimeter to establish a strong built edge. The southwest portion of the site includes three-story townhomes accessed off a private drive with tuck-under parking. The townhomes are buffered from the mixed-use building and parking lot by shared open space. The eastern portion of the site is consistent with Alternative 2, containing single-family detached bungalows."

Alternative #3

The financial feasibility of mixed-use development on the subject site lies in the current market acceptance of commercial and residential properties within the north downtown area. Retail commercial development has not yet permeated the midtown area although the City is working to make the area attractive for such use as evidenced by the recent renovation of the Reilly Arts Center (former City Auditorium) and redevelopment of Tuscawilla Park. Even so, the nature of the area precludes high intensity retail uses at the present time. However, with the support of the City in terms of permitting, fee and tax credits, and the potential for a joint venture, some form of mixed-use may be possible in the near future.

Some form of commercial use, either retail or office, is common for properties located along main corridors within several blocks of the square. The overall popularity for the downtown area has resulted in good occupancy for retail and office space, although several of the larger office buildings have some vacancy issues (former banks that have closed). Properties closer to the Judicial Center, like the subject, include higher occupancy for law offices while retail and restaurant uses are more accepted on or just off the square. The subject's location across from the Tuscawilla ponds and recreation facilities create aesthetic views and functional utility for the site. Therefore, use of the subject for some form of **mixed-use development** represents the highest and best use of the subject site.

FIRE STATION VALUATION

SALES COMPARISON APPROACH

The Sales Comparison Approach of this appraisal is based on the Principle of Substitution. This principle holds that buyers and sellers go through a comparison process when selecting a property based on personal preferences, taste, opinions, and desires.

The subject neighborhood and other areas of Ocala were researched for sales of older commercial and industrial buildings considered comparable to the subject in terms of location in the downtown area, size, age, and physical condition. Based on my studies, the sales presented in the following table provide the best reflection of value for the subject building, as is.

The quantitative adjustment process is employed in this appraisal wherein precise percentage adjustments are applied to the sales when differences are identified. Because paired sales were not found in this market to develop market-derived adjustments for the various categories, the appraiser's general knowledge of the area and other property features form the basis on the adjustments made herein.

The unit of comparison used herein is the price per square foot of NRA. Additional information concerning the sales is noted on sale sheets located at the end of this section.

Conclusions

The sales presented within this study are most comparable to the subject as they include commercial and industrial buildings located in or near the downtown area of Ocala. Based on the adjustment process as illustrated above, an indication of value near $39.96/SF (statistical mean of all sales) is appropriate for the subject. The range is from $34.69/SF to $41.93/SF, a difference of $7.24/SF, or 17%.

Improved Sale 1 is located 1½ miles northwest of the subject at 1915 NW 8th Avenue just west of N. Pine Avenue, and is identified as the former **KIMCO industrial building**. After adjustments, the indicated value of the subject is $34.69/SF.

Improved Sale 2 is located two blocks southwest of the subject at 29 NE 1st Avenue, and is identified as the former **Ocala Pawn building**. It was also purchased for

complete renovation for ground floor retail space and upper floor apartment use. After adjustments, the indicated value of the subject is $41.20/SF.

Improved Sale 3 is located two blocks southwest of the subject at 21 NE 1st Avenue, and is identified as the former **Ayres Cluster Law office**. This is a three-story office building located one block north of the square that is being renovated for office use. After adjustments, the indicated value of the subject is $40.84/SF.

Improved Sale 4 is located five blocks southwest of the subject at 118 SW Fort King Street, and is identified as the former **Florida Academy of Impairment office**. After adjustments, the indicated value of the subject is $41.15/SF.

Improved Sale 5 is the pending sale of the CrossFit Iron Legion/Brick City Bicycles building located five blocks southwest of the subject at 217 SE 1st Avenue. After adjustments, the indicated value of the subject is $41.93/SF.

With emphasis placed on the statistical mean, which accounts for the downtown location and fair condition of the subject, I have concluded an indication of value for the subject via the Sales Comparison Approach at **$40.00/SF**, or:

INDICATION OF VALUE VIA SALES COMPARISON APPROACH, As Is	**$480,000**
11,903 SF @ $40.00/SF rounded

TOTAL SITE, AS VACANT VALUATION

SALES COMPARISON APPROACH

The Sales Comparison Approach of this appraisal is based on the Principle of Substitution. This principle holds that buyers and sellers go through a comparison process when selecting a property based on personal preferences, taste, opinions, and desires.

LAND VALUE ESTIMATE

Valuation of the subject site uses a process in which sales of vacant commercial and residential tracts located within the downtown Ocala area are compared to the subject resulting in an appropriate conclusion of value for the subject land.

The quantitative adjustment process is employed in this appraisal wherein precise percentage adjustments are applied to the sales when differences are identified. Because paired sales were not found in this market to develop market-derived adjustments for the various categories, the appraiser's general knowledge of the area and other property features form the basis on the adjustments made herein.

The sales presented in the following table provide the best reflection of value for the subject site. The unit of comparison used herein is the price per SF of land area. Additional information about the land sales is noted in sale sheets located at the end of this section.

Conclusions

The land sales presented provide the best indication of value for the subject site as they include commercial and residential tracts located within downtown Ocala. Based on the adjustment process as illustrated in the land sales table, an indication of land value near $3.68/SF (mean of all sales) is appropriate for the subject. The range is from $3.34/SF to $4.25/SF, a difference of $.91/SF, or 21%.

Land Sale 1 is located ½ mile northwest of the subject on US Hwys 27/441/301 and NW 7th Street, and is used for storage for Jerry's Pawn Shop. After adjustments, the indicated value of the subject is $3.37/SF.

Land Sale 2 is located ½ mile southeast of the subject on SE 4th Street, and was purchased for residential development. After adjustments, the indicated value of the subject is $4.25/SF.

Land Sale 3 is located 12 blocks southwest of the subject at the intersection of SE 3rd Avenue and SE 10th Street, and is being developed with townhouses. After adjustments, the indicated value of the subject is $3.34/SF.

Land Sale 4 is located 12 blocks north of the subject on NE 8th Avenue just south of its intersection with NE 14th Street, and was purchased for office development. After adjustments, the indicated value of the subject is $3.37/SF.

Land Sale 5 is located three blocks east of the subject on NE 8th Avenue at its intersection with NE 4th Street, and was purchased for construction of a fire station. After adjustments, the indicated value of the subject is $4.10/SF.

With emphasis placed on all the sales presented due to their location in the downtown area, it is my opinion that the market value of the fee simple interest of the subject property, as vacant land, was **$3.50/SF,** or:

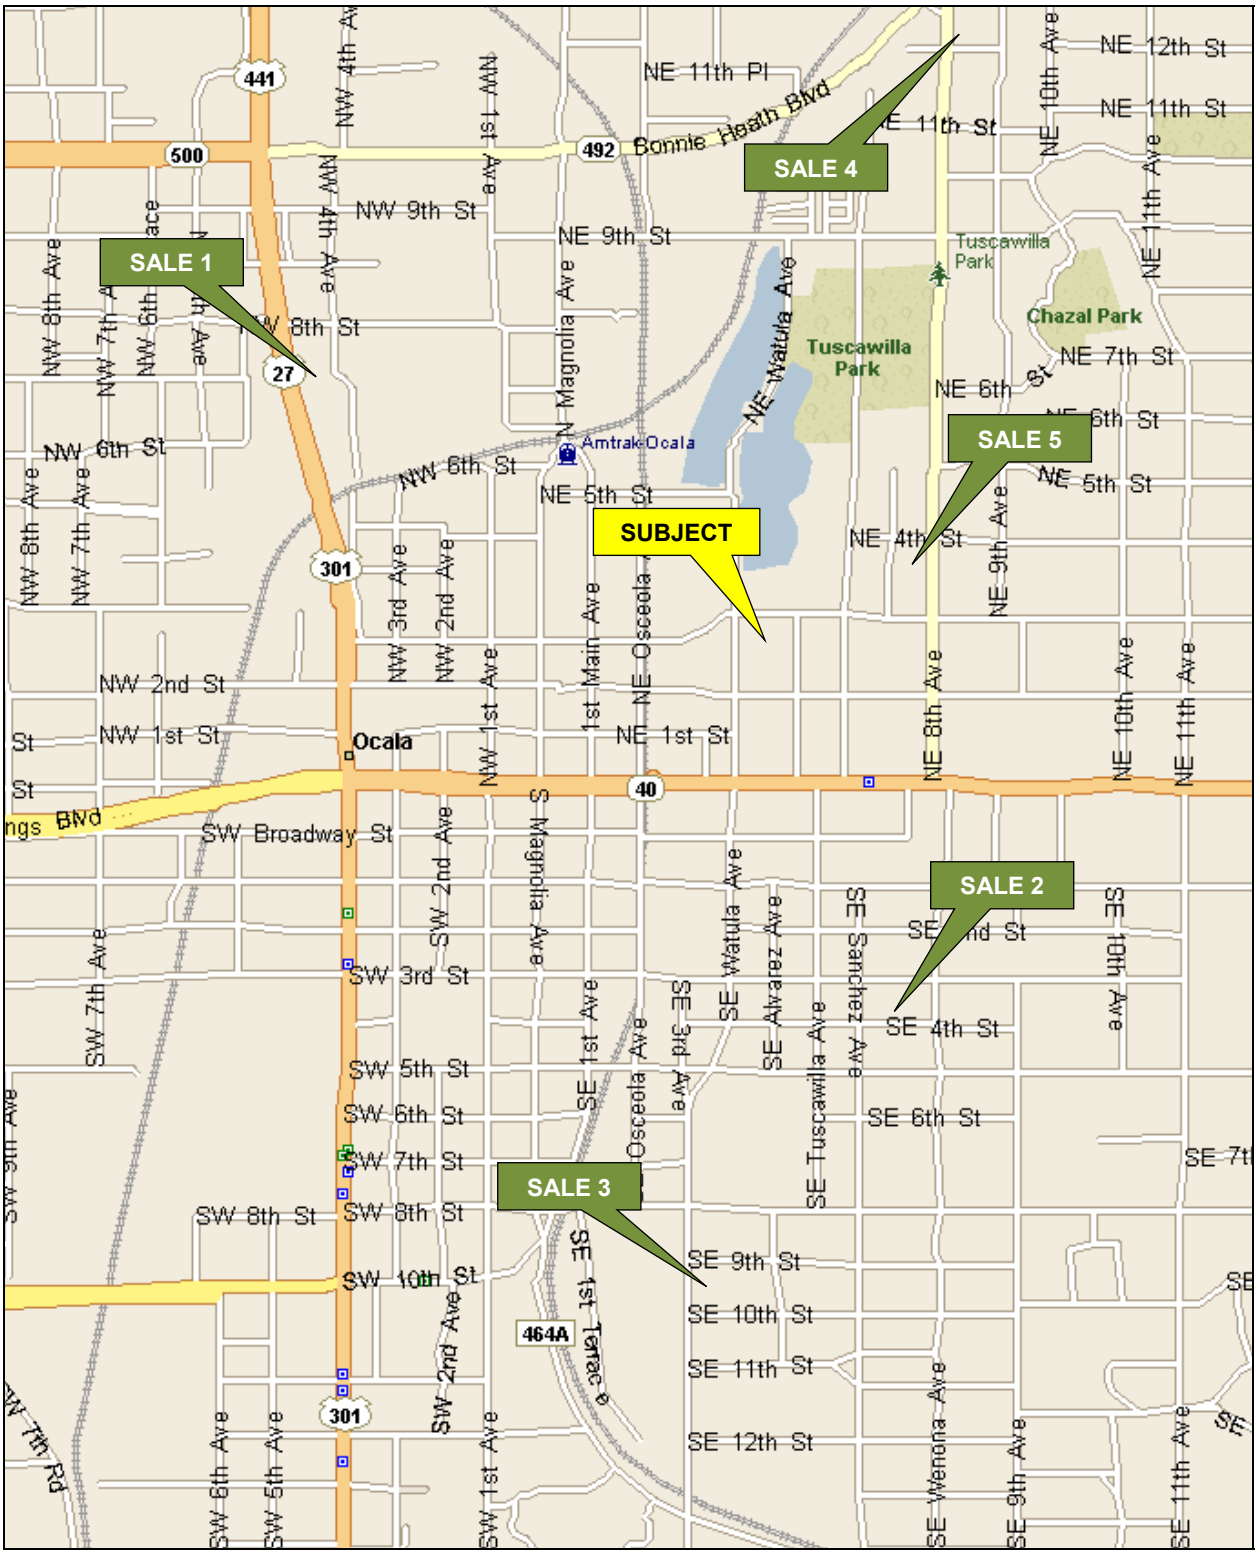

ESTIMATE OF MARKET VALUE, Total Site, As Vacant	**$460,000**
130,900 SF @ $3.50/SF, rounded	

Remainder Land Value Estimate

The remainder parcel comprises the total site (130,900 SF) less the land area of the fire station (46,590 SF), or 84,310 SF. Utilizing the unit price conclusion above, it is my opinion that the market value of the fee simple interest of the remainder parcel, as vacant land, was **$3.50/SF,** or:

ESTIMATE OF MARKET VALUE, Remainder Parcel	**$300,000**
84,310 SF @ $3.50/SF, rounded

Notice: IMPORTANT LIMITATIONS and YOUR LIABILITY

Reliance on information in Report: This report DOES NOT replace a full Phase I Environmental Site Assessment but is solely intended to be used as database review of environmental records.

License for use of information in Report: No page of this report can be used without this cover page, this notice and the project property identifier. The information in Report(s) may not be modified or re-sold.

Your Liability for misuse: Using this Service and/or its reports in a manner contrary to this Notice or your agreement will be in breach of copyright and contract and ERIS may obtain damages for such mis-use, including damages caused to third parties, and gives ERIS the right to terminate your account, rescind your license to any previous reports and to bar you from future use of the Service.

No warranty of Accuracy or Liability for ERIS: The information contained in this report has been produced by ERIS Information Inc. ("ERIS") using various sources of information, including information provided by Federal and State government departments. The report applies only to the address and up to the date specified on the cover of this report, and any alterations or deviation from this description will require a new report. This report and the data contained herein does not purport to be and does not constitute a guarantee of the accuracy of the information contained herein and does not constitute a legal opinion nor medical advice. Although ERIS has endeavored to present you with information that is accurate, ERIS disclaims, any and all liability for any errors, omissions, or inaccuracies in such information and data, whether attributable to inadvertence, negligence or otherwise, and for any consequences arising therefrom. Liability on the part of ERIS is limited to the monetary value paid for this report.

Trademark and Copyright: You may not use the ERIS trademarks or attribute any work to ERIS other than as outlined above. This Service and Report(s) are protected by copyright owned by ERIS Information Inc. Copyright in data used in the Service or Report(s) (the "Data") is owned by ERIS or its licensors. The Service, Report(s) and Data may not be copied or reproduced in whole or in any substantial part without prior written consent of ERIS.

Discharge Cleanup Summary

Discharge Date:	12/14/1989
Discharge Combined with:	
Cleanup Required:	R - CLEANUP REQUIRED
Discharge Cleanup Status:	NFA - NFA COMPLETE
Discharge Cleanup Stat Date:	04/30/2014
Cleanup Work Status:	COMPLETED
Information Source:	A - ABANDONED TANK RESTORATION
Other Source:	
Eligibility Indicator:	E - ELIGIBLE
Site Manager:	BAILEY_K
Site Manager End Date:	04/30/2014
Tank Office:	PCTM5 - PETROLEUM CLEANUP TEAM 5

Contaminated Media

Contaminated Drinking Wells:	0
Contaminated Mntring Wells:	YES
Contaminated Soil:	YES
Contaminated Surface Water:	NO
Contaminated Ground Water:	YES
Pollutant:	B - Unleaded Gas
Other Description:	
Gallons Discharged:	

Petroleum Cleanup Program Eligibility

Waste Code Details

Hazardous Waste Code:	F003
Waste Code Description:	THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NONHALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS, AND A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.
Hazardous Waste Code:	F005
Waste Code Description:	THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: TOLUENE, METHYL ETHYL KETONE, CARBON DISULFIDE, ISOBUTANOL, PYRIDINE, BENZENE, 2-ETHOXYETHANOL, AND 2-NITROPROPANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F002, OR F004; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.
Hazardous Waste Code:	D001
Waste Code Description:	IGNITABLE WASTE
Hazardous Waste Code:	F002
Waste Code Description:	THE FOLLOWING SPENT HALOGENATED SOLVENTS: TETRACHLOROETHYLENE, METHYLENE

Map Key	Number of Records	Direction	Distance (mi/ft)	Elev/Diff (ft)	Site	DB

CHLORIDE, TRICHLOROETHYLENE, 1,1,1-TRICHLOROETHANE, CHLOROBENZENE, 1,1,2-TRICHLORO-1,2,2-TRIFLUOROETHANE, ORTHO-DICHLOROBENZENE, TRICHLOROFLUOROMETHANE, AND 1,1,2, TRICHLOROETHANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Hazardous Waste Code: F001
Waste Code Description: THE FOLLOWING SPENT HALOGENATED SOLVENTS USED IN DEGREASING: TETRACHLOROETHYLENE, TRICHLORETHYLENE, METHYLENE CHLORIDE, 1,1,1-TRICHLOROETHANE, CARBON TETRACHLORIDE AND CHLORINATED FLUOROCARBONS; ALL SPENT SOLVENT MIXTURES/BLENDS USED IN DEGREASING CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F002, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Description History: The existing building was constructed in 1956 by the Smith Family and has been a combination tire store and paint store until 2005. The adjoining vacant lots had retail bldgs. with a variety of non-impacting businesses. The paint and tire store now serve an auto repair shop and a retail store. The adjoining lots now serve as a parking lot serving the City's downtown area. 9-22-11

RAT Def: Functions performed to collect additional data, beyond that required for Hazard Ranking System scoring, in order to expedite the Remedial Investigation/Feasibility Study (RI/FS) project planning phase for National Priority List (NPL) sites. The present site inspection focus on pathways and receptors has been expanded to include site and source characterization. The information facilitates the development of RI/FS workplan and sampling and analysis plan.

RAT Def: A numeric estimate of the relative severity of a hazardous substance release or potential release based on: (1) the relative potential of substances to cause hazardous situations; (2) the likelihood and rate at which the substances may affect human and environmental receptors; and (3) the severity and magnitude of potential effects. The score is computed using the hazard ranking system (HRS).

Description History: Prior to 1960, the site was a residential area. Two of the homes were used for commercial ventures such as beauty shops. When US Highways 301 and 441 were extended through the area, the existing homes were demolished. The City of Ocala has been using the site for a staging and storage area since the mid 1960s.

Appendix: Database Descriptions

Environmental Risk Information Services (ERIS) can search the following databases. The extent of historical information varies with each database and current information is determined by what is publicly available to ERIS at the time of update. ERIS updates databases as set out in ASTM Standard E1527-13, Section 8.1.8 Sources of Standard Source Information:

"Government information from nongovernmental sources may be considered current if the source updates the information at least every 90 days, or, for information that is updated less frequently than quarterly by the government agency, within 90 days of the date the government agency makes the information available to the public."

Standard Environmental Record Sources

Federal

National Priority List: NPL

National Priorities List (Superfund)-NPL: EPA's (United States Environmental Protection Agency) list of the most serious uncontrolled or abandoned hazardous waste sites identified for possible long-term remedial action under the Superfund program. The NPL, which EPA is required to update at least once a year, is based primarily on the score a site receives from EPA's Hazard Ranking System. A site must be on the NPL to receive money from the Superfund Trust Fund for remedial action.

Government Publication Date: Jul 3, 2018

National Priority List - Proposed: PROPOSED NPL

Includes sites proposed (by the EPA, the state, or concerned citizens) for addition to the NPL due to contamination by hazardous waste and identified by the Environmental Protection Agency (EPA) as a candidate for cleanup because it poses a risk to human health and/or the environment.

Government Publication Date: Jul 3, 2018

Deleted NPL: DELETED NPL

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Government Publication Date: Jul 3, 2018

SEMS List 8R Active Site Inventory: SEMS

The Superfund Program has deployed the Superfund Enterprise Management System (SEMS), which integrates multiple legacy systems into a comprehensive tracking and reporting tool. This inventory contains active sites evaluated by the Superfund program that are either proposed to be or are on the National Priorities List (NPL) as well as sites that are in the screening and assessment phase for possible inclusion on the NPL. The Active Site Inventory Report displays site and location information at active SEMS sites. An active site is one at which site assessment, removal, remedial, enforcement, cost recovery, or oversight activities are being planned or conducted.

Government Publication Date: Aug 13, 2018

Inventory of Open Dumps, June 1985: ODI

The Resource Conservation and Recovery Act (RCRA) provides for publication of an inventory of open dumps. The Act defines "open dumps" as facilities which do not comply with EPA's "Criteria for Classification of Solid Waste Disposal Facilities and Practices" (40 CFR 257).

Government Publication Date: Jun 1985

SEMS List 8R Archive Sites: SEMS ARCHIVE

The Superfund Enterprise Management System (SEMS) Archived Site Inventory displays site and location information at sites archived from SEMS. An archived site is one at which EPA has determined that assessment has been completed and no further remedial action is planned under the Superfund program at this time.

Government Publication Date: Aug 13, 2018

Comprehensive Environmental Response, Compensation and Liability Information System - CERCLIS: CERCLIS

Superfund is a program administered by the United States Environmental Protection Agency (EPA) to locate, investigate, and clean up the worst hazardous waste sites throughout the United States. CERCLIS is a database of potential and confirmed hazardous waste sites at which the EPA Superfund program has some involvement. It contains sites that are either proposed to be or are on the National Priorities List (NPL) as well as sites that are in the screening and assessment phase for possible inclusion on the NPL. The EPA administers the Superfund program in cooperation with individual states and tribal governments; this database is made available by the EPA.

Government Publication Date: Oct 25, 2013

EPA Report on the Status of Open Dumps on Indian Lands: IODI

Public Law 103-399, The Indian Lands Open Dump Cleanup Act of 1994, enacted October 22, 1994, identified congressional concerns that solid waste open dump sites located on American Indian or Alaska Native (AI/AN) lands threaten the health and safety of residents of those lands and contiguous areas. The purpose of the Act is to identify the location of open dumps on Indian lands, assess the relative health and environment hazards posed by those sites, and provide financial and technical assistance to Indian tribal governments to close such dumps in compliance with Federal standards and regulations or standards promulgated by Indian Tribal governments or Alaska Native entities.

Government Publication Date: Dec 31, 1998

CERCLIS - No Further Remedial Action Planned: CERCLIS NFRAP

An archived site is one at which EPA has determined that assessment has been completed and no further remedial action is planned under the Superfund program at this time. The Archive designation means that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL). This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

Government Publication Date: Oct 25, 2013

CERCLIS Liens: CERCLIS LIENS

A Federal Superfund lien exists at any property where EPA has incurred Superfund costs to address contamination ("Superfund site") and has provided notice of liability to the property owner. A Federal CERCLA ("Superfund") lien can exist by operation of law at any site or property at which EPA has spent Superfund monies. This database is made available by the United States Environmental Protection Agency (EPA).

Government Publication Date: Jan 30, 2014

RCRA CORRACTS-Corrective Action: RCRA CORRACTS

RCRA Info is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. At these sites, the Corrective Action Program ensures that cleanups occur. EPA and state regulators work with facilities and communities to design remedies based on the contamination, geology, and anticipated use unique to each site.

Government Publication Date: Aug 2, 2018

RCRA non-CORRACTS TSD Facilities: RCRA TSD

RCRA Info is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. This database includes Non-Corrective Action sites listed as treatment, storage and/or disposal facilities of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA).

Government Publication Date: Aug 2, 2018

RCRA Generator List: RCRA LQG

RCRA Info is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. RCRA Info replaces the data recording and reporting abilities of the Resource Conservation and Recovery Information System (RCRIS) and the Biennial Reporting System (BRS). A hazardous waste generator is any person or site whose processes and actions create hazardous waste (see 40 CFR 260.10). Large Quantity Generators (LQGs) generate 1,000 kilograms per month or more of hazardous waste or more than one kilogram per month of acutely hazardous waste.

Government Publication Date: Aug 2, 2018

RCRA Small Quantity Generators List: RCRA SQG

RCRA Info is the EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. RCRA Info replaces the data recording and reporting abilities of the Resource Conservation and Recovery Information System (RCRIS) and the Biennial Reporting System (BRS). A hazardous waste generator is any person or site whose processes and actions create hazardous waste (see 40 CFR 260.10). Small Quantity Generators (SQGs) generate more than 100 kilograms, but less than 1,000 kilograms, of hazardous waste per month.

Government Publication Date: Aug 2, 2018

RCRA Conditionally Exempt Small Quantity Generators List: RCRA CESQG

RCRA Info is the EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. RCRA Info replaces the data recording and reporting abilities of the Resource Conservation and Recovery Information System (RCRIS) and the Biennial Reporting System (BRS). A hazardous waste generator is any person or site whose processes and actions create hazardous waste (see 40 CFR 260.10). Conditionally Exempt Small Quantity Generators (CESQG) generate 100 kilograms or less per month of hazardous waste or one kilogram or less per month of acutely hazardous waste.

Government Publication Date: Aug 2, 2018

RCRA Non-Generators: RCRA NON GEN

RCRA Info is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. RCRA Info replaces the data recording and reporting abilities of the Resource Conservation and Recovery Information System (RCRIS) and the Biennial Reporting System (BRS). A hazardous waste generator is any person or site whose processes and actions create hazardous waste (see 40 CFR 260.10). Non-Generators do not presently generate hazardous waste.

Government Publication Date: Aug 2, 2018

Federal Engineering Controls-ECs: FED ENG

Engineering controls (ECs) encompass a variety of engineered and constructed physical barriers (e.g., soil capping, sub-surface venting systems, mitigation barriers, fences) to contain and/or prevent exposure to contamination on a property. This database is made available by the United States Environmental Protection Agency (EPA).

Government Publication Date: Jan 20, 2016

Federal Institutional Controls- ICs: FED INST

Institutional controls are non-engineered instruments, such as administrative and legal controls, that help minimize the potential for human exposure to contamination and/or protect the integrity of the remedy. Although it is EPA's (United States Environmental Protection Agency) expectation that treatment or engineering controls will be used to address principal threat wastes and that groundwater will be returned to its beneficial use whenever practicable, ICs play an important role in site remedies because they reduce exposure to contamination by limiting land or resource use and guide human behavior at a site.

Government Publication Date: Jan 20, 2016

Emergency Response Notification System: ERNS 1982 TO 1986

Database of oil and hazardous substances spill reports controlled by the National Response Center. The primary function of the National Response Center is to serve as the sole national point of contact for reporting oil, chemical, radiological, biological, and etiological discharges into the environment anywhere in the United States and its territories.

Government Publication Date: 1982-1986

Emergency Response Notification System: ERNS 1987 TO 1989

Database of oil and hazardous substances spill reports controlled by the National Response Center. The primary function of the National Response Center is to serve as the sole national point of contact for reporting oil, chemical, radiological, biological, and etiological discharges into the environment anywhere in the United States and its territories.

Government Publication Date: 1987-1989

Emergency Response Notification System: ERNS

Database of oil and hazardous substances spill reports controlled by the National Response Center. The primary function of the National Response Center is to serve as the sole national point of contact for reporting oil, chemical, radiological, biological, and etiological discharges into the environment anywhere in the United States and its territories. This database is made available by the United States Environmental Protection Agency (EPA).

Government Publication Date: Feb 12, 2018

The Assessment, Cleanup and Redevelopment Exchange System (ACRES) Brownfield Database: FED BROWNFIELDS

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties protects the environment, reduces blight, and takes development pressures off greenspaces and working lands. This database is made available by the United States Environmental Protection Agency (EPA).

Government Publication Date: Feb 20, 2018

FEMA Underground Storage Tank Listing: FEMA UST

The Federal Emergency Management Agency (FEMA) of the Department of Homeland Security maintains a list of FEMA owned underground storage tanks.

Government Publication Date: Dec 31, 2017

LIEN on Property: SEMS LIEN

The EPA Superfund Enterprise Management System (SEMS) provides LIEN information on properties under the EPA Superfund Program.

Government Publication Date: Aug 13, 2018

Superfund Decision Documents: SUPERFUND ROD

This database contains a listing of decision documents for Superfund sites. Decision documents serve to provide the reasoning for the choice of (or) changes to a Superfund Site cleanup plan. The decision documents include Records of Decision (ROD), ROD Amendments, Explanations of Significant Differences (ESD), along with other associated memos and files. This information is maintained and made available by the US EPA (Environmental Protection Agency).

Government Publication Date: Jun 8, 2018

State

Superfund Waste Cleanup & State-Funded Action Sites: SHWS

List of hazardous waste cleanup sites participating in various federal and state funded cleanup programs. Florida's State-Funded Action Sites and Superfund Waste Cleanup Sites lists are maintained and made available by the Florida Department of Environmental Protection (FDEP). This database is state equivalent CERCLIS.

Government Publication Date: Sep 6, 2018

Delisted State-Funded Action Sites: DSHW

This database contains a list of closed hazardous waste sites of various federal and state funded cleanup programs that were removed from the Florida Department of Environmental Protection (FDEP).

Government Publication Date: Sep 6, 2018

Waste Cleanup Responsible Party Sites: WCRPS

List of Open, Closed, and Inactive Waste Cleanup Responsible Party sites made available by the Florida Department of Environmental Protection.

Government Publication Date: Jul 19, 2018

Solid Waste Facilities and Landfills: SWF/LF

The Solid Waste Facility Inventory Report made available by the Florida Department of Environmental Protection (FDEP) includes all types of authorized and unauthorized facilities: municipal solid waste, landfills, dumps, construction and demolition disposal, recycling facilities, and more.

Government Publication Date: Jul 17, 2018

Leaking Tanks: LST

The Storage Tank Regulation Section is part of the Petroleum Restoration Program in the Florida Department of Environmental Protection (FDEP)s Division of Waste Management. In 1983, Florida was one of the first states in the union to pass legislation and adopt rules for underground and aboveground storage tank systems. Since then, over 28,000 facilities have reported discharges of petroleum products from storage tank systems. Florida relies on groundwater for about 92 percent of its drinking water needs, and has some of the most stringent rules in the country.

Government Publication Date: Aug 4, 2018

Delisted Leaking Tanks: DELISTED LST

Whereas Leaking Tanks (LST) includes only facilities which currently have contamination as recorded by the Florida Department of Environmental Protection, this list contains facilities which were once included in LST data but no longer appear on the list made available by FDEP. Facilities may be removed from the current LST list because the discharge has been cleaned up, or the discharge is not required for 62-770.

Government Publication Date: Aug 31, 2018

Underground Storage Tanks: UST

List of underground storage tank locations made available by the Florida Department of Environmental Protection (FDEP). In an effort to minimize the occurrence and environmental risks of releases and discharges, FDEP administers standards pertaining to the construction, installation, operation, maintenance, repair, closure, and disposal of underground storage tank systems that store regulated substances.

Government Publication Date: Aug 4, 2018

Aboveground Storage Tanks: AST

The Florida Department of Environmental Protection (FDEP) provides standards for aboveground storage tanks (ASTs) that have individual storage tank capacities greater than 550 gallons. The state also regulates the registration, construction, installation, operation, maintenance, repair, closure, and disposal of storage tank systems that store regulated substances. The listing of regulated aboveground storage tank facilities is maintained by FDEP.

Government Publication Date: Aug 4, 2018

Delisted AST UST Storage Tanks: DEL UST AST TANK

This database contains a list of closed UST and AST storage tank sites that were removed from the Florida Department of Environmental Protection (FDEP) storage tank database.

Government Publication Date: Jul 2, 2015

Delisted Storage Tanks: DEL STORAGE TANK

This database contains a list of closed storage tank sites that were removed from the Florida Department of Environmental Protection (FDEP) storage tank database.

Government Publication Date: Aug 14, 2018

Federal Facilities Listing: FF TANKS

The Florida Department of Environmental Protection (FDEP) Storage Tank Program registers facilities and storage tanks where aboveground or underground storage tanks store pollutants, hazardous substances, and/or mineral acid substances regulated by Chapter 62-761, Florida Administrative Code, or when aboveground storage tanks or compression vessels store a hazardous substance which requires registration according to Chapter 376, Florida Statutes.

Government Publication Date: Aug 14, 2018

Storage Tank/Contaminated Facility Search: STCS

List of facilities and tanks in the Florida Department of Environmental Protection (FDEP) Bureau of Petroleum Storage Systems Storage Tank/Contaminated Facility Search which do not currently have active, regulated underground or aboveground storage tanks (USTs or ASTs) containing petroleum. Note that tank details do not appear for facilities for which all tanks have been removed.

Government Publication Date: Jul 27, 2018

Institutional Controls Registry: INST

The Institutional Controls registry is maintained by the Florida Department of Environmental Protection (FDEP). The registry aims to help preserve adequate protection of contaminated soil regions and help to minimize any chances of exposure.

Government Publication Date: Jul 3, 2018

Engineering Controls: ENG

A listing of all engineering controls that are in place to eliminate or reduce the potential for contaminant migration and exposure to contaminants. These controls may include caps, barriers, guards or fences. The list is maintained by the Florida Department of Environmental Protection (FDEP).

Government Publication Date: Jul 3, 2018

Voluntary Cleanup Sites: VCP

A listing of active and closed voluntary cleanup sites registered by the Florida Department of Environmental Protection (FDEP).

Government Publication Date: Sep 13, 2017

Brownfield Sites: BROWNFIELDS

Brownfields are defined by the Florida Department of Environmental Protection (FDEP) as abandoned, idled, or underused industrial and commercial facilities where expansion or redevelopment is complicated by real or perceived environmental contamination. This is a list of sites within designated Brownfield Areas within Florida where Brownfield Site Rehabilitation Agreement (BSRA)s have been executed between FDEP and a responsible party.

Government Publication Date: Jul 31, 2018

Brownfield Areas: BROWNFIELD AREA

Brownfields are defined by the Florida Department of Environmental Protection (FDEP) as abandoned, idled, or underused industrial and commercial facilities where expansion or redevelopment is complicated by real or perceived environmental contamination. This is a list of Brownfield Areas, defined by the FDEP as contiguous areas of one or more brownfield sites, some of which may not be contaminated, that have been designated as such by a local government resolution. Such areas may include all or portions of community redevelopment areas, enterprise zones, empowerment zones, other such designated economically deprived communities and areas, and Environmental Protection Agency (EPA) designated brownfield pilot projects. Because a variety of sources and methods were used to derive information for this data, locations are approximate.

Government Publication Date: Jul 31, 2018

Tribal

Leaking Underground Storage Tanks (LUSTs) on Indian Land: INDIAN LUST

Leaking Underground Storage Tanks (LUSTs) on Tribal/Indian Lands in EPA Region 4, which includes Florida.

Government Publication Date: Oct 14, 2017

Underground Storage Tanks (USTs) on Indian Lands: INDIAN UST

Listing of underground storage tanks (USTs) on Tribal/Indian Lands in EPA Region 4, which includes Florida.

Government Publication Date: Oct 14, 2017

Delisted Tribal Leaking Storage Tanks: DELISTED ILST

Leaking Underground Storage Tank facilities which have been removed from the Regional Tribal LUST lists made available by the EPA.

Government Publication Date: Oct 14, 2017

Delisted Tribal Underground Storage Tanks: DELISTED IUST

Underground Storage Tank facilities which have been removed from the Regional Tribal UST lists made available by the EPA.

Government Publication Date: Oct 14, 2017

County

Broward County Aboveground Storage Tanks: BROWARD AST

List of known regulated aboveground storage tanks within Broward County, including those tanks that have been closed. The list is maintained by Broward County Government.

Government Publication Date: Jun 4, 2018

Broward County Inventory Report on Contaminated Locations: BROWARD CONTAM

The Inventory Report of Contaminated Locations has been prepared by the Broward County Environmental Protection and Growth Management Department to monitor known contaminated locations within Broward County, Florida. This report includes sites listed by the United States Environmental Protection Agency (USEPA), the Florida Department of Environmental Protection (FDEP), and sites licensed for contamination assessment and cleanup by the Pollution Prevention, Remediation and Air Quality Division of the Department.

Government Publication Date: Dec 04, 2017

Broward County Underground Storage Tanks: UST BROWARD

List of all known regulated underground storage tanks within Broward County, including those tanks that have been closed. The list is maintained by Broward County Government.

Government Publication Date: Jun 4, 2018

Hillsborough County Landfills: HILLS SWF/LF

List of Landfill sites in Hillsborough County regulated by Hillsborough County Government in Florida. Landfills or solid waste disposal units are classified according to the amount and types of waste received. Rule 62-701.340(3), F.A.C. classifies landfills in Florida as Class I, Class II, Class I and Class II, and Class III. Class I landfills are those which receive an average of 20 tons or more of solid waste per day. Class II landfills are those which receive an average of less than 20 tons of solid waste per day. Class I and Class II landfills receive general, non-hazardous household, commercial, industrial, and agricultural wastes, subject to the restrictions of Rules 62-701.300 and 62-701.520, F.A.C.

Government Publication Date: Mar 5, 2018

Miami-Dade County Contaminated Sites: MIAMI CONT

The Department of Environmental Resources Management (DERM) maintains a list of Contaminated Sites in Miami-Dade County.

Government Publication Date: Sep 6, 2018

Miami-Dade County Storage Tanks: MIAMI TANKS

A listing of Underground and Aboveground Storage Tank sites in Miami-Dade County, as recorded by the Department of Environmental Resources Management (DERM) Storage Tanks Program. The program conducts annual inspections to verify that facility owners are complying with the necessary requirements that have been set up to prevent any discharges into the groundwater of Miami-Dade County. In addition to compliance inspections, the Storage Tanks program oversees removal and installation of new underground and aboveground storage systems to verify that these are conducted in accordance with applicable state and local regulations.

Government Publication Date: Aug 13, 2018

Palm Beach County Solid Waste Facilities: PALM SWF/LF

Inventory of solid waste facility sites in Palm Beach County. A solid waste site is defined as any parcel of land upon which or in which solid waste has either been processed, transferred, or placed for disposal. These sites include dumps, landfills, solid waste management facilities, waste transfer stations, selected hazardous waste spill or burial sites, and wastewater sludge land application sites. The inventory is maintained by Solid Waste Authority Palm Beach County.

Government Publication Date: Apr 1, 2016

Additional Environmental Record Sources

Federal

Facility Registry Service/Facility Index: FINDS/FRS

The US Environmental Protection Agency (EPA)'s Facility Registry System (FRS) is a centrally managed database that identifies facilities, sites or places subject to environmental regulations or of environmental interest. FRS creates high-quality, accurate, and authoritative facility identification records through rigorous verification and management procedures that incorporate information from program national systems, state master facility records, data collected from EPA's Central Data Exchange registrations and data management personnel.

Government Publication Date: Apr 17, 2018

Toxics Release Inventory (TRI) Program: TRIS

The EPA's Toxics Release Inventory (TRI) is a database containing data on disposal or other releases of over 650 toxic chemicals from thousands of U.S. facilities and information about how facilities manage those chemicals through recycling, energy recovery, and treatment. One of TRI's primary purposes is to inform communities about toxic chemical releases to the environment.

Government Publication Date: Dec 31, 2016

Hazardous Materials Information Reporting System: HMIRS

US DOT - Department of Transportation Pipeline and Hazardous Materials Safety Administration (PHMSA) Incidents Reports Database taken from Hazmat Intelligence Portal, U.S. Department of Transportation.

Government Publication Date: May 23, 2018

National Clandestine Drug Labs: NCDL

The U.S. Department of Justice ("the Department") provides this data as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy.

Government Publication Date: Jul 18, 2018

Toxic Substances Control Act: TSCA

The Environmental Protection Agency (EPA) is amending the Toxic Substances Control Act (TSCA) section 8(a) Inventory Update Reporting (IUR) rule and changing its name to the Chemical Data Reporting (CDR) rule.
The CDR enables EPA to collect and publish information on the manufacturing, processing, and use of commercial chemical substances and mixtures (referred to hereafter as chemical substances) on the TSCA Chemical Substance Inventory (TSCA Inventory). This includes current information on chemical substance production volumes, manufacturing sites, and how the chemical substances are used. This information helps the Agency determine whether people or the environment are potentially exposed to reported chemical substances. EPA publishes submitted CDR data that is not Confidential Business Information (CBI).

Government Publication Date: Jun 30, 2017

Hist TSCA: HIST TSCA

The Environmental Protection Agency (EPA) is amending the Toxic Substances Control Act (TSCA) section 8(a) Inventory Update Reporting (IUR) rule and changing its name to the Chemical Data Reporting (CDR) rule.
The 2006 IUR data summary report includes information about chemicals manufactured or imported in quantities of 25,000 pounds or more at a single site during calendar year 2005. In addition to the basic manufacturing information collected in previous reporting cycles, the 2006 cycle is the first time EPA collected information to characterize exposure during manufacturing, processing and use of organic chemicals. The 2006 cycle also is the first time manufacturers of inorganic chemicals were required to report basic manufacturing information.

Government Publication Date: Dec 31, 2006

FTTS Administrative Case Listing: FTTS ADMIN

An administrative case listing from the Federal Insecticide, Fungicide, & Rodenticide Act (FIFRA) and Toxic Substances Control Act (TSCA), together known as FTTS. This database was obtained from the Environmental Protection Agency's (EPA) National Compliance Database (NCDB). The FTTS and NCDB was shut down in 2006.

Government Publication Date: Jan 19, 2007

FTTS Inspection Case Listing: FTTS INSP

An inspection case listing from the Federal Insecticide, Fungicide, & Rodenticide Act (FIFRA) and Toxic Substances Control Act (TSCA), together known as FTTS. This database was obtained from the Environmental Protection Agency's (EPA) National Compliance Database (NCDB). The FTTS and NCDB was shut down in 2006.

Government Publication Date: Jan 19, 2007

Potentially Responsible Parties List: PRP

Early in the cleanup process, the Environmental Protection Agency (EPA) conducts a search to find the potentially responsible parties (PRPs). EPA looks for evidence to determine liability by matching wastes found at the site with parties that may have contributed wastes to the site.

Government Publication Date: Jul 17, 2018

State Coalition for Remediation of Drycleaners Listing: SCRD DRYCLEANER

The State Coalition for Remediation of Drycleaners (SCRD) was established in 1998, with support from the U.S. Environmental Protection Agency (EPA) Office of Superfund Remediation and Technology Innovation. Coalition members are states with mandated programs and funding for drycleaner site remediation. Current members are Alabama, Connecticut, Florida, Illinois, Kansas, Minnesota, Missouri, North Carolina, Oregon, South Carolina, Tennessee, Texas, and Wisconsin.

Government Publication Date: Nov 08, 2017

Integrated Compliance Information System (ICIS): ICIS

The Integrated Compliance Information System (ICIS) is a system that provides information for the Federal Enforcement and Compliance (FE&C) and the National Pollutant Discharge Elimination System (NPDES) programs. The FE&C component supports the Environmental Protection Agency's (EPA) Civil Enforcement and Compliance program activities. These activities include Compliance Assistance, Compliance Monitoring and Enforcement. The NPDES program supports tracking of NPDES permits, limits, discharge monitoring data and other program reports.

Government Publication Date: Nov 18, 2016

Drycleaner Facilities: FED DRYCLEANERS

A list of drycleaner facilities from the Integrated Compliance Information System (ICIS). The Environmental Protection Agency (EPA) tracks facilities that possess NAIC and SIC codes that classify businesses as drycleaner establishments.

Government Publication Date: May 29, 2018

Delisted Drycleaner Facilities: DELISTED FED DRY

List of sites removed from the list of Drycleaner Facilities (sites in the EPA's Integrated Compliance Information System (ICIS) with NAIC or SIC codes identifying the business as a drycleaner establishment).

Government Publication Date: May 29, 2018

Formerly Used Defense Sites: FUDS

Formerly Used Defense Sites (FUDS) are properties that were formerly owned by, leased to, or otherwise possessed by and under the jurisdiction of the Secretary of Defense prior to October 1986, where the Department of Defense (DoD) is responsible for an environmental restoration. This list is published by the U.S. Army Corps of Engineers.

Government Publication Date: Nov 22, 2016

Material Licensing Tracking System (MLTS): MLTS

A list of sites that store radioactive material subject to the Nuclear Regulatory Commission (NRC) licensing requirements. This list is maintained by the NRC. As of September 2016, the NRC no longer releases location information for sites. Site locations were last received in July 2016.

Government Publication Date: Jun 30, 2017

Historic Material Licensing Tracking System (MLTS) sites: HIST MLTS

A historic list of sites that have inactive licenses and/or removed from the Material Licensing Tracking System (MLTS). In some cases, a site is removed from the MLTS when the state becomes an "Agreement State". An Agreement State is a State that has signed an agreement with the Nuclear Regulatory Commission (NRC) authorizing the State to regulate certain uses of radioactive materials within the State.

Government Publication Date: Jan 31, 2010

Mines Master Index File: MINES

The Master Index File (MIF) contains mine identification numbers issued by the Department of Labor Mine Safety and Health Administration (MSHA) for mines active or opened since 1971. Note that addresses may or may not correspond with the physical location of the mine itself.

Government Publication Date: Jan 30, 2018

Alternative Fueling Stations: ALT FUELS

List of alternative fueling stations made available by the US Department of Energy's Office of Energy Efficiency & Renewable Energy. Includes Biodiesel stations, Ethanol (E85) stations, Liquefied Petroleum Gas (Propane) stations, Ethanol (E85) stations, Natural Gas stations, Hydrogen stations, and Electric Vehicle Supply Equipment (EVSE). The National Renewable Energy Laboratory (NREL) obtains information about new stations from trade media, Clean Cities coordinators, a Submit New Station form on the Station Locator website, and through collaborating with infrastructure equipment and fuel providers, original equipment manufacturers (OEMs), and industry groups.

Government Publication Date: Jul 24, 2018

Registered Pesticide Establishments: SSTS

List of active EPA-registered foreign and domestic pesticide-producing and device-producing establishments based on data from the Section Seven Tracking System (SSTS). The Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) Section 7 requires that facilities producing pesticides, active ingredients, or devices be registered. The list of establishments is made available by the EPA.

Government Publication Date: Mar 1, 2018

Polychlorinated Biphenyl (PCB) Notifiers: PCB

Facilities included in the national list of facilities that have notified the United States Environmental Protection Agency (EPA) of Polychlorinated Biphenyl (PCB) activities. Any company or person storing, transporting or disposing of PCBs or conducting PCB research and development must notify the EPA and receive an identification number.

Government Publication Date: Nov 30, 2017

State

Priority Ranking List: PRIORITYCLEAN

The Florida Legislature has established a state-funded program to cleanup properties that are contaminated as a result of the operations of a drycleaning facility or wholesale supply facility (Chapter 376, Florida Statutes). The program is administered by the Florida Department of Environmental Protection (FDEP). The statute was sponsored by the drycleaning industry to address environmental, economic, and liability issues resulting from drycleaning solvent contamination. The program provides limited liability protection to the owner, operator and real property owner of drycleaning or wholesale supply facilities for cleanup of drycleaning solvent contamination if the parties meet the eligibility conditions stated in the law.

Government Publication Date: Apr 4, 2018

Dry Cleaning Facilities: DRYCLEANERS

A listing of dry cleaning facilities registered with the Florida Department of Environmental Protection (FDEP). The information contains facility identification number, site location information, related party (owner) information, and facility type and status. Data is taken from the Storage Tank & Contamination Monitoring database, the registration repository of dry cleaner facility data.

Government Publication Date: Mar 13, 2018

Delisted Dry Cleaning Facilities: DELISTED DRYCLEANERS

List of sites removed from the drycleaners database made available by the Florida Department of Environmental Conservation (DEC).

Government Publication Date: Mar 13, 2018

Oil and Hazardous Materials Incidents: SPILLS

Statewide listing of oil and hazardous materials spills and incidents recorded by the Florida Department of Environmental Protection (FDEP).

Government Publication Date: Aug 14, 2018

Contaminated Sites: DWM CONTAM

Florida Department of Environmental Protection (FDEP) Division of Waste Management (DWM) listing of active or known sites that include sites requiring cleanup but are not actively being worked on due to the agency's lack of funding (primarily petroleum and drycleaning).

Government Publication Date: Jan 02, 2018

Delisted Contaminated Sites: DEL CONTAM SITE

List of sites which were once included on the Florida Department of Environmental Protection (FDEP) Division of Waste Management (DWM)'s Contaminated Sites list. As sites on the Contaminated Sites (CS) list are cleaned up or closed under risk based corrective action, they are removed from the CS list.

Government Publication Date: Sep 30, 2015

Underground Injection Control Wells: UIC

Class I Underground Injection Control (UIC) wells that are currently or were previously active, as well as proposed sites, regulated by the Florida Department of Environmental Protection (FDEP). Class I UIC wells are used to inject nonhazardous waste, hazardous waste (new hazardous waste wells were banned in 1983), or municipal waste below the lowermost underground source of drinking water.
Government Publication Date: Sep 4, 2018

Well Surveillance Program Facilities: WELL SURVEILLANCE

List of facilities made available by the Florida Health Well Surveillance group. The Well Surveillance group manages several programs to identify and monitor areas in Florida where contaminated drinking water is suspected and may pose a threat to public health. The section coordinates with the County Health Departments (CHDs) to locate potable wells and conduct water sampling for contaminants of concern. The Well Surveillance Section is composed of the State Underground Petroleum Environmental Response Act (SUPER Act), Drinking Water Toxics Program (Toxics), Drycleaner Solvent Cleanup Program (DSCP). Includes locations of known cattle dipping vats.
Government Publication Date: Jan 29, 2018

Tier 2 Report: TIER 2

A list of Tier 2 facilities in the state of Florida. The list tracks the inventory of chemicals within a particular facility. This list is provided by the Florida Division of Emergency Management.
Government Publication Date: Aug 27, 2018

Tribal

No Tribal additional environmental record sources available for this State.

County

Alachua County Regulated Facility List: ALACHUA RF

List of facilities regulated by the Environmental Protection Department under the Alachua County Hazardous Materials Management Code (HMMC). The HMMC regulates the management of hazardous materials to prevent discharges to the environment and provide uniform standards for the proper storage, handling and monitoring hazardous materials in the county.
Government Publication Date: Jul 24, 2018

Broward County Hazardous Material Sites: BROWARD HAZ MAT

The Pollution Prevention Division of Broward County tracks sites that store hazardous materials.
Government Publication Date: Jun 4, 2018

Broward County Notice of Violation Sites: BROWARD NOV

A list of Notice of Violation Sites issued by the Community Code Compliance Section of the Planning and Redevelopment Division of Broward County.
Government Publication Date: Jun 4, 2018

Miami-Dade County Air Permit Sites: MIAMI AP

List of facilities which have applied for a Miami-Dade County Air Operating Permit. Permits are required for any air pollution source subsequent to construction or modification of the facility, and after demonstrating compliance with the terms and condition of the county air construction permit. Facilities with the potential to emit the following air pollutants may require a County operating permit: Particulate Matter (PM), Sulfur Dioxide (SO2), Nitrogen Oxides (NOx), Carbon Monoxide (CO), Volatile organic compounds (VOCs), Lead, and Hazardous Air pollutants (HAPs). Depending on the type of facility and the amount of air emissions, the State of Florida may require a facility permit.
Government Publication Date: Aug 13, 2018

Miami-Dade County Enforcement Case Tracking System Sites: MIAMI ENFORCE

Enforcement cases supervised by the Department of Environmental Resources Management in Miami-Dade County.
Government Publication Date: Sep 7, 2018

Miami-Dade County Fuel Spill Cases: MIAMI SPILLS

The Miami-Dade County Department of Environmental Resources Management (DERM) documents fuel spill sites that are not administered by a state program.
Government Publication Date: Sep 6, 2018

Miami-Dade County Grease Trap Permit Sites: MIAMI GREASE

Any non-residential facilities that prepare or process food, discharge or have the potential to discharge oil and grease to the public sanitary sewer system, require a Grease Discharge Operating (GDO) Permit. These permits are granted by the Division of Environmental Resources Management (DERM) of Miami-Dade's Department of Regulatory and Economic Resources.

Government Publication Date: Aug 13, 2018

Miami-Dade County Industrial Waste Permit Sites: MIAMI IND WASTE

List of permits used to regulate facilities that store, handle, use or generate hazardous materials or hazardous waste throughout Miami-Dade County. The permit provides operating conditions and requirements as well as guidance for the operators.

Government Publication Date: Aug 13, 2018

Miami-Dade County Industrial Waste Small Quantity Generators: MIAMI WASTE GEN

A listing of Industrial Waste Small Quantity Generator sites in Miami-Dade County, as recorded by the Department of Environmental Resources Management (DERM).

Government Publication Date: Aug 13, 2018

Miami-Dade County Marine Facilities Operating Permit: MIAMI MOP

Miami-Dade County Ordinance 89-104 and Section 24-18 of the Code of Miami-Dade County require the following types of marine facilities to obtain annual operating permits from the Miami-Dade County Department of Environment Resources Management: recreational boat docking facilities with 10 or more boat slips, moorings, davit spaces, and vessel tie-up spaces; boat storage facilities contiguous to tidal waters in Miami-Dade County with 10 or more dry storage spaces (including boatyards and boat manufacturing facilities); and commercial boat docking facilities, regardless of the number of slips - this includes the Port of Miami, Terminal Island and shipping terminals on the Miami River. Miami-Dade County is governed by the Public Records Act Chapter 119, Florida Statutes. These records made available by the Regulatory and Economic Resources Department.

Government Publication Date: Aug 13, 2018

Miami-Dade County River Enforcement: MIAMI MRE

List of enforcement cases for sites on or near the Miami River regulated by the Miami-Dade County Government, Florida. The list has all environmental information on said property coordinated and compiled by the Enforcement Section.

Government Publication Date: Nov 19, 2013

Miami-Dade County Septic Tanks in Wellfields: MIAMI SEPTIC

The Department of Environmental Resources Management (DERM) maintains a list of septic tanks in wellfields in Miami-Dade County.

Government Publication Date: Aug 13, 2018

Delisted County Records: DELISTED COUNTY

Records removed from county databases. Records may be removed from the county lists made available by the respective county departments because they are inactive, or because they have been deemed to be below reportable thresholds.

Government Publication Date: Sep 6, 2018

Definitions

Database Descriptions: This section provides a detailed explanation for each database including: source, information available, time coverage, and acronyms used. They are listed in alphabetic order.

Detail Report: This is the section of the report which provides the most detail for each individual record. Records are summarized by location, starting with the project property followed by records in closest proximity.

Distance: The distance value is the distance between plotted points, not necessarily the distance between the sites' boundaries. All values are an approximation.

Direction: The direction value is the compass direction of the site in respect to the project property and/or center point of the report.

Elevation: The elevation value is taken from the location at which the records for the site address have been plotted. All values are an approximation. Source: Google Elevation API.

Executive Summary: This portion of the report is divided into 3 sections:

'Report Summary'- Displays a chart indicating how many records fall on the project property and, within the report search radii.

'Site Report Summary'-Project Property'- This section lists all the records which fall on the project property. For more details, see the 'Detail Report' section.

'Site Report Summary-Surrounding Properties'- This section summarizes all records on adjacent properties, listing them in order of proximity from the project property. For more details, see the 'Detail Report' section.

Map Key: The map key number is assigned according to closest proximity from the project property. Map Key numbers always start at #1. The project property will always have a map key of '1' if records are available. If there is a number in brackets beside the main number, this will indicate the number of records on that specific property. If there is no number in brackets, there is only one record for that property.

The symbol and colour used indicates 'elevation': the red inverted triangle will dictate 'ERIS Sites with Lower Elevation', the yellow triangle will dictate 'ERIS Sites with Higher Elevation' and the orange square will dictate 'ERIS Sites with Same Elevation.'

Unplottables: These are records that could not be mapped due to various reasons, including limited geographic information. These records may or may not be in your study area, and are included as reference.

The ERIS ***Physical Setting Report - PSR*** provides comprehensive information about the physical setting around a site and includes a complete overview of topography and surface topology, in addition to hydrologic, geologic and soil characteristics. The location and detailed attributes of oil and gas wells, water wells, public water systems and radon are also included for review.

The compilation of both physical characteristics of a site and additional attribute data is useful in assessing the impact of migration of contaminants and subsequent impact on soils and groundwater.

Disclaimer

This Report does not provide a full environmental evaluation for the site or adjacent properties. Please see the terms and disclaimer at the end of the Report for greater detail.

Radon Information

This section lists any relevant radon information found for the target property.

Federal EPA Radon Zone for *MARION* County: **2**

Zone 1: Counties with predicted average indoor radon screening levels greater than 4 pCi/L
Zone 2: Counties with predicted average indoor radon screening levels from 2 to 4 pCi/L
Zone 3: Counties with predicted average indoor radon screening levels less than 2 pCi/L

Federal Area Radon Information for *MARION* County

No Measures/Homes:	39
Arithmetic Mean:	4.3
Standard Deviation:	5.6
Maximum:	25.4
% >4 pCi/L:	30.8*
% >8 pCi/L:	18
% >12 pCi/L:	12.8
Notes on Data Table:	TABLE 2. Indoor radon results from the Florida population-based radon survey, by county.

Appendix

Federal Sources

FEMA National Flood Hazard Layer — **FEMA FLOOD**

The National Flood Hazard Layer (NFHL) data incorporates Flood Insurance Rate Map (FIRM) databases published by the Federal Emergency Management Agency (FEMA), and any Letters Of Map Revision (LOMRs) that have been issued against those databases since their publication date. The FIRM Database is the digital, geospatial version of the flood hazard information shown on the published paper FIRMs. The FIRM Database depicts flood risk information and supporting data used to develop the risk data. The FIRM Database is derived from Flood Insurance Studies (FISs), previously published FIRMs, flood hazard analyses performed in support of the FISs and FIRMs, and new mapping data, where available.

Indoor Radon Data — **INDOOR RADON**

Indoor radon measurements tracked by the Environmental Protection Agency(EPA) and the State Residential Radon Survey.

Public Water Systems Violations and Enforcement Data — **PWSV**

List of drinking water violations and enforcement actions from the Safe Drinking Water Information System (SDWIS) made available by the Drinking Water Protection Division of the US EPA's Office of Groundwater and Drinking Water. Enforcement sensitive actions are not included in the data released by the EPA. Address information provided in SWDIS may correspond either with the physical location of the water system, or with a contact address.

Radon Zone Level — **RADON ZONE**

Areas showing the level of Radon Zones (level 1, 2 or 3) by county. This data is maintained by the Environmental Protection Agency (EPA).

Safe Drinking Water Information System (SDWIS) — **SDWIS**

The Safe Drinking Water Information System (SDWIS) contains information about public water systems as reported to US Environmental Protection Agency (EPA) by the states. Addresses may correspond with the location of the water system, or with a contact address.

Soil Survey Geographic database — **SSURGO**

The Soil Survey Geographic database (SSURGO) contains information about soil as collected by the National Cooperative Soil Survey at the Natural Resources Conservation Service (NRCS). Soil maps outline areas called map units. The map units are linked to soil properties in a database. Each map unit may contain one to three major components and some minor components.

U.S. Fish & Wildlife Service Wetland Data — **US WETLAND**

The U.S. Fish & Wildlife Service Wetland layer represents the approximate location and type of wetlands and deepwater habitats in the United States.

USGS Current Topo — **US TOPO**

US Topo topographic maps are produced by the National Geospatial Program of the U.S. Geological Survey (USGS). The project was launched in late 2009, and the term "US Topo" refers specifically to quadrangle topographic maps published in 2009 and later.

USGS Geology — **US GEOLOGY**

Seamless maps depicting geological information provided by the United States Geological Survey (USGS).

USGS National Water Information System — **FED USGS**

The U.S. Geological Survey (USGS)'s National Water Information System (NWIS) is the nation's principal repository of water resources data. This database includes comprehensive information of well-construction details, time-series data for gage height, streamflow, groundwater level, and precipitation and water use data.

State Sources

Oil and Gas Wells — **OGW**

The Oil and Gas Program is the permitting authority within the Florida Department of Environmental

Appendix

Protection's Mining and Minerals Regulation Program. Companies interested in exploration or production of hydrocarbons in Florida are regulated by the Oil and Gas Program. This data is made available by Florida Department of Environmental Protection's Oil and Gas program.

Public Water Supply Wells **PWSW**

The Public Water Supply Wells (PWSW) data consist of public water supply facilities and their wells in Florida. This data is made available by Florida Department of Environmental Protection, Water Compliance Assurance Program.

Underground Injection Control Wells **UIC**

Class I Underground Injection Control (UIC) wells that are currently or were previously active, as well as proposed sites, regulated by the Florida Department of Environmental Protection (FDEP). Class I UIC wells are used to inject nonhazardous waste, hazardous waste (new hazardous waste wells were banned in 1983), or municipal waste below the lowermost underground source of drinking water.

Water Well Construction Permits **WELL CONST PERM**

A list of water well construction permits issued by the St. Johns River Water Management District (SJRWMD).

Well Surveillance Program Water Wells **WATER WELLS**

A list of privately and publicly owned potable wells from the Florida Department of Health's (DOH) Well Surveillance Program.

Liability Notice

Reliance on information in Report: The Physical Setting Report (PSR) DOES NOT replace a full Phase I Environmental Site Assessment but is solely intended to be used as a review of environmental databases and physical characteristics for the site or adjacent properties.

License for use of information in Report: No page of this report can be used without this cover page, this notice and the project property identifier. The information in Report(s) may not be modified or re-sold.

Your Liability for misuse: Using this Service and/or its reports in a manner contrary to this Notice or your agreement will be in breach of copyright and contract and ERIS may obtain damages for such mis-use, including damages caused to third parties, and gives ERIS the right to terminate your account, rescind your license to any previous reports and to bar you from future use of the Service.

No warranty of Accuracy or Liability for ERIS: The information contained in this report has been produced by ERIS Information Inc. ("ERIS") using various sources of information, including information provided by Federal and State government departments. The report applies only to the address and up to the date specified on the cover of this report, and any alterations or deviation from this description will require a new report. This report and the data contained herein does not purport to be and does not constitute a guarantee of the accuracy of the information contained herein and does not constitute a legal opinion nor medical advice. Although ERIS has endeavored to present you with information that is accurate, ERIS Information Inc. disclaims, any and all liability for any errors, omissions, or inaccuracies in such information and data, whether attributable to inadvertence, negligence or otherwise, and for any consequences arising therefrom. Liability on the part of ERIS is limited to the monetary value paid for this report.

Trademark and Copyright: You may not use the ERIS trademarks or attribute any work to ERIS other than as outlined above. This Service and Report(s) are protected by copyright owned by ERIS Information Inc. Copyright in data used in the Service or Report(s) (the "Data") is owned by ERIS or its licensors. The Service, Report(s) and Data may not be copied or reproduced in whole or in any substantial part without prior written consent of ERIS.

APPENDIX G - 1998 BROWNFIELD AREA RESOLUTION

Resolution

No. 98-39

RESOLUTION TO DESIGNATE AS A BROWNFIELDS AREA THE EXISTING 108-BLOCK COMMUNITY REDEVELOPMENT AREA (CRA) IN DOWNTOWN OCALA

WHEREAS, the City of Ocala developed a proposal, focusing on the need for environmental analysis in the downtown CRA for a Brownfields Pilot Project grant from the United States Environmental Protection Agency (EPA) in 1995, 1996, and 1997; and

WHEREAS, in August 1996, the Florida Department of Environmental Protection (DEP), under a cooperative agreement with the EPA granted a smaller Brownfields Partnership Pilot to the City of Ocala in the form of $50,000 agency and contractor support for site assessment assistance in downtown Ocala during 1997 and 1998; and

WHEREAS, the enactment of the Florida Brownfields Redevelopment Act of 1997 ("Act") made funds available to all communities who had previously applied for EPA funding, therefore the Office of Tourism, Trade and Economic Development awarded the City of Ocala a $140,000 grant (ref. Budget Resolution No. 98-04); and

WHEREAS, the City Council, on February 03, 1998, authorized creation of the Brownfields Advisory Board for the purpose of improving public participation and receiving public comments on rehabilitation and redevelopment of the brownfield area, future land use, local employment opportunities, community safety, and environmental justice; and

WHEREAS, the Act provides that the board of the local government with jurisdiction over the brownfield area may designate such area for rehabilitation for the purposes of ss. 376.77-376.84. Such designation will enable rehabilitation and redevelopment of sites within the area.

NOW THEREFORE, BE IT RESOLVED BY THE CITY COUNCIL OF THE CITY OF OCALA, FLORIDA, duly assembled in regular session, that a Brownfields Area is created which boundaries correspond precisely with those of the existing CRA in downtown Ocala (see map).

This resolution introduced this 17th day of March, 1998.
This resolution adopted this 24th day of March, 1998.

CITY OF OCALA, FLORIDA

Attest:

Deborah C. Bullock
Deborah C. Bullock
City Clerk

Richard A. Kesselring, Jr.
City Council President Pro Tem

(O.R.B. 3601, PAGE 1853)

(NOTE: THIS DOCUMENT CALLS FOR PLAT BOOK E, BUT EXCLUDES THE PAGE NUMBER, PAGE 4 IS ADDED TO THE DESCRIPTION BELOW FOR CONVENIENCE).

COMMENCING 17.00 FEET WEST AND 170.00 FEET NORTH OF THE SOUTHEAST CORNER OF LOT 50, CALDWELL'S ADDITION TO OCALA, AS PER PLAT THEREOF, RECORDED IN DEED BOOK K, PAGE 741 AND ALSO RECORDED IN PLAT BOOK E, PAGE 4, PUBLIC RECORDS OF MARION COUNTY, FLORIDA, RUN THENCE NORTH 60.00 FEET FOR THE POINT OF BEGINNING OF THE TRACT HEREBY CONVEYED; FROM SAID POINT OF BEGINNING RUN WEST 139.00 FEET, NORTH 60.00 FEET, EAST 139.00 FEET, SOUTH 60.00 FEET TO THE POINT OF BEGINNING.

LEGAL DESCRIPTION
PARCEL NO.7 - P.I.D. 2820-050-008
(O.R.B. 5366, PAGE 1300)

COMMENCING 17.00 FEET WEST AND 170.00 FEET NORTH OF THE SOUTHEAST CORNER OF LOT 50, CALDWELL'S ADDITION TO OCALA, AS PER PLAT THEREOF, RECORDED IN PLAT BOOK E, PAGE 4, PUBLIC RECORDS OF MARION COUNTY, FLORIDA, RUN THENCE NORTH 60.00 FEET; WEST 139.00 FEET, SOUTH 60.00 FEET, EAST 139.00 FEET TO THE POINT OF BEGINNING.

(D-1) LEGAL DESCRIPTION
PARCEL NO. 9 - P.I.D.PARCEL NO. 2820-050-002
(OFFICIAL RECORDS BOOK 2611, PAGE 470)

COMMENCE 17.00 FEET WEST AND 40.00 FEET NORTH OF THE SOUTHEAST CORNER OF LOT 50 OF CALDWELL'S ADDITION TO OCALA, ACCORDING TO THE PLAT THEREOF AS RECORDED IN PLAT BOOK E, PAGE 4, OF THE PUBLIC RECORDS OF MARION COUNTY, FLORIDA; THENCE S 89°51'50" W, ALONG THE NORTH RIGHT OF WAY LINE OF N.E. 2ND STREET (40 FEET WIDE), A DISTANCE OF 100.00 FEET; THENCE N 00°17'53" W, A DISTANCE OF 130.00 FEET; THENCE N 89°51'50" E, A DISTANCE OF 100.00 FEET TO THE WEST RIGHT OF WAY LINE OF TUSCAWILLA AVENUE (57 FEET WIDE); THENCE S 00°17'53" E, A DISTANCE OF 130.00 FEET TO THE POINT OF BEGINNING.

(PARCEL NO. 10)
ALSO,

(D-2) COMMENCE 40 FEET NORTH AND 117 FEET WEST OF THE SOUTHEAST CORNER OF LOT 50, CALDWELL'S ADDITION TO OCALA, AS PER PLAT THEREOF RECORDED IN PLAT BOOK E, PAGE 4, THENCE NORTH 130 FEET; THENCE WEST 39 FEET; THENCE NORTH 120 FEET; THENCE WEST 96.5 FEET; THENCE SOUTH 85 FEET; THENCE WEST 20 FEET; THENCE SOUTH 165 FEET; THENCE EAST 155 FEET, MORE OR LESS, TO THE POINT OF BEGINNING.

LESS AND EXCEPT:
COMMENCE AT THE POINT OF INTERSECTION OF THE NORTH RIGHT OF WAY LINE OF N.E. 2ND STREET (40 FEET WIDE) AND THE EAST RIGHT OF WAY LINE OF N.E. WATULA AVENUE (40 FEET WIDE) SAID POINT BEING 324.6 FEET, MORE OR LESS, WEST OF AND 40 FEET, MORE OR LESS, NORTH OF, THE SOUTHEAST CORNER OF LOT 50 OF CALDWELL'S ADDITION TO OCALA, AS RECORDED IN PLAT BOOK E, PAGE 4, OF THE PUBLIC RECORDS OF MARION COUNTY, FLORIDA; THENCE RUN N 00°00'41"E, ALONG SAID EASTERLY RIGHT OF WAY OF N.E. WATULA AVENUE, FOR A DISTANCE OF 148.73 FEET; THENCE RUN N 89°43'10" E, FOR A DISTANCE OF 52.16 FEET TO THE POINT OF BEGINNING;

THENCE RUN N 00°13'16" W, FOR A DISTANCE OF 14.90 FEET;
THENCE RUN N 89°36' 44" E, FOR A DISTANCE OF 20.04 FEET;
THENCE RUN N 00°05'14" E, FOR A DISTANCE OF 84.86 FEET;
THENCE RUN N 89°41'10" E, FOR A DISTANCE OF 96.32 FEET;
THENCE RUN S 00°00'33" W, FOR A DISTANCE OF 99.78 FEET;
(D-4) THENCE RUN S 89°41'10" W, FOR A DISTANCE OF 116.42 FEET TO THE POINT OF BEGINNING.

(PARCEL NO. 11)
TOGETHER WITH THE FOLLOWING DESCRIBED PARCEL AS RECORDED IN OFFICIAL RECORDS BOOK 2255, PAGE 1161 OF THE PUBLIC RECORDS OF MARION COUNTY, FLORIDA:

COMMENCING 40 FEET NORTH AND 272.6 FEET WEST FROM THE SOUTHEAST CORNER OF LOT 50, CALDWELL'S ADDITION TO OCALA, AS PER PLAT THEREOF RECORDED IN PLAT BOOK E, PAGE 4, PUBLIC RECORDS OF MARION COUNTY, FLORIDA, THENCE NORTH 150 FEET, THENCE WEST 52 FEET, THENCE SOUTH 150 FEET, THENCE EAST 52 FEET TO THE POINT OF BEGINNING.

(D-5) EASEMENT

SUBJECT TO THE FOLLOWING DESCRIBED NON-EXCLUSIVE EASEMENT FOR THE INSTALLATION AND MAINTENANCE OF DRAINAGE FACILITIES TO DAYBREAK COMMUNITIES, INC., ITS SUCCESSORS OR ASSIGNS, AS RECORDED IN OFFICIAL RECORDS BOOK 1065, PAGES 1038 AND 1039, OF THE PUBLIC RECORDS OF MARION COUNTY, FLORIDA:

COMMENCE 17.00 FEET WEST AND 40.00 FEET NORTH OF THE SOUTHEAST CORNER OF LOT 50, CALDWELL'S ADDITION TO OCALA, ACCORDING TO THE PLAT THEREOF AS RECORDED IN PLAT BOOK "E", AT PAGE 4, OF THE PUBLIC RECORDS OF MARION COUNTY, FLORIDA; THENCE S.89°51'50"W. ALONG THE NORTH RIGHT OF WAY LINE OF NORTHEAST 2ND STREET (40 FEET WIDE), FOR 100.00 FEET; THENCE N.00°17'53"W. FOR 130.00 FEET TO THE POINT OF BEGINNING OF THE EASEMENT HEREINAFTER DESCRIBED;

THENCE S.89°51'51"W. FOR 39.00 FEET;
THENCE N.00°17'53"W. FOR 120.00 FEET;
THENCE S.89°51'50"W. FOR 96.50 FEET;
THENCE S.00°17'53"E. FOR 40.00 FEET;
THENCE N.89°51'50"E. FOR 86.50 FEET;
THENCE S.00°17'53"E. FOR 90.00 FEET;
THENCE N.89°51'50"E. FOR 49.00 FEET;
THENCE N.00°17'53"W. FOR 10.00 FEET TO THE POINT OF BEGINNING.

NOTES:

1. BEARINGS SHOWN HEREON ARE GRID AND ARE BASED ON THE FLORIDA STATE PLANE COORDINATES, WEST ZONE, AND ARE REFERENCED TO THE EAST RIGHT-OF-WAY LINE OF NE WATULA AVE. AS BEING N 00°23'25" E.
2. THE LEGAL DESCRIPTION OF PARCEL NO. 1 (A TWO PART DESCRIPTION) CREATES A 1.22' GAP BETWEEN THE PARTS. HOWEVER, THE STRIP OF LAND CREATED BY THE GAP, IS INCLUDED WITHIN THE LEGAL DESCRIPTION OF PARCEL 2.
3. THIS SKETCH IS A COMPOSITE OF ALL PROPERTIES OWNED BY THE CITY OF OCALA IN BLOCK 50. FOR COMPLETE BOUNDARY INFORMATION SEE INDIVIDUAL BOUNDARY SURVEYS THAT WERE PREPARED BY THE CITY.
4. IMPROVEMENTS EXIST ON TOTAL SITE THAT ARE NOT SHOWN.
5. THIS IS NOT A SURVEY.

APPENDIX K - USER QUESTIONNAIRE

MODIFIED ASTM STANDARD PRACTICE E1527-13 USER QUESTIONNAIRE

Site Name: Fire Station #1 : city block bordered by NE Watula Avenue, NE Tuwcawilla Avenue, NE 2nd Street and NE 3rd Street

Title and Signature of Person Completing Questionnaire

Holly Lang, Fiscal Manager, Development Svcs

Date: Oct 8, 2018

In order to qualify for one of the Landowner Liability Protections (LLPs) offered by the Small Business Liability Relief and Brownfields Revitalization Act of 2001 (the "Brownfields Amendments"),the user must conduct the following inquiries required by 40 CFR 312.25, 312.28, 312.29, 312.30, and 312.31. These inquiries must also be conducted by EPA Brownfield Assessment and Characterization grantees. The user should provide the following information (if available) to the environmental professional. Failure to provide this information conduct these inquiries could result in a determination that "all appropriate inquiries" is not complete. The following are a series of questions from ASTM 1527-13 that must be answered in order to qualify for Landowner Liability Protection under CERCLA. Please provide an answer to each question or attach pertinent information.

1. Did a search of recorded land title records or judicial records where appropriate, identify any environmental liens filed or recorded against the property under federal, tribal, state or local law?

   ☒ No ☐ Yes (Describe or attach information) ☐ Attachment No. _____

2. Did a search of recorded land title records or judicial records where appropriate, identify any AULs, such as engineering controls, land use restrictions or institutional controls that are in place at the property and/or have been filed or recorded against the property under federal, tribal, state or local law?

   ☒ No ☐ Yes (Describe or attach information) ☐ Attachment No. _____

3. Do you have any specialized knowledge or experience related to the property or nearby properties? For example, are you involved in the same line of business as the current or former occupants of the property or an adjoining property so that you would have specialized knowledge of the chemicals and processes used by this type of business?

   ☒ No ☐ Yes (Describe or attach information) ☐ Attachment No. _____

4. Does the purchase price being paid for this property reasonably reflect the fair market value of the property?

☐ No ☐ Yes (Describe or attach information) ☐ Attachment No. _____

N/A The City of Ocala owns the property.

If you conclude that there is a difference between the purchase price and the fair market value, have you considered whether the lower purchase price is because contamination is known or believed to be present at the property?

☐ No ☐ Yes (Describe or attach information) ☐ Attachment No. _____

N/A

5. Are you aware of commonly known or reasonable ascertainable information about the property that would help the environmental professional to identify conditions indicative of releases or threatened releases? For example,

a. Do you know the past users of the property?

☒ No ☐ Yes (Describe or attach information) ☐ Attachment No. _____

b. Do you know of specific chemicals that are present or once where present at the property?

☒ No ☐ Yes (Describe or attach information) ☐ Attachment No. _____

c. Do you know of spills or other chemical releases that have taken place at the property?

☒ No ☐ Yes (Describe or attach information) ☐ Attachment No. _____

d. Do you know of any environmental cleanups that have take place at the property?

☒ No ☐ Yes (Describe or attach information) ☐ Attachment No. _____

6. Based on your knowledge and experience related to the property, are there any obvious indicators that point to the presence or likely presence of releases at the property?

☒ No ☐ Yes (Describe or attach information) ☐ Attachment No. _____

7. ASTM indicates certain documents as "Helpful Documents" for the understanding of environmental conditions at the Site. Are you aware of any of the following documents; and if so, can they be made available?

☒ No ☐ Yes (Describe or attach information) ☐ Attachment No. _____

☐ Prior Environmental Assessments	☐ Risk Assessments
☐ Compliance Reports	☐ Hazardous Waste Generation Notices
☐ Environmental Permits	☐ Notices from Environmental Agencies
☐ Tank Registrations	☐ Underground Injection System Registrations
☐ Material Safety Data Sheets (MSDS)	☐ Community Right to Know Plans
☐ Safety or Spill Protection Plans	☐ Hydrogeologic or Geotechnical Reports

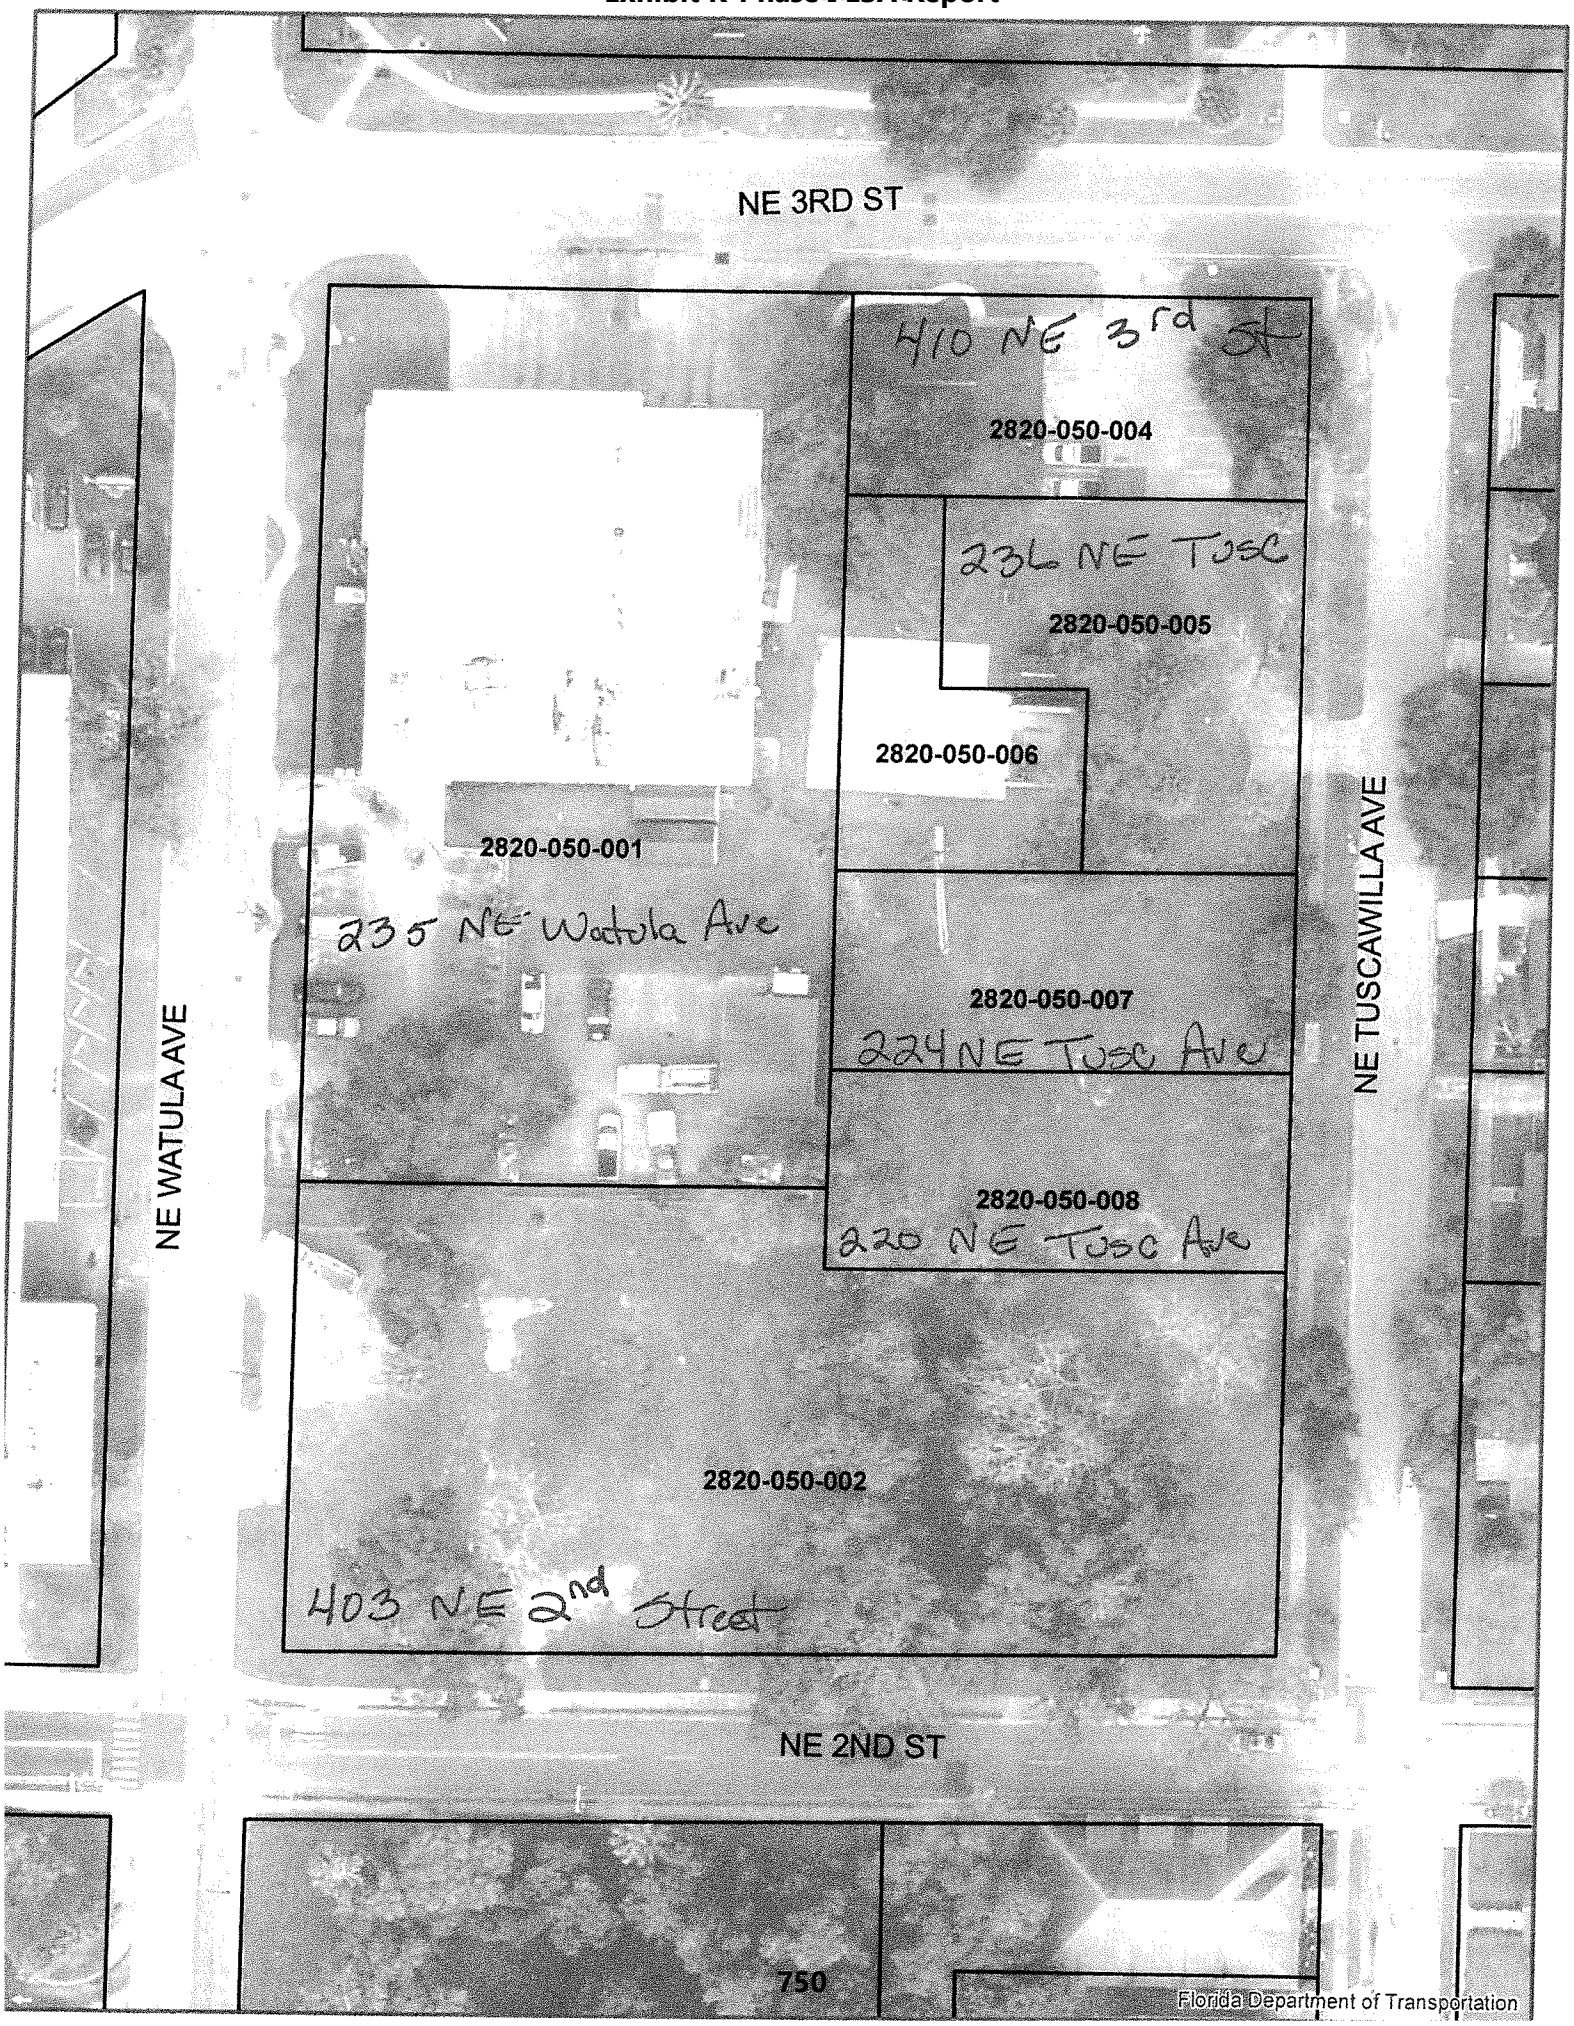

8. Do you know who the past owners of the property are and can you provide contact information?

☒ No ☐ Yes (Describe or attach information) ☐ Attachment No. _____

9. Do you have a complete site plan of the property that shows property boundaries and can you make it available?

☐ No ☒ Yes (Describe or attach information) ☐ Attachment No. _____

Exhibit K-Phase I ESA Report

APPENDIX L - QUALIFICATIONS OF ENVIRONMENTAL PROFESSIONAL

James C. Manzella, C.H.M.M.
Senior Environmental Scientist

PROPOSED PROJECT ASSIGNMENT: Project Scientist

EDUCATION:
BA/Environmental Studies/Allegheny College
7 Engineering Classes – SUNY University at Buffalo

REGISTRATION:
Certified Hazardous Materials Manager
OSHA 40-Hour Health and Safety Training
ASTM Phase 2 ESA Training Course
NYSDOH Asbestos Inspector
X-MET and Niton Training Course – X-Ray
Fluorescence Theory and Application
Princeton Review Groundwater Remediation Course
Level C Safety Equipment and Monitoring Equipment

YEARS WITH FIRM: 5
TOTAL YEARS EXPERIENCE: 20

Professional Profile

Mr. Manzella has 20 years of experience as a Project Scientist with environmental project results requiring extensive regulatory requirements. He has extensive environmental & technical knowledge and has served as a subject matter expert. His experience includes project management, scoping, budgeting, scheduling and staffing for site assessments, remedial investigations and remedial cleanup activities.

Mr. Manzella's expertise includes contaminant characterization at brownfield sites and hazardous and solid waste facilities, including the development of project scopes, on-site implementation of characterization efforts, data evaluation and interpretation, identification and evaluation of remedial alternatives, final report preparation, and project management. He has developed a brownfield specialty that includes site characterization, remedial analysis and design and re-use planning; and has been involved with assorted projects including preliminary site assessments, Phase I and II environmental site assessments, solid waste facility monitoring programs, treatment technology assessments, remedial investigations, remedial design projects & remedial construction oversight.

Project Experience

Environmental Evaluation Services, Commercial Plaza, City of Hudson; Hernando County, FL, 2015. Project Manager responsible for conducting an Environmental Evaluation of the property and provide a third party review of a previously conducted Phase I ESA. The field investigation involved visible inspection of current and past use of the property, physical setting of the property, improper disposal or solid waste material, stormwater discharges and on-site sewer systems, evidence of hazardous waste or petroleum product generation, storage, treatment, or disposal, and other signs of noxious odors, seeps, spills, and stains. Additionally, was responsible for client communications, coordination with FDEP, the preparation of a report to present the findings of field investigation and a public records search.

Phase I Environmental Site Assessment, Private Residence, City of Bradenton; Manatee County, FL, 2014. Project Manager responsible for conducting a Phase I ESA at a former private residence comprising 27.61 acres along the Little Manatee River. The field investigation involved visible inspection of current and past use of the property, physical setting of the property, improper disposal or solid waste material, stormwater discharges and on-site sewer systems, evidence of hazardous waste or petroleum product generation, storage, treatment, or disposal, and other signs of noxious odors, seeps, spills, and stains. Additionally, was responsible for client communications, coordination of subcontractors, the preparation of a report to present the findings of field investigation and a public records search.

Phase I and II Environmental Site Assessments, Former Phoenix Height Subdivision; City of Ocala, Marion County, FL, 2015. Project Manager responsible for conducting Phase I and II ESAs for 10 adjoining parcels plus the adjoining right-of-way owned by the City of Ocala. The work was performed in support of the City's Growth Management Department as part of the Community Redevelopment Plan. The Phase I ESA identified recognized environmental conditions that necessitated a Phase II ESA. The Phase II ESA field program involved the advancement of soil

probes, installation of groundwater monitoring wells and the collection of soil and groundwater samples for chemical analysis. Additionally, was responsible for client communications, coordination of subcontractors, and preparation of a report to present the findings of field investigation, review and evaluation of analytical results. Client: City of Ocala, Growth Management Department, Contact: Ms. Holly Lang (352) 629-8481.

Phase I and II Environmental Site Assessments; 110 East Silver Springs Boulevard, City of Ocala, Marion County, FL, 2015. Project Manager responsible for conducting Phase I and II ESAs for property located at 110 East Silver Springs Boulevard. The Phase I ESA identified recognized environmental conditions that necessitated a Phase II ESA. The Phase II ESA field program involved the advancement of soil probes and the collection of soil samples for chemical analysis. Additionally, was responsible for client communications, coordination of subcontractors, and preparation of a report to present the findings of field investigation, review and evaluation of analytical results. Client: City of Ocala, Growth Management Department, Contact: Ms. Holly Lang (352) 629-8481.

Phase I Environmental Site Assessment, Proposed City Market Parcel; SE 3rd Street, City of Ocala, Marion County, FL, 2015. Project Manager responsible for conducting a Phase I ESA for property located southwest of the intersection of SE 3rd Street and SE 3rd Avenue, City of Ocala, Florida The Phase I ESA was performed in accordance with ASTM E-1527-13 and included site reconnaissance, records review, interviews and the preparation of an ESA report. The Phase I ESA review did not indicate any recognized environmental conditions for the subject property; however it did identify several potential environmental concerns which included potentially contaminated soils remaining in the subsurface approximately 20 to 25 feet below grade and the potential for asbestos and lead paint to have been used in the building construction. Client: City of Ocala, Growth Management Department, Contact: Ms. Holly Lang (352) 629-8481.

Phase I Environmental Site Assessment, Former Royal Oaks Facility; 1921 NW 17th Place, City of Ocala, Marion County, FL, 2016. Project Manager responsible for conducting a Phase I ESA for the former Royal Oaks facility located at 1921 NW 17th Place, City of Ocala, Florida The Phase I ESA was performed in accordance with ASTM E-1527-13 and included site reconnaissance, records review, interviews and the preparation of an ESA report. The Phase I ESA identified recognized environmental conditions that included surface and subsurface contamination. Polycyclic aeromantic hydrocarbons, barium and arsenic were identified during previous investigations at concentrations exceeding the State's residential-use soil cleanup target levels. A Phase II ESA was recommended to define the limits of soil contamination. Client: City of Ocala, Growth Management Department, Contact: Ms. Holly Lang (352) 629-8481.

Marion County Fleet Facility Maintenance Yard, Spill Prevention Control and Countermeasures Plan; City of Ocala, Marion County, FL, 2016-2017. Project Scientist responsible for preparing a Spill Prevention Control and Countermeasures (SPCC) Plan for the County's fleet vehicle maintenance facility. Mr. Manzella, coordinated the site inspections and interviews of site managers, conducted document review and prepared the written SPCC Plan in accordance with 40 CFR Part 112.

Marion County North Substation Maintenance Yard, Spill Prevention Control and Countermeasures Plan; City of Ocala, Marion County, FL, 2016-2017. Project Scientist responsible for preparing a Spill Prevention Control and Countermeasures (SPCC) Plan for the County Department of Public Works Northern fueling facility/equipment storage facility. Mr. Manzella, coordinated the site inspections and interviews of site managers, conducted document review and prepared the written SPCC Plan in accordance with 40 CFR Part 112.

Marion County Jail & Sheriff's Office, Spill Prevention Control and Countermeasures Plan; City of Ocala, Marion County, FL, 2016-2017. Project Scientist responsible for preparing a Spill Prevention Control and Countermeasures (SPCC) Plan for the County Jail and the County's Sheriff's Main Operations Complex. Mr. Manzella, coordinated the site inspections and interviews of site managers, conducted document review and prepared the written SPCC Plan in accordance with 40 CFR Part 112.
